Table of Contents

Introduction
- A. Todorov, S. T. Fiske, and D. Prentice

I. Understanding and representing other people

1. How has cognitive neuroscience contributed to social psychological theory?
- Adrianna C. Jenkins & Jason P. Mitchell (Harvard University)

2. You, me, and my brain: Self and other representations in social cognitive neuroscience
- Jamil Zaki and Kevin Ochsner (Columbia University)

3. Distributed processes for retrieval of person knowledge
- M. Ida Gobbini (University of Bologna, Italy)

4. Evaluating faces on social dimensions
- Alexander Todorov (Princeton University)

5. Commentary: Social neuroscience and the representation of others
- James V. Haxby (Princeton University)

II. Understanding and representing social groups

6. Perceiving social category information from faces: Using ERPs to study person perception
- Tiffany A. Ito (University of Colorado, Boulder)

7. Multiple mechanisms for regulating of intergroup bias: Contributions from social neuroscience
- David M. Amodio (New York University)

8. Perceiving humanity
- Lasana T. Harris and Susan Fiske (Princeton University)

9. Commentary: Us versus them: The social neuroscience of perceiving outgroups
- Malini Ambady & Reginald Adams (Tufts University)

III. Regulation of social behavior

10. Self-regulation and evaluative processing
- Dominic J. Packer, Amanda Kesek (University of Toronto) & William A. Cunningham (The Ohio State University)

11. The neural basis of emotional decision-making
- Jennifer S. Beer & Jamil F. Bhanji (University of California, Davis)

12. Social neuroscience of asymmetrical frontal cortical activity: Considering anger and approach motivation
- Eddie Harmon-Jones & Cindy Harmon-Jones (Texas A&M University)

13. Why symbolic processing of affect can disrupt negative affect: Social cognitive and affective neuroscience investigations
- Matthew D. Lieberman (University of California, Los Angeles)

14. Commentary: Emotion in social neuroscience
- Liz Phelps (New York University)

IV. Navigating social life

15. The social brain in interactive games
- James Rilling (Emory University)

16. Social pain: Experiential, neurocognitive, and genetic correlates
- Naomi I. Eisenberger (University of California, Los Angeles)

17. Could an aging brain contribute to subjective well-being?: The value added by a social neuroscience perspective
- John T. Cacioppo, Gary G. Berntson, Antoine Bechara, Daniel Tranel, Hanna Damasio & Louise C. Hawkley

18. Social neuroscience and the soul’s last stand
- Joshua D. Greene (Harvard University)

19. Commentary: Building a social brain

General commentary: Hanging with social neuroscientists
- Marcia Johnson (Yale University)
