Table of Contents

Chapter 1: Some Basic Pharmacology

What Is A Drug?
Names of Drugs
Describing Dosages
Potency and Effectiveness
Primary Effects And Side Effects
Drug Interactions
Pharmacokinetics
Inhalation
Oral Administration
Transdermal Administration
Distribution of Drugs
Elimination
Combining Absorption and Excretion Functions
The Therapeutic Window

Chapter 2: Behavioral Analysis of Drug Effects

History of Behavioral Pharmacology
Research Design
Measuring Unconditioned Behavior of Nonhumans
Measuring Conditioned Behavior of Nonhumans
Measuring Behavior of Humans
Development and Testing of Psychotherapeutic Drugs

Chapter 3: How We Adapt To Drugs? Tolerance, Sensitization, and Expectation

Tolerance
Withdrawal
Conditioning of Drug Effects
Sensitization
Expectancy and Context

Chapter 4: Neurophysiology, Neurotransmitters, and the Nervous System

The Neuron
The Synapse
The Nervous System
Development Of The Nervous System and Potential For Disruption
Neurotransmitters
Brain Imaging of Drug Effects

Chapter 5: Substance Use and Addictive Disorders

Defining Addiction
History of Research on Drug Use and Addiction
Addiction as Physical Dependence
Modern Behavioral Explanations of Drug Use
The Neuroanatomy of Motivation and Reinforcement
What Happens During Addiction?
Incentive Sensitization Theory
Chapter 6: Alcohol

Source of Alcohol
Origin and History
Measuring Alcohol Levels in The Body
Route of Administration and Pharmacokinetics
Absorption
Distribution
Elimination
Neuropharmacology
Alcohol Antagonists
Effects of Alcohol
Effects on Human Behavior and Performance
Effects on the Behavior of Nonhumans
Discriminative Stimulus Properties
Tolerance
Withdrawal
Self-Administration in Nonhumans
Self-Administration in Humans
Alcoholism
Harmful Effects of an Acute Administration
Harmful Effects of Chronic Consumption
Benefits of Alcohol Consumption
Treatments

Chapter 7: Anxiolytics and sedative-hypnotics

The Nature and Neurophysiology of Anxiety
Introduction to Anxiolytics and Sedative-Hypnotics
History of Anxiolytic and Sedative-Hypnotic Drug Development
Neurophysiology
Route of Administration and Absorption
Distribution and Excretion
Effects on the Body
Effects on the Behavior and Performance of Humans
Effects on Performance
Effects on the Behavior of Nonhumans
Discriminative Stimulus Properties
Tolerance
Withdrawal
Self-Administration in Humans
Self-Administration in Nonhumans
Harmful Effects
Treatment

Chapter 8: Tobacco and Nicotine

Preparations
Route of Administration
Distribution
Excretion
Neurophysiology
Effects of Nicotine
Effects on the Behavior and Performance of Humans
Effects on the Behavior of Nonhumans
Drug State Discrimination
Self-Administration in Humans
Harmful Effects
Treatments
Chapter 9: Caffeine and the Methylxanthines

Sources of Methylxanthines
History of Methylxanthine Use
Extent of Methylxanthine Use
Route of Administration
Absorption
Distribution
Excretion
Neurophysiology
Effects of Caffeine and the Methylxanthines
Discriminative Stimulus Properties
Withdrawal
Self-Administration in Nonhumans
Self-Administration in Humans
Harmful Effects
Beneficial Effects
Epilogue

Chapter 10: Psychomotor Stimulants

Sources
History
Routes of Administration and Absorption
Distribution
Excretion
Neurophysiology
Effects of Psychomotor Stimulants
Effects on the Behavior and Performance Of Humans
Effects on the Behavior of Nonhumans
Dissociation and Drug State Discrimination
Tolerance
Withdrawal
Self-Administration in Humans
Harmful Effects
Treatment

Chapter 11: Opioids

Origins and Sources of Opioids
History
Routes of Administration
Distribution
Excretion
Neurophysiology
Effects of Opioids
Effects on Human Behavior and Performance
Effects on the Behavior of Nonhumans
Drug State Discrimination
Tolerance
Self-Administration in Humans
Self-Administration in Nonhumans
Harmful Effects
Pharmacological Treatment of Opioid Addiction

Chapter 12: Antipsychotic Drugs

The Nature of Schizophrenia
Theories of Schizophrenia
Discovery of Antipsychotic Medications
Comparing Typical and Atypical Antipsychotics
Routes of Administration
Absorption and Distribution
Excretion
Effects of Antipsychotics
Effects on the Behavior and Performance of Humans
Effects on the Behavior of Nonhumans
Drug State Discrimination and Dissociation
Tolerance
Withdrawal
Self-Administration in Humans and Nonhumans
Harmful Effects
Other Therapeutic Effects of Antipsychotic Drugs

Chapter 13: Antidepressants

The Nature of Depression
Theories of Depression
History of Antidepressant Medications
Neurophysiology
Absorption
Distribution
Excretion
Effects of Antidepressants
Effects on the Behavior and Performance of Humans
Effects on the Behavior of Nonhumans
Discriminative Stimulus Properties
Tolerance
Withdrawal
Self-Administration in Humans and Nonhumans
Harmful Effects
Other Treatments for Depression

Chapter 14: Cannabis

History
The Cannabinoids
Absorption
Distribution
Excretion
Neuropharmacology
Effects of Cannabis
Effects on Behavior and Performance Of Humans
Effects on the Behavior Of Nonhumans
Dissociation
Drug State Discrimination
Tolerance
Withdrawal
Self-Administration in Humans and Nonhumans
Epidemiology
Harmful Effects

Chapter 15: Hallucinogens, Phantasticants, and Club Drugs

LSD and the Monoamine-Like Drugs
Ecstasy and Synthetic Mescaline-Like Drugs
Salvia
Dissociative Anesthetics: Phencyclidine and Ketamine
Dextromethorphan
HB
Mephedrone
