

Clinical Sonography: A Practical Guide

Sanders, Roger C. MA, BM, MRCP

ISBN-13: 9780781748698

Table of Contents

Introduction
Basic Physics
Instrumentation
Knobology
Doppler and Color Flow Principles
Basic Principles
Sonographic Abdominal Anatomy
Epigastric Pain (Upper Abdominal Pain): Pancreatitis?
Right Upper Quadrant Mass: Possible Metastases to Liver
Right Upper Quadrant Pain
Abnormal Liver Function Tests: Jaundice
Fever of Unknown Origin (FUO)
Palpable Left Upper Quadrant Mass
Ultrasound of Abdominal Wall Masses
Midabdominal Mass: Possible Ascites
Right Lower Quadrant Pain
Possible Adrenal Mass
Possible Renal Mass
Renal Failure
Unexplained Hematocrit Drop
Hematuria
Rule Out Pleural Effusion and Chest Mass
Transplants: Renal, Liver, Pancreatic
Possible Invasive Rectal Wall Mass or Anal Sphincter Break
Neck Mass
Possible Testicular Mass: Pain in the Testicle
Prostate: Prostate Carcinoma, Benign Prostatic Hypertrophy
Penile Problems
Breast Ultrasound
Infertility
Rule Out Adnexal Mass
Midline Pelvic Mass
Chronic Pain

Vaginal Bleeding with Negative Pregnancy Test

Intrauterine Contraceptive Devices

Pediatric Abdominal Masses

Neonatal Intracranial Problems

Spinal Ultrasonography

Developmental Dysplasia of the Infant Hip

First Trimester Bleeding

Acute Pelvic Pain

Uncertain Dates: Elective Cesarean Section, "Late Registrant"

Second and Third Trimester Bleeding

Small for Dates

Large for Dates

Possible Fetal Anomalies

Fetal Well-Being and Fetal Death

Abnormal Fetal Heart

Carotid Artery Disease

Intracranial Vascular Problems

Pain and Swelling in the Limbs

Arterial Problems in the Limbs

Shoulder Problems

Common Ankle and Foot Problems

Ultrasound-Guided Techniques

Nursing Procedures

Work-Related Musculoskeletal Disorders (WRMSD) in Sonography

Artifacts

Equipment Care and Quality Control

Photography

Preliminary Reports

Malpractice and Ultrasound

Accreditation Chapter
