Techniques in Epilepsy Surgery: The MNI Approach

Olivier, Andre

Table of Contents

Acknowledgement
Preface
1. History of epilepsy surgery
2. The search of the epileptic focus: investigation of the surgical candidate
3. Surgical anatomy
4. Neuronavigation and preoperative brain mapping
5. Stereoelectroencephalography (stereotactic intracranial recording)
6. Anaesthesia and awake procedure
7. Preoperative cortical mapping
8. Endopial resection (intervascular endopial gyral emptying)
10. Surgery of temporal lobe epilepsy: transcortical selective amygdalo-hippocampectomy
11. Surgery of central area epilepsy
12. Surgery of frontal lobe epilepsy
13. Surgery of parietal lobe epilepsy
14. Surgery of insular lobe epilepsy
15. Surgery of occipital lobe epilepsy
16. Hemispherectomy
17. Callosotomy
18. Epilepsy and brain tumours
19. Surgical treatment of cortical dysplasias
20. Reoperations in failed epilepsy surgery
21. Alternate procedures
22. Complications of epilepsy surgery
23. Quality of life after epilepsy surgery
Index.
