Table of Contents

Section 1. General Principles
1. What is pharmacology?
2. How drugs act: general principles
3. How drugs act: molecular aspects
4. Cellular mechanisms: excitation, contraction and secretion
5. Cellular mechanisms: cell proliferation and apoptosis
6. Method and measurement in pharmacology
7. Absorption and distribution of drugs
8. Drug elimination and pharmacokinetics

Section 2. Chemical Mediators
9. Chemical mediators and the autonomic nervous system
10. Cholinergic transmission
11. Noradrenergic transmission
12. Other peripheral mediators: 5-hydroxytryptamine and purines
13. Peptides and proteins as mediators
14. Nitric oxide
15. Local hormones, inflammation and immune reactions
16. Anti-inflammatory and immunosuppressant drugs

Section 3. Drugs Affecting Major Organ Systems
17. The heart
18. The vascular system
19. Atherosclerosis and lipoprotein metabolism
20. Haemostasis and thrombosis
21. The haemopoietic system
22. The respiratory system
23. The kidney
24. The gastrointestinal tract
25. The endocrine pancreas and the control of blood glucose
26. Obesity
27. The pituitary and adrenal cortex
28. The thyroid
29. The reproductive system
30. Bone metabolism

Section 4. The Nervous System
31. Chemical transmission and drug action in the central nervous system
32. Amino acid transmitters
33. Other transmitters and modulators
34. Neurodegenerative disorders
35. General anaesthetic agents
36. Anxiolytic and hypnotic drugs
37. Antipsychotic drugs
38. Drugs used in affective disorders
39. Antiepileptic drugs
40. Analgesic drugs
41. CNS stimulants and psychotomimetic drugs
42. Drug dependence and drug abuse
43. Local anaesthetics

Section 5. Drugs Used in the Treatment of Infections and Cancer
44. Basic principles of chemotherapy
45. Antibacterial drugs
46. Antiviral drugs
47. Antiprotozoal drugs
48. Anthelminthic drugs
49. Cancer chemotherapy

Section 6. Special Topics
51. Individual variation and drug interaction
52. Unwanted effects and drug toxicity
53. Lifestyle and non-medical uses of drugs
54. Gene therapy
55. Drug discovery and development

Appendix
