### Table of Contents

I. Anatomy of the Breast  
II. Method for Systematic Viewing of Mammograms  
III. Approach to Mammographic Film Interpretation  
IV. Circular/Oval Lesions  
   Signs of Primary Importance in Diagnosing Circular/Oval Lesions  
   Signs of Secondary Importance in Diagnosing Circular/Oval Lesions  
   Practice in Analyzing Circular/Oval Tumors (Cases 1-56)  
V. Stellate/Spiculated Lesions  
   Key Case  
   Practice in Analyzing Stellate Lesions (Cases 58-85)  
VI. Calcifications  
   Malignant-Type Calcifications within Ducts and/or Lobules  
   Practice in Calcification Analysis (Cases 86-109)  
   Benign-Type Calcifications within Ducts or Lobules  
   Miscellaneous Calcifications  
   Practice in Calcification Analysis (Cases 112-152)  
VII. Thickened Skin Syndrome of the Breast  
VIII. Overall Strategy
