Susceptibility Weighted Imaging in MRI: Basic Concepts and Clinical Applications

Haacke, E. Mark

Table of Contents

1 Introduction to Susceptibility Weighted Imaging.
2 Magnetic Susceptibility.
3 Gradient Echo Imaging.
4 Phase and its relationship to imaging parameters and susceptibility.
5 Understanding $T_2^*$ Related Signal Loss.
6 Processing concepts and SWI filtered phase images.
7 MR Angiography and Venography of the Brain.
8 Brain Anatomy with Phase.

CLINICAL CHAPTERS.

9 SWI Venographic Anatomy of the Cerebrum.
10 Novel Approaches to Imaging Brain Tumors.
11 Traumatic Brain Injury.
12 Imaging cerebral microbleeds with SWI.
13 Imaging Ischemic Stroke and Hemorrhage with SWI.
14 Visualizing Deep Medullary Veins with SWI in Newborn and Young Infants.
15 Susceptible Weighted Imaging in Multiple Sclerosis .
16 Cerebral Venous Diseases and Occult Intracranial Vascular Malformations.
17 Sturge-Weber syndrome.
18 Visualizing the Vessel Wall using Susceptibility Weight Imaging.
19 Imaging Breast Calcifications Using SWI.
20 Susceptibility Weighted Imaging at Ultra-High Magnetic Fields.

ADVANCED TOPICS.

21 Improved Contrast in MR Imaging of the Midbrain using SWI.
22 Measuring Iron Content with Phase.
23 Validation of phase iron detection with Synchroton X-ray Fluorescence.
24 Rapid Calculation of Magnetic Field Perturbations from Biological Tissue in Magnetic Resonance Imaging.
25 SWIM: Susceptibility Mapping as a means to Visualize Veins and Quantify oxygen Saturation.
27 Oxygen Quantification: Saturation.
28 Quantification of Oxygen saturation on Single Cerebral Veins, the blood capillary network and it’s dependency on Perfusion.
29 Integrating Perfusion Weighted Imaging, M R Angiography and Susceptibility Weighted Imaging.
30 Functional Susceptibility Weighted Magnetic Resonance Imaging.
31 Complex Threshold Methods for Eliminating Voxels that contain predominantly Noise in Magnetic Resonance Imaging.
32 Automated Vein Segmentation and Lesion detection: from SWI-MIPS to MR Venograms.
33 Rapid Acquisition Methods.
34 High resolution venographic BOLD MRI of animal brain at 9.4 T: Implications for BOLD fMRI.
35 Susceptibility Weighted Imaging in Rodent Animals.
36 Ultra Short TE Spectroscopic Imaging: Evaluation of Short T2 tissues in the Musculoskeletal (MSK) System.
