Table of Contents

Foreword
Preface
Acknowledgments
1. Development of the MMPI And MMPI-2
Development of the MMPI
Development of the MMPI-2
2. Administration and Scoring
Qualifications of Test Users
Who Can Take the MMPI-2?
Administering the MMPI-2
Testing Materials
Scoring the MMPI-2
Constructing the Profile
Coding the Profile
3. The Validity Scales
Scales Assessing Content-Nonresponseiveness (CNR)
Cannot Say (?) Score
Variable Response Inconsistency (VRIN) Scale
True Response Inconsistency (TRIN) Scale
Scales Assessing Content-Responsiveness
Scales For Detecting Overreporting
Infrequency (F) Scale
Back Infrequency (Fb) Scale
Infrequency Psychopathology (Fp) Scale
Scales For Detecting Underreporting
Lie (L) Scale
Correction (K) Scale
Superlative Self-Presentation (S) Scale
Other Validity Indicators
Profile Invalidity
Deviant Response Sets and Styles
Random Responding
All-True Responding
Negative Self-Presentation
Positive Self-Presentation
4. The Clinical Scales
Defining High and Low Scores on Clinical Scales
Interpretation of Scores on Clinical Scales
Scale 1: Hypochondriasis
Scale 2: Depression
Scale 3: Hysteria
Scale 4: Psychopathic Deviate
Scale 5: Masculinity-Femininity
Scale 6: Paranoia
Scale 7: Psychasthenia
Scale 8: Schizophrenia
Scale 9: Hypomania
Scale 0: Social Introversion
5. Code Types
Determining Code Types
Two-Point Code Types
Three-Point Code Types
Other Configural Aspects
6. Content Interpretation
The Harris-Lingoes Subscales
Subscales for Scales 5 and 0
The MMPI-2 Content Scales
Critical Items

7. Restructured Clinical (RC) and Personality Psychopathology Five (Psy-5) Scales
   Restructured Clinical (RC) Scales
   Development of the RC Scales
   Intercorrelations of RC Scales and Clinical Scales
   Reliability of the RC Scales
   Validity of the RC Scales
   Interpretation of the RC Scales
   Personality Psychopathology Five (Psy-5) Scales
   The Psy-5 Model
   Construction of the Psy-5 Scales
   Reliability of the Psy-5 Scales
   Validity of the Psy-5 Scales
   The Psy-5 Facet Subscales
   Interpretation of the Psy-5 Scales

8. Supplementary Scales
   Anxiety (A) and Repression (R) Scales
   Ego Strength (ES) Scale
   Dominance (DO) Scale
   Social Responsibility (RE) Scale
   College Maladjustment (MT) Scale
   Post-Traumatic Stress Disorder (PK) Scale
   Marital Distress Scale (MDS)
   Hostility (HO) Scale
   Overcontrolled-Hostility (O-H) Scale
   MacAndrew Alcoholism Scale-Revised (MAC-R)
   Addiction Acknowledgment Scale (AAS)
   Addiction Potential Scale (APS)
   Masculine Gender Role (GM) and Feminine Gender Role (GF) Scales
   Subtle-Obvious Subscales

9. Psychometric Considerations
   Standardization
   Scale Construction
   Norms
   Original MMPI Norms
   MMPI-2 Norms
   Gendered Versus Non-Gendered Norms
   K-Corrected Versus Non-K-Corrected Norms
   T-Score Transformations
   Comparability of the MMPI and the MMPI-2
   Reliability
   Internal Consistency
   Temporal Stability
   Factor Structure
   Scale-Level Factor Structure
   Item-Level Factor Structure
   Response Sets and Styles
   Validity
   Issues in Determining Validity
   Generalizability of Correlates
   Test Bias
   Specific Norms
   Convergent and Discriminant Validity
   Incremental Validity
   Classification Accuracy
   Validity of the Original MMPI
   Validity of the MMPI-2

10. Use With Special Groups
    Adolescents
    Older Adults
    Ethnic Minorities
    African Americans
    Hispanics
    American Indians
    Medical Patients
    Personnel Screening
    Correctional Settings

11. An Interpretive Strategy
    A General Strategy
    Test-Taking Attitude
    Adjustment Level
Characteristic Traits and Behaviors
Diagnostic Impressions
Treatment Implications
Specific Referral Questions
An Illustrative Case
Additional Practice Cases
Giving Feedback to Clients
Chapter Appendix
12. Computerized Administration, Scoring, and Interpretation
Computerized Administration
Computer Adaptive Administration
Computerized Scoring
Computerized Interpretation
Issues Concerning the Use of Computerized Interpretations
Professional Guidelines for Computerized Assessment
Sample of Computerized Interpretive Report
Comparison of Computerized and Clinician-Generated Interpretations
Conclusions and Recommendations
13. Forensic Applications Of The MMPI-2
Admissibility of MMPI-2 Evidence
Some Important Issues in Using MMPI-2 in Forensic Settings
Some Forensic Uses of the MMPI-2
Detecting Invalid Responding
Assessing Clinical Condition
Screening for Substance Abuse
Predicting Dangerousness
Assessing Competency to Stand Trial
Domestic Relations Evaluations
Personal Injury Evaluations
Presenting Expert Opinions Based on the MMPI-2
Correctional Settings
Megargee Classification System
Criminal Justice and Correctional Report
References
Appendixes
A. Composition of Standard Validity and Clinical Scales
B. T-Score Conversions for Standard Validity and Clinical Scales
C. Composition of Harris-Lingoes Subscales
D. Linear T-Score Conversions for Harris-Lingoes Subscales
E. Composition of SI Subscales
F. Linear T-Score Conversions for SI Subscales
G. Composition of Content Scales
H. Uniform T-Score Conversions for Content Scales
I. Composition of Content Component Scales
J. Uniform T-Score Conversions for Content Component Scales
K. Koss-Butcher Critical Item Numbers
L. Composition of Restructured Clinical (RC) Scales
M. Uniform T-Score Conversions for Restructured Clinical (RC) Scales
N. Composition of Personality Psychopathology Five (Psy-5) Scales
O. Uniform T-Score Conversions for Personality Psychopathology Five (Psy-5) Scales
P. Composition of Supplementary Scales
Q. Linear T-Score Conversions for Supplementary Scales
R. Intercorrelations of MMPI-2 Scales for Normative Sample
S. Percentile Equivalents for Uniform T Scores
T. Four Practice Cases: Background Information and Extended Score Reports
