Associative Learning and Conditioning Theory: Human and Non-Human Applications

Schachtman, Todd R.

Table of Contents

Table of Contents

Section I: Overview

Things you always wanted to know about conditioning, but were afraid to ask
Todd R. Schachtman and Steve Reilly

Section II: Applications to Clinical Pathology

Fear extinction and emotional processing theory: A critical review
Seth J. Gillihan and Edna Foa

Fear Conditioning and Attention to Threat: An Integrative Approach to Understanding the Etiology of Anxiety Disorders
Katherine Oehlberg and Susan Mineka

Behavioral techniques to reduce relapse after exposure therapy: Applications of studies of experimental extinction
Mario A. Laborda, Bridget L. McConnell, and Ralph R. Miller

Learning and anxiety
Peter F. Lovibond

Trauma, learned helplessness, its neuroscience and implication for PTSD
Vincent M. LoLordo and J. Bruce Overmier

Abberant attentional processes in schizophrenia as reflected in latent inhibition data
Robert E. Lubow

Discrimination learning process in autism: spectrum disorders: A comparator theory
Phil Reed

Section III: Applications to Health and Addiction

Conditioned immunomodulation
Jennifer L. Szczytkowski and Donald T. Lysle

Learning, expectancy and conditioning: Human and animal applications
M. Vogel-Sprott and Mark T. Fillmore

Applications of Contemporary Learning Theory in the Treatment of Drug Abuse
Danielle E. McCarthy, Timothy B. Baker, Haruka Minami, and Vivian Yeh

Internal stimuli generated by abused substances: Role of Pavlovian conditioning and its implications for drug addiction
Rick A. Bevins and Jennifer E. Murray

Learning to eat: The influence of food cues on what, when and how much we eat
Janet Polivy, C. Peter Herman, and Laura Girz

Conditional analgesia, negative feedback & error correction
Moriel Zeilikowsky and Michael S. Fanselow

Incentives in the modification and cessation of cigarette smoking
Edwin B. Fisher, Leonard Green, Amanda L. Calvert, & Russell E. Glasgow

Section IV: Applications to Cognition, Social Interaction and Motivation

Social learning and connectionism
Frank Van Overwalle
Application of associative learning paradigms to clinically relevant individual differences in cognitive processing
Teresa A. Treat, John L. Kruschke, Richard J. Viken, and Richard M. McFall

A review of procedural knowledge about the mental process models of evaluative conditioning
Jan De Houwer

Instrumental and Pavlovian Conditioning Analogues of Familiar Social Processes
Robert Ervín Cramer and Robert Frank Weiss

The impact of social cognition on emotional learning from and about others: A neurobiological perspective
Andreas Olsson

Conditioning and marketing
Todd R. Schachtman, Jennifer Walker and Stephanie Wade

Applications of Pavlovian conditioning to sexual behavior and reproduction
Michael Domjan and Chana K. Akins

Hot and bothered: Classical conditioning of sexual incentives in humans
Heather Hoffman
