

# Physics of Everyday Phenomena: A Conceptual Introduction to Physics

Griffith, W

ISBN-13: 9780073512204

## Table of Contents

Chapter 1 - Physics, the Fundamental Science

### **Unit One - The Newtonian Revolution**

Chapter 2 - Describing Motion

Chapter 3 - Falling Objects and Projectile Motion

Chapter 4 - Newton's Laws: Explaining Motion

Chapter 5 - Circular Motion, the Planets, and Gravity

Chapter 6 - Energy and Oscillations

Chapter 7 - Momentum and Impulse

Chapter 8 - Rotational Motion of Solid Objects

### **Unit Two - Fluids and Heat**

Chapter 9 - The Behavior of Fluids

Chapter 10 - Temperature and Heat

Chapter 11 - Heat Engines and the Second Law of Thermodynamics

### **Unit Three - Electricity and Magnetism**

Chapter 12 - Electrostatic Phenomena

Chapter 13 - Electric Circuits

Chapter 14 - Magnets and Electromagnetism

### **Unit Four - Wave Motion and Optics**

Chapter 15 - Making Waves

Chapter 16 - Light Waves and Color

Chapter 17 - Light and Image Formation

### **Unit Five - The Atom and Its Nucleus**

Chapter 18 - The Structure of the Atom

Chapter 19 - The Nucleus and Nuclear Energy

### **Unit Six - Relativity and Beyond**

Chapter 20 - Relativity

Chapter 21 - Beyond Everyday Phenomena

**Appendix A - Using Simple Algebra**

**Appendix B - Decimal Fractions, Percentages, and Scientific Notation**

**Appendix C - Vectors and Vector Addition**

**Appendix D - Answers to Odd-Numbered Exercises and Challenge Problems**

**Photo Credits**

**Glossary**

**Index**
