Table of Contents

CHAPTER 1 Introduction
- Defining Health-related Physical Fitness
- Components of Health-related Physical Fitness
- The Importance of Measuring Health-related Physical Fitness
- The Relationship of Physical Fitness to Health
- The Relationship of Physical Fitness to Function
- Fundamental Principles of Assessment
- The Physical Fitness Professional
- References

CHAPTER 2 Pre-Assessment Screening
- Rationale for Preassessment Screening
- Informed Consent
- Objective: Risk Stratification
- Other Health Issues to Consider
- Summary
- Laboratory Activities
  1. Risk Stratification Using a Comprehensive Health History Questionnaire
  2. Risk Stratification Using the AHA/ACSM Health/Fitness Facility
  3. Preparticipation Screening Questionnaire
  4. Administering an Informed Consent

CHAPTER 3 Risk Factor Assessments
- Resting Blood Pressure
- Blood Test
- Obesity
- Physical Activity
- Other Diseases and Conditions
- Summary
- Laboratory Activities
  1. Resting Blood Pressure Assessment
  2. Body Mass Index Assessment
  3. International Physical Activity Questionnaire Assessment

CHAPTER 4 Body Composition
- Why Measure Body Composition?
- What Is the Gold Standard Test?
- Clinical Measures
- Tests of Body Volume
- Anthropometry
- Bioelectrical Impedance Analysis
- Interpretation
- Estimation of Goal Body Weight
- Laboratory Activities
  1. Skinfold Estimation of Body Fat Percentage

CHAPTER 5 Muscular Fitness
- Unique Assessment Principles
- Muscular Fitness Continuum
- Strength Assessments
- Endurance Assessments
- Interpretation Issues
- Laboratory Activities
  1. Assessment of Muscular Strength
CHAPTER 6 Flexibility

- Flexibility as a Component of Health-related Physical Fitness
- Unique Assessment Principles
- Methods of Measurement
- Distance Tests for Assessment of Flexibility
- Range of Motion Defined
- Goniometers-Tools to Measure Range of Motion
- Range-of-motion Assessment Overview
- Interpretation

Laboratory Activities
1. Range-of-motion Assessments
2. Distance Tests for Flexibility Assessment

CHAPTER 7 Cardiorespiratory Fitness: Estimation from Field and Submaximal Exercise Tests

- Why Measure Cardiorespiratory Fitness?
- What Is the Gold Standard Test?
- Pretest Standardizations for Cardiorespiratory Fitness Assessments
- Field Tests for Prediction of Aerobic Capacity
- Submaximal Exercise Tests
- Interpretation
- Summary

Laboratory Activities
1. Field Test Assessments of Cardiorespiratory Fitness
2. Submaximal Exercise Test Assessments of Cardiorespiratory Fitness

CHAPTER 8 Cardiorespiratory Fitness: Maximal Exercise Testing

- Risks
- Monitoring
- Personnel
- Selecting the Mode for Testing
- Protocols
- Test Procedures
- Measured and Estimated V.O2max
- Interpretation
- Summary

Laboratory Activities
1. Maximal Exercise Tests
