# Table of Contents

## Section I. Cardiac Ultrasound
- Chapter 1 Physics of Ultrasound and Physics Behind the Knobs
- Chapter 2 Digital Echocardiography
- Chapter 3 Imaging Artifacts and Pitfalls
- Chapter 4 Optimizing Two-Dimensional Transesophageal Echocardiographic Imaging

## Section II. Intraoperative Examination
- Chapter 5 Surgical Anatomy of the Heart: Correlation with TEE Imaging Planes
- Chapter 6 Comprehensive and Abbreviated TEE Examination
- Chapter 7 Updated Indications for Intraoperative TEE
- Chapter 8 Organization of an Intraoperative ECHO Service: Personnel, Equipment, Maintenance, Safety, Infection, and Continuous Quality Improvement
- Chapter 9 Outcomes in Echocardiography: Statistical Considerations
- Chapter 10 Global Ventricular Function
- Chapter 11 Assessment of Global RV Function
- Chapter 12 Regional Ventricular Function Assessment
- Chapter 13 Assessment of Diastolic Function
- Chapter 14 Assessment of the Mitral Valve
- Chapter 15 Aortic Valve
- Chapter 16 Tricuspid and Pulmonic Valves
- Chapter 17 Assessment of the Thoracic Aorta
- Chapter 18 TEE and Doppler Evaluation of Prosthetic Valve Function and Dysfunction
- Chapter 19 Assessment of Cardiac Masses
- Chapter 20 Intraoperative Transesophageal Echocardiography for Congenital Heart Disease in the Adult Patient

## Section III. Critical Care
- Chapter 21 Perioperative Hypotension and Shock
- Chapter 22 Trauma
- Chapter 23 Hemodynamics in the ICU

## Section IV. Surgical Decision Making in Coronary Artery Disease
- Chapter 24 Perioperative Assessment of Myocardial Viability
- Chapter 25 Higher Risk Myocardial Revascularization/Complications of Ischemic Heart Disease
- Chapter 26 Off Pump Myocardial Revascularization

## Section V. Surgical Decision Making in Valvular Heart Disease
- Chapter 27 Surgical Considerations in Mitral and Tricuspid Valve Surgery
- Chapter 28 Intraoperative Assessment in Mitral Valve Surgery
- Chapter 29 Surgical Considerations and Options in Aortic Valve Surgery
- Chapter 30 Intraoperative Assessment in Aortic Valve Surgery

## Section VI. Major Vascular Disease
- Chapter 31 Diseases of the Aorta

## Section VII. Decision Making in Surgical Treatment of Congestive Heart Failure
- Chapter 32 Pathophysiology and Management of Patients with CHF
- Chapter 33 Surgical Management of CHF
- Chapter 34 Assessment of Cardiomyopathies
- Chapter 35 Assessment of Surgical Procedures for CHF
- Chapter 36 Assessment of Cardiac Transplantation

## Section VIII. Non-Cardiac Surgery: Decision Making in Other Surgical Procedures
