Fitness Professional's Handbook

Howley, Edward T. PhD

Table of Contents

Preface

Part I. Activity, Fitness, and Health
Chapter 1. Physical Activity and Health
The Best of Times and Worst of Times for Physical Activity Professionals
Connections Between Physical Activity and Health
What We Know About Physical Activity, Fitness, and Health
Physical Activity and Prevention of Premature Health Problems
Implications for Fitness Professionals
What Is Necessary to Promote Physical Activity
Case Studies

Chapter 2. Physical Fitness and Performance
Physical Fitness Goals
Performance Goals
Components of Physical Fitness and Performance
Behaviors That Support Fitness and Performance Components
Common Behaviors for Fitness and Health
Setting Fitness Goals
Taking Control of Personal Health Status
Case Study

Chapter 3. Health Appraisal
Evaluating Health Status
Making Fitness Program
Case Studies

Part II. Evaluation of Fitness
Chapter 4. Energy Costs of Physical Activity
Ways to Measure Energy Expenditure
Ways to Express Energy Expenditure
Equations for Estimating the Energy Cost of Activities
Energy Requirements of Walking, Running, Cycle Ergometry, and Stepping
Energy Requirements of Other Activities
Case Studies

Chapter 5. Cardiorespiratory Fitness
Why Test Cardiorespiratory Fitness?
Risks of CRF Testing
Testing Sequence
Field Tests
Graded Exercise Tests
Common Variables Measured During a GXT
Procedures for Graded Exercise Testing
When to Use Submaximal and Maximal Tests
Case Studies
Appendix

Chapter 6. Body Composition
Health and Body Composition
Methods for Assessing Body Composition
Calculating Target Body Weight
Case Study

Chapter 7. Nutrition
Six Classes of Essential Nutrients
Assessing Dietary Intake
Recommendations for Dietary Intake
Diet, Exercise, and the Blood Lipid Profile
Nutrition for Physically Active Individuals
Female Athlete Triad
Case Study

Chapter 8. Assessment of Muscular Fitness
Preliminary Considerations
Muscular Strength
Local Muscular Endurance
Special Considerations: Older Adults
Special Considerations: Coronary Prone Clients
Considerations when evaluating strength in youth
Conclusions
Case Study

Chapter 9. Flexibility and Low Back Function
Factors Affecting ROM
ROM and Low Back Function
Measuring Spine and Hip-Joint ROM
Case Studies
Appendix

Part III. Exercise Prescription for Health and Fitness
Chapter 10. Exercise Prescription for Cardiorespiratory Fitness
Prescribing Exercise
Short- and Long-Term Responses to Exercise
Public Health Recommendations for Physical Activity
General Guidelines for CRF Programs
Formulating the Exercise Prescription
Determining Intensity
Exercise Recommendations for the Untested Masses
Exercise Programming for the Fit Population
Exercise Prescriptions Using Complete GXT Results
Program Selection
Environmental Concerns
Exercise and Cold Exposure
Effect of Air Pollution
Effect of Altitude
Case Studies

Chapter 11. Exercise Prescription for Weight Management
Increasing Prevalence of Obesity in the United States
Etiology of Obesity
Maintaining a Healthy Weight
Behavior Modification Techniques for Weight Loss and Maintenance
Gimmicks and Gadgets for Weight Loss
Disordered Eating Patterns
Strategies for Gaining Weight
Case Study

Chapter 12. Exercise Prescription for Muscular Strength and Endurance Training
Principles of Training
Considerations for Program Design
Types of Resistance Training
Modes of Resistance Training
Safety Issues
Resistance Training Guidelines
Overreaching and Overtraining
Resistance Training Systems
Resistance Training for Special Populations
Exercise Prescription Summary for Resistance Training
Case Studies
Appendix

Chapter 13. Exercise Prescription for Flexibility and Low Back Function
Anatomy of the Spine
Spinal Movement
Mechanics of the Spine and Hip Joint
Low Back Pain: A Repetitive Microtrauma Injury
Exercise Considerations: Preventive and Therapeutic
An Examination of Exercises That Involve Muscles of the Spine
An Examination of Exercises That Involve the Muscles of the Abdominal Wall
Prophylactic Exercises for Enhancing Low Back Function
Case Studies
Appendix

