# Table of Contents

## Introduction: Autism Turns 65: A Neurologist's Bird's Eye View
Isabelle Rapin

## Section I: Historical perspective, diagnosis and classification, and epidemiology

1. Autism Spectrum Disorders: Looking Backward and Looking Forward
   Michael Rutter

2. Diagnosis of Autism Spectrum Disorders
   Katherine Gotham, Somer L. Bishop, and Catherine Lord

3. Asperger's Syndrome: From Asperger to Modern Day
   Ami Klin

4. Regression and Other Patterns of Onset
   Sally Cunnot, Kelli Neung, and Megan Thompson

5. Screening, Risk, and Early Identification of Autism Spectrum Disorders
   Roy Richard Grinker, Marshalyn Yeargin-Allsopp, and Coleen Boyle

6. Epileptology of Pervasive Developmental Disorders
   Patrick Bolton

## Section II: Core features and developmental trajectories

8. The Social Behavior of Autism: A Parallel and Distributed Information Processing Perspective
   Peter Mundy

9. Language and Communication in Autism Spectrum Disorders
   Helen Tager-Flusberg, Lisa Edelson, and Rhiannon Luyster

10. Cognitive and Neural Correlates of Language in Autism
    Wouter B. Groen and Jan K. Buitelaar

11. Repetitive Behaviors in Individuals with Autism Spectrum Disorders
    James W. Bodfish

12. Developmental Features and Trajectories Associated with Autism Spectrum Disorders in Infants and Toddlers
    Rebecca J. Landa

13. Development from Preschool through School Age
    Tony Charman

14. Adolescents and Adults with Autism Spectrum Disorders
    Marsha Mailick Seltzer, Jan S. Greenberg, Leann Smith, Gail I. Ormond, Anna Esbensen, and Jinkuk Hong

## Section III: Psychiatric and medical co-morbidities

15. Intellectual Disabilities and Autism Spectrum Disorder: A Cautionary Note
    Elisabeth M. Dykens and Miriam Lense

16. Obsessive Compulsive Disorders
    Bonnie P. Taylor and Eric Hollander

17. Interface between Autism Spectrum Disorders and Obsessive-Compulsive Behaviors: A Genetic and Developmental Perspective
    Suma Jacob, Angel Landers-Weisenberger, and James F. Leckman

18. Attention-Deficit/Hyperactivity Disorder (ADHD)
    Angela M. Reiersen and Richard D. Todd

19. Specific Language Impairment
    J. Bruce Tomblin, Karla McGovern, and Allison Bean

20. Anxiety and Mood Disorders in Individuals with Autism Spectrum Disorder
    Peter Szatmari and Beth McConnell

21. Stereotypy and Self-Injury
    Lindsey Sterlino, Annie McLaughlin, and Bryan R. King

22. Motor Functioning and Dyspraxia in Autism Spectrum Disorders
    Matthew W. Mosconi, Yukari Takakura, and John A. Zemore

23. Epilepsy and Electroencephalography in Autism Spectrum Disorders
    Roberto Tuchman

24. The Immune System, Autoimmunity, Allergy, and Autism Spectrum Disorders
    Paula Gbione, Andrew Zimmermann, Paul Ashwood, and Judy Van de Water

25. Gastrointestinal Problems in Individuals with Autism Spectrum Disorders
    Timothy Buie

26. Sleep Problems
    Anne E. Porter and Daniel G. Glaze

## Section IV: Broader autism phenotype

27. The Broad Autism Phenotype
    Molly Losh, Ralph Adolphs, and Joseph Piven

28. The Biological Broader Autism Phenotype
    Janet E. Lainhart and Nicholas Lange

29. Autism as a Quantitative Trait
    John N. Constantino

## Section V: Neurobiology

30. Developmental Neurobiology of Autism Spectrum Disorders
    John L. R. Rubenstein

31. Neuropathology of Autism Spectrum Disorders: Postmortem Studies
    Cynthia M. Schumann, Steven C. Noctor, and David G. Amaral

32. Neurotransmitters
    Diane C. Chuang

33. Brain Chemistry: Magnetic Resonance Spectroscopy
    Stephen R. Dager, Neva M. Corrigan, Todd Richards, and Dennis Shaw

34. Oxytocin, Vasopressin, and Social Behavior: Implications for Autism Spectrum Disorders
    Meera E. Modi and Barry J. Young

35. From Toddlers to Adults: The Changing Landscape of the Brain in Autism
    Eric Courchesne, Sara Jane Webb, and Cyndi Schumann

36. Autism as a Developmental Neurobiological Disorder: New Insights from Functional Neuroimaging
    Nancy J. Minshew, K. Suzanne Scherf, Marlene Behrmann, and Katherine Humphreys

37. Electrophysiological Research on Autism
    Sara Jane Webb, Raphael Bernier, Karen Burner, and Michael M. Orvaschel

## Commentary: Toward a Neurobiology of Autism by Pat Levitt
Commentary: Autism Genetics and Genomics: A Brief Overview and Synthesis by Daniel H. Geschwind

