Educated Brain: Essays in Neuroeducation

Battro, Antonio M.

Table of Contents

Foreword: towards a new pedagogic and didactic approach Rita Levi-Montalcini
2. Historical considerations on brain and self Fernando Vidal
3. Building bridges in neuroeducation John T. Bruer
4. Mind, brain, and consciousness Jürgen Mittelstrass
5. Understanding mind, brain, and education as a complex, dynamic developing system: measurement, modeling, and research Paul van Geert and Henderien Steenbeek
7. Chronoeducation: how the biological clock influences the learning process Daniel P. Cardinali
8. Dynamic cycles of cognitive and brain development: measuring growth in mind, brain, and education Kurt W. Fischer
9. Brain mechanisms and learning of high level skills Michael I. Posner, Mary K. Rothbart and M. Rosario Rueda
10. Developing the brain: a functional imaging approach to learning and educational sciences Hideaki Koizumi
12. Reading and the brain: a cross-language approach Usha Goswami
13. Cortical images of early language and phonological development using near infrared spectroscopy Laura-Ann Petitto
14. Cerebral constraints in reading and arithmetic: education as a 'neural recycling' process Stanislas Dehaene.
