Table of Contents

Section I  Industrial Combustion Basics
Introduction, Charles E. Baukal, Jr.
Heat Transfer, Charles E. Baukal, Jr.
Fluid Flow, Wes Bussman, Demetris Venizelos, and R. Robert Hayes
Combustion Basics, Joseph Calannino
CFD in Burner Development, Joseph D. Smith, Michael Lorra, Eric M. Hixson, and Tom Eldredge

Section II  Burner Fundamentals
Heat Transfer from Burners, Charles E. Baukal, Jr.
Burner Noise, Mahmoud Fleifil, Jay Karan, and Wes Bussman
Combustion Controls, Joe Gifford and Sach Kodesh
Burner Testing, Jeffrey Lewellen and Charles E. Baukal, Jr.
Burner Physical Modeling, John Guarco and Tom Eldredge

Section III  Burner Designs
High-Velocity Burners, Tom Robertson, Tod Miller, and John Newby
Regenerative Burners, Tom Robertson, Todd Miller, and John Newby
Thermal Radiation Burners, Thomas M. Smith and Charles E. Baukal, Jr.
Radiant Tube Burners, Dennis Quinn and Joh Newby
Radiant Wall Burners, Demetris Venizelos, R. Robert Hayes, and Wes Bussman
Natural-Draft Burners, Charles E. Baukal, Jr.
Burners for Industrial Burners, Lev Tsirulnikov, John Guarco, and Timothy Webster
Multi-Burner Boiler Applications, Lev Tsirulnikov, John Guarco, and Timothy Webster
Duct Burners, Stephen L. Somers
Air-Oxy/Fuel Burners, Charles E. Baukal, Jr.
Oxy-Fuel Burners, Hisashi Kobayashi and Rémi Tsiava
