Table of Contents

1. Introduction
   Steven W. Baertschi, Dan W. Reynolds

Stress testing: a predictive tool
   Steven W. Baertschi, Patrick J. Jansen

Stress testing: the chemistry of drug degradation
   Steven W. Baertschi, Karen M. Alsante

Stress testing: analytical considerations
   Patrick J. Jansen, W. Kimmer Smith, Steven W. Baertschi

Stress testing: relation to the development timeline
   Steven W. Baertschi, Bernard A. Olsen, Karen M. Alsante

Role of "mass balance" in pharmaceutical stress testing
   Mark A. Nussbaum, Patrick J. Jansen, Steven W. Baertschi

Oxidative susceptibility testing
   Giovanni Boccardi

Comparative stress stability studies for rapid evaluation of manufacturing changes or materials from multiple sources
   Bernard A. Olsen, Larry A. Larew

Physical and chemical stability considerations in the development and stress testing of freeze-dried pharmaceuticals
   Steven L. Nail

Photostability stress testing
   Elisa Fasani, Angelo Albini

The use of microcalorimetry in stress testing
   Graham Buckton, Simon Gaisford

The power of computational chemistry to leverage stress testing of pharmaceuticals
   Donald B. Boyd

Solid-state excipient compatibility testing
   Amy S. Antipas, Margaret S. Landis

Stress testing: frequently asked questions
   Steven W. Baertschi, Karen M. Alsante
