Adapted Aquatics Programming: A Professional Guide

Lepore, Monica EdD

Table of Contents

Preface
Acknowledgments

Part I. Foundations of Adapted Aquatics

Chapter 1. Introduction to Adapted Aquatics
Evolution of Adapted Aquatics
Legislation for Individuals With Disabilities
Benefits of Aquatics Participation
Applications of Aquatics Participation
Summary
Chapter 1 Review

Chapter 2. Models of Collaboration in Adapted Aquatics
Models for Adapted Aquatics
Medical-Therapeutic Model
Educational Model
Recreation Model
Transdisciplinary Model
Summary
Chapter 2 Review

Chapter 3. Inclusion and the Least-Restrictive Environment
Placement, Inclusion, and the LRE
Continuum of Placements
Prerequisites to Successful Inclusion
Developing and Maintaining Successful Inclusion Groups
Using Activities to Facilitate Inclusion
Summary
Chapter 3 Review

Chapter 4. Individualized Instructional Planning
Planning for Assessment
Developing the IEP or IAPP
Implementing the IEP or IAPP
Summary
Chapter 4 Review

Chapter 5. Program and Organization Development
Organizational Foundations
Communications and Promotion
Financial Development
Facilities Acquisition
Risk Management
Program Development and Evaluation
Human Resource Management
Summary
Chapter 5 Review

Chapter 6. Facilities, Equipment, and Supplies
Facilities
Equipment and Supplies
Summary
Chapter 6 Review

Part II. Facilitating Instruction

Chapter 7. Prerequisites to Safe, Successful, and Rewarding Programs
Essential Communication Skills
Transferring Techniques
Participant Care and Safety
Hydrodynamics
Positioning and Supporting Participants
Summary
Chapter 7 Review

Chapter 8. Instructional Strategies
The Learning Process
Teaching, Facilitating, and Guiding Participants
Addressing Problem Behaviors
Summary
Chapter 8 Review

Chapter 9. Specific Needs of Adapted Aquatics Participants
Definitions of Common Disabilities in Adapted Aquatics
Commonly Seen Attributes of Learners in Adapted Aquatics
Atlantoaxial Instability
Attention Deficit
Auditory Perception Disorder
Autonomic Dysreflexia or Hyperreflexia
Balance Disorder
Brittle Bones
Cardiovascular Disorder
Circulatory Disorder
Contractures and Limitations to Range of Motion
Hearing Loss: Deafness and Hard of Hearing
Hearing Loss: Deafblindness
Head Control Difficulty
High Muscle Tone
Hyperactivity
Interaction Difficulty
Joint Dysfunction
Kinesthetic System Disorder
Memory and Understanding Difficulty
Multisensory Loss
Oral Motor Dysfunction
Paralysis, Paresis, and Atrophy
Posture Disorder
Primitive Reflex Retention
Proprioceptive Disorder
Range of Motion Dysfunction
Receptive or Expressive Language Disorder
Respiratory Disorder
Seizure Disorder
Tactile System Disorder
Temperature Regulation Disorder
Vestibular System Disorder
Visual Impairment
Visual Perception Disorder
Summary
Chapter 9 Review

Chapter 10. Aquatic Fitness and Rehabilitation
Health-Related Physical Fitness and Aquatic Exercise
Physical Conditions and Tips for Aquatic Rehabilitation
Summary
Chapter 10 Review

Part III. Program Enhancement

Chapter 11. Adapted Aquatics Program Selection
Program Environments
Program Purpose
Types of Participation
Nationally Sponsored Adapted Aquatics Programs
Summary
Chapter 11 Review

Chapter 12. Competitive and Recreational Activities
Effect of Legislation on Aquatics Participation
Competitive Swimming for Individuals With Disabilities
Equitable Competition and Classification
Coaching Swimmers With Disabilities
