Table of Contents

Introduction to drug development and regulatory decision-making  
Lawrence J. Lesko, Chandrahas Sahajwalla

Evolution of drug development and its regulatory process  
Henry J. Malinowski, Agnes M. Westelinck

Regulatory bases for clinical pharmacology and biopharmaceutics information in a new drug application  
Mehul Mehta, John Hunt

New drug application content and review process for clinical pharmacology and biopharmaceutics  
Chandrahas Sahajwalla, Veeneta Tandon, Vanitha J. Sekar

In-vitro drug metabolism studies during development of new drugs  
Anthony Y. H. Lu, Shiew-Mei Huang

Drug transporters  
Xiaoxiong Wei, Jashvant D. Unadkat

Principles, issues, and applications of interspecies scaling  
Iftekhar Mahmood

Analytical method validation  
Brian P. Booth, W. Craig Simon

Studies of the basic pharmacokinetic properties of a drug: a regulatory perspective  
Maria Sunzel

Surrogate markers in drug development  
Jurgen Venitz

Population pharmacokinetic and pharmacodynamic analysis  
Jogarao V. S. Gobburu

Scientific and regulatory considerations for studies in special population  
Chandrahas Sahajwalla

Conducting clinical pharmacology studies in pregnant and lactating women  
Kathleen Uhl

Scientific, mechanistic, and regulatory issues with pharmacokinetic drug-drug interactions  
Patrick J. Marroum, Hilde Spahn-Langguth, Peter Langguth

Assessing the effect of disease state on the pharmacokinetics of the drug  
Marie Gardmark, Monica Edholm, Eva Gil-Berglund, Carin Bergquist, Tomas Salmonson

Clinical pharmacology issues related to specific drug classes during drug development  
Kellie Schoolar Reynolds, Vanitha J. Sekar, Suresh Doddapaneni

Issues in bioequivalence and development of generic drug products  
Barbara M. Davit, Dale P. Conner

Regulatory considerations for oral extended release dosage forms and in vitro (dissolution)/in vivo (bioavailability) correlations  
Ramana S. Uppoor, Patrick J. Marroum

In vivo bioavailability/bioequivalence waivers  
Patrick J. Marroum, Ramana S. Uppoor, Mehul U. Mehta

Bioavailability and bioequivalence issues for drugs administered via different routes of administration: inhalation/nasal products: dermatological products, suppositories  
Edward D. Bashaw

Scientific and regulatory issues in development in chiral drugs  
Chandrahas Sahajwalla, Jyoti Chawla, Indra K. Reddy

A regulatory view of liposomal drug product characterization  
Kofi Kumi, Brian P. Booth

Challenges in drug development: biological agents of intentional use  
Andrea Meyerhoff

The regulation of antidotes for nerve agent poisoning  
Russell Katz, Barry Rosloff

Bioequivalence assessment: approaches, designs, and statistical considerations  
Rabindra N. Patnaik