Chapter 14. Exercise Leadership for Health and Fitness
Effective Leadership
Progression of Activities
Walk, Jog, Run Programs
Games
Aquatic Activities
Exercising to Music
Exercise Equipment
Circuit Training
Case Studies

Part IV. Special Populations
Chapter 15. Exercise and Children and Youth
Response to Exercise
Special Considerations
Testing
Recommendations for Physical Activity
Case Studies

Chapter 16. Exercise and Older Adults
Overview
Effects of Aging on Fitness
Special Considerations Regarding Exercise Testing
Exercise Prescription
Epilogue
Case Study

Chapter 17. Exercise and Women's Health
Pregnancy and Exercise
Osteoporosis
Female Athlete Triad
Case Study

Chapter 18. Exercise and Coronary Heart Disease
Atherosclerosis
Populations in Cardiac Rehabilitation Programs
Evidence That Exercise Training Plays a Role
Special Diagnostic Tests to Detect CHD
Typical Exercise Prescription
Case Studies

Chapter 19. Exercise and Obesity
Potential Causes
Role of Physical Activity in Prevention and Treatment of Obesity
Special Medical Screening
Exercise Prescription
Case Study

Chapter 20. Exercise and Diabetes
Overview
Comparison of Type 1 and Type 2 Diabetes
Importance of Exercise for Diabetic Clients
Screening and Testing Diabetic Clients
Exercise Prescription
Case Study

Chapter 21. Exercise, Asthma, and Pulmonary Disease
Chronic Obstructive Pulmonary Diseases
Restrictive Lung Diseases
Evidence That Exercise Plays a Role
Testing and Evaluation
Typical Exercise Prescription in Pulmonary Diseases
Medications for Pulmonary Diseases
Case Studies

Part V. Exercise Programming
Chapter 22. Behavior Modification
Transtheoretical Model of Behavior Change
Promoting Exercise: Targeting Precontemplators and Contemplators
Enhancing Adherence: Methods of Behavior Change for Participants in the Action and Maintenance Stages
Relapse Prevention
Health Fitness Counseling
Case Studies

Chapter 23. Mindful Exercise for Fitness Professionals
Introduction and Key Features of Mindful Exercise
Origins
Yoga
Qigong Exercise and Tai Chi
Contemporary Mindful Exercise Programs
Mindful Exercise Outcome Indicators and Benefits
Final Word
Case Study

Chapter 24. Exercise Related to ECG and Medications
Understanding the Structure of the Heart
Oxygen Use by the Heart
Electrophysiology of the Heart
Conduction System of the Heart
Basic Information for Interpreting the ECG
Cardiovascular Medications
Case Studies

Chapter 25. Injury Prevention and Treatment
Preventing Injuries
Injury Treatment
Environmental Concerns
Medical Concerns
Common Orthopedic Problems
CPR and Emergency Procedures
Rescue Breathing, CPR, and Use of the Automated External Defibrillator
Case Studies

Chapter 26. Program Administration/Management
Strategic Operating Planning
Managing and Evaluating Personnel
Developing a Successful Program
Safety and Legal Concerns
Developing a Budget
Equipment and Record Keeping
Quality Assessment Measures
Case Studies

Part VI. Scientific Foundations

Chapter 27. Functional Anatomy and Biomechanics
Understanding Skeletal Anatomy
Structure and Function of the Joints
Factors That Determine Direction and Range of Motion
Voluntary (Skeletal) Muscle
Tips for Exercising Muscle Groups and Some Common Exercise Mistakes
Muscle Group Involvement in Selected Activities
Basic Mechanical Concepts Related to Human Movement
Common Mechanical Errors During Locomotion, Throwing, and Striking
Case Studies

Chapter 28. Exercise Physiology
Relationship of Energy and Work
Understanding Muscle Structure and Function
Metabolic, Cardiovascular, and Respiratory Responses to Exercise
Graded Exercise Test
Effects of Endurance Training and Detraining on Physiological Responses to Exercise
Cardiovascular Responses to Exercise for Females and Males
Cardiovascular Responses to Isometric Exercise and Weightlifting
Regulating Body Temperature
Case Studies

Appendix A: Case Study Answers
Appendix B: Calculation of Oxygen Uptake and Carbon Dioxide Production
Appendix C: Energy Costs of Various Physical Activities
Appendix D: Medications and Their Effects
Appendix E: Evaluation of Fitness
