Table of Contents

**Contributors.**

**Chapter 1 Examination and Diagnosis** *(Paul Fugazzotto and Sergio DePaoli).*
- Establishing an Appropriate Treatment Plan.
- Determining Periodontal Treatment Endpoints.
- Rationale for Pocket-Elimination Periodontal Surgery.
- Junctional Epithelial Adhesion or Connective Tissue Attachment?
- The Significance of Furcation Involvements.
- The Influence of Restorative Margins.
- Does Pocket-Elimination Therapy Work?
- Conclusion.

**Chapter 2 The Role of Crown-Lengthening Therapy** *(Paul Fugazzotto).*
- Management of the Apico-occlusal Dimension.
- Incision Design.
- Conclusion.

**Chapter 3 Treating the Periodontally Involved Furcation** *(Paul Fugazzotto).*
- Definitions of Furcation Involvements.
- Diagnosing Premolar Furcation Involvements.
- Treatment of Class I Furcations.
- Treatment of Class II Furcations.
- Treatment of Class III Furcations.
- Maxillary vs. Mandibular Furcations.
- Selecting the Appropriate Treatment Modality.
- Conclusions.

**Chapter 4 The Role of Mucogingival Therapy** *(Paul Fugazzotto).*
- Indications for Mucogingival Surgery.
- Nonattached Gingival Autografts.
- Lateral Pedicle Flaps.
- Connective-Tissue Grafts.
- Guided Tissue Regeneration.
- Indications for Emdogain Use.
- Constructing a Clinically Based Treatment Decision Tree.
Conclusions.

Chapter 5 Restoration of the Periodontally Treated Tooth (Frederick Hains).

The Feather.
The Chamfer.
The Shoulder.

Periodontal Ramifications and Prosthetic Adaptations.

Impressions.

Chapter 6 Developing Treatment Algorithms for Restoration or Replacement of the Compromised Tooth (Paul Fugazzotto and Frederick Hains).

Diagnostic Requirements.

Assessing the Individual Tooth.

Endodontic Considerations.

Implant Receptor Site Considerations.

Assessing Cost-Benefit Ratios.

Complexity of Care.

Predictability of Care.
The Cost of Retreatment.

Conclusion.

Index.
