Table of Contents

**Part I: Framework**

*J. Larry Durstine, PhD, FACSM*

**Chapter 1. Introduction**

*Geoffrey E. Moore, MD, FACSM, Scott O. Roberts, PhD, FACSM, and J. Larry Durstine, PhD, FACSM*

Concept of Exercise Is Medicine
Evidence-Based Guidelines
How to Use This Book
Problem-Oriented Management
How to Use the Tables
How to Read the Tables
What's in the Tables
What's Not in the Tables

**Chapter 2. Approach to Exercise and Disease Management**

*Geoffrey E. Moore, MD, FACSM, J. Larry Durstine, PhD, FACSM, and Anthony P. Marsh, PhD*

Problem-Oriented Exercise Management
Categories of Exercise Tests Measures
Exercise and Medications
Exercise Dose–Response
Risk, Cost, and Benefit
Putting It All Together

**Chapter 3. Exercise Is Medicine**

*J. Larry Durstine, PhD, FACSM, J. Brent Peel, MS, Michael J. LaMonte, PhD, FACSM, Steven E. Keteyian, PhD, FACSM, Emma Fletcher, MA, and Geoffrey E. Moore, MD, FACSM*

Terminology
Epidemiology
Exercise and Cardiovascular Diseases
Biological Plausibility
Current and Future Priorities
Education for Exercise Professionals
Summary

**Chapter 4. Managing Exercise in Persons With Multiple Chronic Conditions**

*Geoffrey E. Moore, MD, FACSM, Patricia L. Painter, PhD, FACSM, G. William Lyerty, MS, and J. Larry Durstine, PhD, FACSM*

Overview of the Pathophysiology
Effects on the Exercise Response
Role of Exercise Training
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

**Chapter 5. Physical Activity for Children and Adolescents**

*William F. Riner, PhD, FACSM and Richard J. Sabath, EdD, FACSM*

Effects of Health Status and Physical Activity on Growth and Development
Normal Responses to Physical Activity in Children and Adolescents
Exercise Testing of Children and Adolescents
General Physical Activity Concerns for Children With a Chronic Health Condition or Disability
Selected Diseases and Disorders of Children and Youth
Summary

**Part II. Cardiovascular Diseases**

*Scott O. Roberts, PhD, FACSM and Peter H. Brubaker, PhD, FACSM*

**Chapter 6. Myocardial Infarction**

*Barry A. Franklin, PhD, FACSM*
Chapter 14. Hypertension

Neil F. Gordon, MD, PhD, MPH, FACSM

Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Chapter 15. Peripheral Arterial Disease

Christopher J. Womack, PhD, FACSM, Andrew W. Gardner, PhD, and Raha Nael, MD

Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Chapter 16. Aneurysms

Jonathan Myers, PhD, FACSM

Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Part III. Pulmonary Diseases

Christopher B. Cooper, MD, FACSM

Chapter 17. Chronic Obstructive Pulmonary Disease

Christopher B. Cooper, MD, FACSM

Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Chapter 18. Chronic Restrictive Pulmonary Disease

Connie C.W. Hsia, MD

Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Chapter 19. Asthma

Christopher J. Clark, MD and Lorna M. Cochrane, MD

Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

**Part V. Immunological and Hematological Disorders**
Geoffrey E. Moore, MD, FACSM and Michael J. LaMonte, PhD, FACSM

**Chapter 27.** Cancer
*Anna L. Schwartz, PhD, ARNP, FAAN*
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

**Chapter 28.** Acquired Immune Deficiency Syndrome (AIDS)
*Gregory A. Hand, PhD, FACSM, G. William Lyerly, MS, and Wesley D. Dudgeon, PhD*
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

**Chapter 29.** Abdominal Organ Transplant (Kidney, Liver, Pancreas)
*Patricia L. Painter, PhD, FACSM, Joanne B. Krasnoff, PhD*
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

**Chapter 30.** Chronic Fatigue Syndrome
*Stephen P. Bailey, PhD, PT, FACSM*
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

**Chapter 31.** Fibromyalgia
*Kathy Lemley and Barbara Meyer, PhD*
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

**Chapter 32.** Anemia
*Kirsten L. Johansen, MD*
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case study

**Chapter 33.** Bleeding and Clotting Disorders
Part VI. Orthopedic Diseases and Disabilities

Chapter 34. Arthritis
Marian A. Minor, PhD, PT and Donald R. Kay, MD

Chapter 35. Lower Back Pain Syndrome
Maureen J. Simmonds, PhD, PT, MCSP, and Tamar Dergazarian, PT

Chapter 36. Osteoporosis
Susan S. Smith, PhD, FACSM, Che-Hsiang Elizabeth Wang, PT, MS, and Susan A. Bloomfield, PhD, FACSM

Chapter 37. Lower-Limb Amputation
Kenneth H. Pitetti, PhD, FACSM and Mark H. Pedrotty, PhD

Part VII. Neuromuscular Disorders

Chapter 38. Stroke and Brain Injury
Karen Palmer-McLean, PhD, PT and Kimberly B. Harbst, PhD, PT

Chapter 39. Spinal Cord Disabilities: Paraplegia and Tetraplegia
Stephen F. Figoni, PhD, RKTL, FACSM
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 40. Muscular Dystrophy
Mark A. Tarnopolsky, MD, PhD
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 41. Epilepsy
Karl Otto Nakken, MD, PhD
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Chapter 42. Multiple Sclerosis
Kurt Jackson, PhD, PT, GCS, and Janet A. Mulcare, PhD, FACSM
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 43. Polio and Post-Polio Syndrome
Thomas J. Birk, PhD, MPT, FACSM
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 44. Amyotrophic Lateral Sclerosis
Vanina Dal Bello-Haas, PhD and Lisa Stroud Krivickas, MD
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 45. Cerebral Palsy
James J. Laskin, PhD, PT
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Chapter 46. Parkinson's Disease
Elizabeth J. Protas, PhD, PT, FACSM, Rhonda K. Stanley, PhD, PT, and Joseph Jankovic, MD
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Part VIII. Cognitive, Psychological, and Sensory Disorders
Lorraine E. Colson Bloomquist, EdD, FACSM

Chapter 47. Intellectual Disabilities
Patricia Fegan, PhD
Overview of the Pathophysiology
Effects on Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 48. Alzheimer's Disease
James H. Rimmer, PhD and Donald L. Smith, MS, RCEP
Overview of the Pathophysiology
Management and Medications
Effects on the Exercise Response and Exercise Training
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 49. Mental Illness
Gary S. Skirnar, PhD, FACSM and Dori S. Hutchinson, ScD
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study

Chapter 50. Stress and Anxiety Disorders
Gregory A. Hand, PhD, FACSM, Jason R. Jaggers, MS, and Wesley D. Dudgeon, PhD
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 51. Deaf and Hard of Hearing
M. Kathleen Ellis, PhD and Tracy Karasinski, MSW
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Special Considerations
Case Study

Chapter 52. Visual Impairment
Larry J. Leverenz, PhD, ATC
Overview of the Pathophysiology
Effects on the Exercise Response
Effects of Exercise Training
Management and Medications
Recommendations for Exercise Testing
Recommendations for Exercise Programming
Case Study
