Table of Contents

**Section I - Overview of cancer pain**

Chapter 1 The problem of cancer pain

Chapter 2 Important assessment concepts and tools for HCPs and nurses to use when assessing pain in patients with cancer

**Section II Helping nurses and HCPs to develop a plan of care for medication management and non-pharmacological interventions**

Chapter 3 Non-opioid medications

Chapter 4 Opioid medications

Chapter 5 Co-analgesic medications

Chapter 6 Management of medication side effects

Chapter 7 Complementary techniques for pain relief

**Section III Helping nurses and HCPs to understand how to incorporate interventional options for managing chronic pain in the patient plan of care**

Chapter 8 Regional techniques

Chapter 9 Implanted techniques

Chapter 10 Palliative Chemotherapy, Radiotherapy and Surgery for Pain Control

**Section IV Special Treatment Considerations for nurses and HCPs caring for patients with cancer related pain**

Chapter 11 Effect of opioid polymorphisms (new research indicates need for rotating use of controlled drugs to avoid resistance development)

Chapter 12 Differences in opioid dependency, addiction and tolerance

Chapter 13 Developing a comprehensive treatment plan

**Section V Helpful information for nurses and HCPs on managing cancer related pain conditions**

Chapter 14 Cancer Pain Emergencies

Chapter 15 Neuropathic pain

Chapter 16 Myofascial pain

Chapter 17 Chronic pain in the cancer survivor

**Section VI The role of the nurse and HCP in providing Palliative care, hospice, and end of life care**

Chapter 18 Palliative Care

Chapter 19 Hospice

Chapter 20 End of life care

Chapter 21 Psychosocial aspects of cancer pain
