Neoconstructivism: The New Science of Cognitive Development

Johnson, Scott P.

Table of Contents

Foreword: What is Neoconstructivism?
Nora S. Newcombe

Introduction
Scott P. Johnson

I. Objects and Space
1. Attention in the Brain and Early Infancy
John E. Richards
2. All Together Now: Learning through Multiple Sources
Natasha Kirkham
3. Perceptual Completion in Infancy
Scott P. Johnson
M. Keith Moore and Andrew N. Meltzoff

II. Words, Language, and Music
5. Connectionist Explorations of Multiple-Cue Integration in Syntax Acquisition
Morton H. Christiansen, Rick Dale, and Florencia Reali
6. Shape, Action, Symbolic Play, and Words: Overlapping Loops of Cause and Consequence in Developmental Process
Linda B. Smith and Alfredo F. Pereira
Erin E. Hannon

III. Learning Mechanisms
8. Integrating Top-down and Bottom-up Approaches to Children's Causal Inference
David M. Sobel
9. What is Statistical Learning, and What Statistical Learning is not
Jenny R. Saffran
10. Processing Constraints on Learning
Rebecca GafA™mez
11. Mixing the Old with the New and the New with the Old: Combining Prior and Current Knowledge in Conceptual Change
Denis Mareshal and Gert Westermann

IV. Induction
12. The Development of Inductive Inference in Infancy
David H. Rakison and Jessica B. Cicchino
13. The Acquisition of Expertise as a Model for the Growth of Cognitive Structure
Paul C. Quinn
Vladimir M. Sloutsky

V. Foundations of Social Cognition
15. Building Intentional Action Knowledge with One's Hands
Sarah Gerson and Amanda Woodward
16. A Neo-constructivist Approach to the Emergence of a Face Processing System
Francesca Simion and Irene Leo

VI. The Big Picture
17. A Bottom-up Approach to Infant Perception and Cognition: A Summary of Evidence and Discussion of Issues
Leslie B. Cohen
