

Bioactive Food as Dietary Interventions for Diabetes: Bioactive Foods in Chronic Disease States

Watson, R

ISBN-13: 9780123971531

Table of Contents

- Role of oxidative stress in the pathogenesis of insulin resistance and type 2 diabetes
- Alternative medicines (bioactive foods and supplements) in diabetes control
- Government Regulation of Dietary Supplements and Foods: Role in Diabetes
- Diabetes as an Immune Dysfunction Syndrome
- Antihyperglycemic potential of Secoisolaricinol diglucoside
- Antidiabetic potential of trigonelline and 4-hydroxyisoleucine in Fenugreek
- Community participation and diabetes control
- Soya bean in the prevention and treatment of diabetes
- Amino acids supplements and diabetes
- Reduction in serum glucose with garlic extracts
- Dietary supplements, immune modulation and diabetes control (tentative title)
- Phytochemicals against type 2 diabetes
- Phytotherapeutics in treating diabetes
- Plant derived hydroxycinnamate derivatives, insulin sensitivity and adiponectin: implications for diabetes control
- Antidiabetic activity of *Allium sativum*
- Chromium and diabetes
- DIETARY CALCIUM AND MAGNESIUM AND THE RISK OF TYPE 2 DIABETES
- Polyunsaturated Fatty Acids and Insulin Resistance
- VITAMIN D AND TYPE 2 DIABETES MELLITUS
- Pongamia pinnata*: treatment of diabetes
- Oyster mushroom (*Pleurotus pulmonarius*) and diabetes care
- Traditional medicinal plants of Indigenous Peoples of Canada and their antioxidant activity in relation to treatment of diabetes
- Indian medicinal plants with hypoglycemic potential
- Plant extracts and alkaloids: prevention of diabetic nephropathy
- Lutein and diabetic cataracts Compounds in vegetables including Okra and Fenugreek of potential value in the treatment of diabetes
- PROBIOTICS AND DIABETES/OBESITY: HEALTH IMPLICATIONS
- Tradition and Perspectives of Diabetes Treatment in Greco-Arab and Islamic Medicine
- State of the Art of Diabetes Treatment in Greco-Arab and Islamic Medicine
- Phytonutrients in Diabetes Management
- Antidiabetic effects of *Punica granatum L* (Pomegranate): a review
- Type II Diabetes Mellitus-2011 Research Summary

Diabetes and Natural Products

L-CARNITINE IN PATIENTS WITH DIABETES

Antioxidants and inflammation in obesity

Magnesium and Metabolic Syndrome: The Role of Magnesium in Health and Disease

Obesity in Ayurveda - Dietary, Lifestyle, and Herbal Considerations

The effects of a fermented soy product and isoflavones in metabolic syndrome control

Omega 3 fatty acids and bioactive foods: from biotechnology to health promotion

Metabolic Syndrome: Diet, obesity and chronic inflammation

The Indian medicinal plant *Aegle marmelos* in the treatment of diabetes mellitus: Promise and Prospects

Anti-diabetic and hypoglycaemic effects of *Syzygium cumini* (black plum): a review

Human milk as a bioactive food

Ginger (*Zingiber officinale* Roscoe) in the treatment of diabetes and metabolic syndrome: preclinical observations

Antidiabetic and cardioprotective effects of Amla (*Embllica officinalis* Gaertn) and its phytochemicals: preclinical observations

Prevention and management of obesity by isoflavones

Antioxidant capacity of honey : potential health benefit
