Table of Contents

Chapter 1: General Overview of the Chiropractic Profession
  The Past
  The Present
  The Future
  Conclusions

Chapter 2: Joint Anatomy and Basic Biomechanics
  Fundamental Concepts, Principles, and Terms
  Joint Function
  Mechanical Forces Acting on Connective Tissue
  Properties of Connective Tissue
  Models of Spine Function

Chapter 3: Joint Assessment Principles and Procedures
  The Manipulable Lesion
  Subluxation
  Vertebral Subluxation Complex
  Joint Subluxation/Dysfunction Syndrome
  Spinal Listings
  Clinical Evaluation of Joint Subluxation/Dysfunction Syndrome
  Clinical Documentation

Chapter 4: Principles of Adjustive Technique
  Classification and Definition of Manual Therapies
  Joint Manipulative Procedures
  Soft Tissue Manipulative Procedures
  Indications for Adjustive Therapy
  Mechanical Spine Pain
  Joint Subluxation/Dysfunction Syndromes
  Contraindications to and Complications of Adjustive Therapy
  Effects of Adjustive Therapy
  Application of Adjustive Therapy

Chapter 5: The Spine: Anatomy, Biomechanics, Assessment and Adjustive Techniques
  Structure and Function of the Spine
  Evaluation of Spinal Joint Function
  Cervical Spine
  Adjustments of the Cervical Spine
Chapter 5: The Spine

Thoracic Spine

Adjustments of the Thoracic Spine and Rib Cage

Lumbar Spine

Adjustments of the Lumbar Spine

Pelvic Joints

Adjustments of the Pelvis

Chapter 6: Extrapinal Techniques

Role of the Peripheral Joints

Temporomandibular Joint

Shoulder

Elbow

Wrist and Hand

Hip

Knee

Ankle and Foot

Chapter 7: Nonthrust Procedures: Mobilization, Traction, and Soft Tissue Techniques

Joint Mobilization

Manual Traction-Distraction

McKenzie Method

Cranial Manipulation

Soft Tissue Manipulation

Conclusions  Glossary

Appendices

1: Named Chiropractic Techniques

2: Reliability Studies

3: Citation Synopsis
