International Review of Neurobiology: The Pharmacology of Neurogenesis and Neuroenhancement

Bradley, Ronald J.

Table of Contents

Regenerating the Brain.
Serotonin and Brain: Evolution, Neuroplasticity and Homeostasis.
Therapeutic approaches to promoting axonal regeneration in the adult mammalian spinal cord.
Evidence For Neuroprotective Effects of Antipsychotic Drugs: Implications for the Pathophysiology and Treatment of Schizophrenia.
Dopamine-GABA Interactions and the Pathophysiology of Schizophrenia.
Neurogenesis and Neuroenhancement in the Pathophysiology and Treatment of Bipolar Disorder.
Neuroreplacement, growth factor and small molecule neurotrophic approaches for treating Parkinson’s Disease.
Using C. elegans models of neurodegenerative disease to identify neuroprotective strategies.
Neuroprotection and enhancement of neurite outgrowth with small molecular weight compounds from screens of chemical libraries.