Section VII: Etiology: Environmental factors

47. Environmental Risk Factors in Autism: Results from Large-Scale Epidemiologic Studies
Irva Hertz-Picciotto

48. Environmental Exposures that Increase the Risk of Autism Spectrum Disorders
Patricia M. Rodier

49. Autism and Environmental Genomics: Synergistic Systems Approaches to Autism Complexity
Mark A. Corrales and Martha R. Herbert

Section VIII: Animal models and theoretical perspectives

50. Zebrafish as a Tool to Study Autism
Alicia Blaker, Gianluca DeRienzo, and Hazel Sive

51. Behavioral Evaluation of Genetic Mouse Models of Autism
Mu Yang, Maria Luisa Scottori, Kathryn R. Chadman, Jill L. Silverman, and Jacqueline N. Crawley

52. Modeling Features of Autism in Rodents
Elaine Hsiao, Catherine Bregere, Natalia Malkova, and Paul H. Patterson

53. Nonhuman Primate Models of Autism
Melissa D. Bauman and David G. Amaral

54. Autism as a Disorder of Functional Brain Activity
Rajesh K. Kana and Marcel Adam Just

55. The Extreme Male Brain Theory of Autism: The Role of Fetal Androgens
Simon Baron-Cohen, Bonnie Auyeung, Emma Ashwin, and Rebecca Knickmeyer

56. The Mirror Neuron System and Imitation
Marco Iacoboni

57. Information Processing and Integration
Keith J. Yoder and Matthew K. Belmonte

Commentary: Translation between Different Types of Model by Francesca Happé

Section IX: Treatment approaches

58. Applied Behavior Analysis and Early Intensive Behavioral Intervention
Tristram Smith

59. Naturalistic Approaches to Early Behavioral Intervention
Laure Schreibman and Brooke Ingersoll

60. Relationship-Based Early Intervention Approach to Autistic Spectrum Disorders: The DIR Model
Stanley I. Greenspan and Serena Wieder

61. Intervention for Infants and Toddlers with Autism Spectrum Disorders
Sally J. Rogers and Katherine Wallace

62. Relationships, Independence, and Communication in Autism and Asperger’s Disorder
Lynn Kern Koegel, Rosy M. Fredeen, Robert L. Koegel, and C. Enjey Lin

63. Occupational Therapy
Linn Wakeford and Grace T. Baranek

64. Augmentative and Alternative Communication Systems
Mary Ann Iriarte, Alissa L. Greenberg, and Gina T. Chang

65. Positive Behavior Support and Problem Behavior
Edward G. Carr

66. Social Skills Interventions for Children with Autism Spectrum Disorders
Connie Kasari and Jill Locke

67. Adolescent Transition to Adulthood and Vocational Issues
Robin Gabriels

68. Family Adaptive Functioning in Autism
Annette Estes, Vanessa Hus, and Lauren Elder

69. Psychopharmacological Treatment of Autism
Karen Blackenship, Craig A. Erickson, Kimberly A. Stigler, David J. Posey, and Christopher J. McDougle

70. Autism Spectrum Disorders: Identification and Implications of Associated Medical Conditions
Margaret L. Bauman

71. Dietary, Complementary, and Alternative Therapies
Susan L. Hyman and Susan E. Levy

72. The mGluR Theory of Fragile X Syndrome
Dilja D. Krueger and Mark F. Bear

Commentary: Future Directions in the Treatment of Autism Spectrum Disorders by Evdokia Anagnostou, Mark F. Bear, and Geraldine Dawson

Section X: Best practices in the diagnosis and treatment of autism

73. Best Practices: Early Diagnosis and Psychological Assessment
Zachary Warren and Wendy L. Stone

74. Diagnosis and Assessment of Autism Spectrum Disorders: A Medical Perspective
Daniel L. Coury

75. Best Practice, Policy, and Future Directions: Behavioral and Psychosocial Interventions
Kara Rue and Samuel L. Cohen

76. Pharmacotherapy for Autism Spectrum Disorders
James T. McCracken

77. Best Practices: Pediatrics
Mary Catherine Aranda and Susan E. Levy

Commentary: Bioethical Considerations in Autism Research and Translation: Present and Future by Holly K. Tabor

Section XI: Public policy

78. The Economic Costs of Autism: A Review
Djesika Amendah, Scott D. Grosse, Georgia Peacock, and David S. Mandell

79. Future Directions: Setting Priorities to Guide the Federal Research Effort
Thomas Insel and Susan A. Daniels

80. “To Petition the Government for a Redress of Grievances”: Introduction
Peter R. Beil and Craig Snyder

81. Top Priorities for Autism: Asperger’s Research: Perspectives from a Person with Autism
Temple Grandin

Commentary: Biocultural Considerations in Autism Research and Translation: Present and Future by Holly K. Tabor

Section XII: Public policy
