Table of Contents

Section A - Historical Context
1. Neuropsychology: past, present and future, Marshal & Gurd

Section B - Methodological Issues
2. Basic concepts and principles of neuropsychological assessment, Evans
3. Methodological and statistical foundations of neuropsychological assessment, Willmes
4. Principles of cognitive rehabilitation, Anderson et al

Section C - Neuropsychological Processes and Impairments
5. Assessment of attention, van Zomeren & Spikman
6. The rehabilitation of attention, Manly & Robertson
7. The assessment of perceptual disorders, Kartsounis
8. Recovery and treatment of sensory-perceptual disorders, Kerkhoff
9. The neuropsychological assessment of learning and memory disorders, Bradley & Kapur
10. The natural recovery and treatment of learning and memory disorders, Wilson
11. The assessment and treatment of disorders of visuospatial, imaginal and constructional processes, Manning
12. Assessment of disorders of body awareness and representation, Semenza
13. The assessment of acquired spoken language disorders, Wallesch et al
14. The treatment of spoken language disorders, Marshall
15. Neuropsychological assessment and treatment of disorders of reading, Hanley & Kay
16. Neuropsychological assessment of rehabilitation of writing disorders, Beeson & Rapcsak
17. Assessment of executive function, Burgess
18. The natural recovery and treatment of executive disorders, Worthington
19. The assessment and treatment of disorders of voluntary movement, Goldenberg
20. The assessment and treatment of calculation disorders, van Harskamp & Cipolotti
21. The assessment and treatment of emotional disorders, Gainotti
22. The assessment of rehabilitation of anosognosia and syndromes of impaired awareness, Prigatano

Section D - Developmental and Paediatric Neuropsychology
23. Neuropsychological assessment of developmental disorders, Temple
24. The treatment and rehabilitation of paediatric/developmental neuropsychological disorders, Whitfield

Section E - Neuropsychopharmacology
25. Neuropsychopharmacology, Bradshaw

Section F - Clinical Disorders
26. Neuropsychology of vascular disorders, Skilbeck
27. The presentation and treatment of head injury and traumatic brain damage, King & Tyerman
28. The assessment of Alzheimer's disease and other neuropsychological disorders, Morris & Worsley
29. The neuropsychological presentation and treatment of demyelinating disorders, Arnett
30. The neuropsychology of infectious and inflammatory brain disorders, Boller & Suarez
31. The neuropsychology of endocrine disorders, Brander
32. The neuropsychological assessment and treatment of epilepsy, Thompson

Section G - Neuropsychiatric Conditions
33. Clinical presentation of neuropsychiatric disorders, O'Carroll
34. Clinical assessment of neuropsychiatric disorders, Dahlitz et al
35. Neuropsychological rehabilitation of schizophrenia, Rund
36. Treatment and rehabilitation of neuropsychiatric disorders, Goldstein

Section H - Forensic Neuropsychology
37. Forensic neuropsychology, McKinlay & Galsworthy

Section I - Functional Neuroanatomy
38. The functional neuroanatomy of attention, perception and spatial processes, Bottini & Paulesu
39. The functional neuroanatomy of learning and memory, Markowitsch
40. The functional neuroanatomy of language disorders, Bartels & Wallesch
41. The functional neuroanatomy of executive processes, Puster

Section J - Appendix
42. Clinical and laboratory investigations, Kischka
43. Describing neuropsychological deficits within the WHO ICIDH-2 model of illness, Wade
44. The Internet for clinical neuropsychologists, Bell
