About the Author
Foreword

CHAPTER 1 CHOICES: MONEY, MEDICINE AND HEALTH

Questions
1.1 What Is Economics?
Terms of Trade
Value
Can We Pay Somebody to Care?
Financing Health Care
Full Cost: Paying For Medical Care
1.2 The Flow of Funds
Health Care Spending in the United States
Sources of Financing
Health Care Providers: The Uses of Funds
1.3 Economic Principles As Conceptual Tools
Scarcity (Budget Constraints)
Opportunity Cost
Willingness to Pay
Trade
Money Flows in a Circle
The Margin: What Matters?
Maximization: Marginal Costs and Marginal Benefits
Choice: Are Benefits Greater Than Costs?
Investment
Contracts: Complex Exchanges to Deal with Timing and Risk
Organizations Adapt and Evolve
Distribution: Who Gets What
1.4 Health Disparities
1.5 Whose Choices: Personal, Group or Public?
1.6 Social Science and Rational Choice Theory
Suggestions for Further Reading
CHAPTER 2 DEMAND AND SUPPLY

Questions

2.1 The Demand Curve

The Diamonds?Water Paradox: An Example of Marginal Analysis

Consumer Surplus: Marginal versus Average Value of Medicine

Ceteris Paribus

Individual, Firm, and Market Demand Curves

2.2 The Supply Curve

Marginal Revenue

2.3 Price Sensitivity

Price Elasticity and Marginal Revenue

Price Discrimination

2.4 Is Money the Only Price?

2.5 Inputs and Production Functions

Production Functions

Marginal Productivity

2.6 Markets: The Intersection of Demand and Supply

2.7 Need versus Demand

How Much is a Doctor Visit Worth?

The Demand for Medical Care is Derived Demand

The Demand for Health: What Makes Medical Care Different

2.8 The Determinants of Health

2.9 Efficiency

Suggestions for Further Reading

Summary

Problems

Endnotes

CHAPTER 3 COST?BENEFIT AND COST-EFFECTIVENESS ANALYSIS

Questions

3.1 Cost?Benefit Analysis is About Making Choices

An Everyday Example: Knee Injury

Stepwise Choices: Yes or No? How Much?

Calculating Marginal and Average Costs

Defining Marginal: What is the Decision?

3.2 Maximization: Finding the Optimum
CHAPTER 4 HEALTH INSURANCE: FINANCING MEDICAL CARE

Questions

4.1 Methods for Covering Risks

Savings

Family and Friends

Charity

Private Market Insurance Contracts

Social Insurance

Strengths and Weaknesses of Different Forms of Risk Spreading

4.2 Insurance: Third-Party Payment

Why Third-Party Payment?

Variability

Third-Party Transactions

Who Pays? How Much?

How Are Benefits Determined?

4.3 Risk Aversion

4.4 Adverse Selection

4.5 Moral Hazard

Welfare Losses Due to Moral Hazard

Ex Ante Moral Hazard

4.6 Tax Benefits

4.7 Effects of Health Insurance on Labor Markets

4.8 History of Health Insurance

Suggestions for Further Reading
CHAPTER 5 INSURANCE CONTRACTS AND MANAGED CARE

Questions

5.1 Sources of Insurance

Employer-Based Group Health Insurance

Medicare

Medicaid

State Children’s Health Insurance Program

Other Government Programs and Charity

The Uninsured

5.2 Contracting and Payments

Risk Bearing: From Fixed Premiums to Self-Insurance

Purchasing Medical Care for Groups

Medical Loss Ratios

Claim Processing

The Underwriting Cycle

ERISA, Taxes, and Mandated Benefits

Other People’s Money: Rising Costs and Mediocre Benefits

5.3 Consumer-Driven Health Plans: High Deductibles and Health Savings Accounts

Defined Contribution Health Plans

5.4 Managed Care

Closed-Panel Group Practice HMOs

IPA-HMOs and Open Contracts

Managed Care Contract Provisions

The Range of Managed Care Contracts: POS, PPO, HMO

Provider Networks and Legal Structure

Management: The Distinctive Feature of Managed Care

Contractual Reforms to Control Costs

5.5 Unresolved Issues: Split Incentives, Divided Loyalties

Suggestions for Further Reading

Summary

Problems

Endnotes

CHAPTER 6 PHYSICIANS

Questions

6.1 Financing Physician Services: Revenues

Copayments, Assignment, and Balance Billing
CHAPTER 7 MEDICAL EDUCATION, ORGANIZATION, AND BUSINESS PRACTICES

Questions

7.1 Medical Education

7.2 The Origins of Licensure and Linkage to Medical Education

AMA Controls Over Physician Supply, 1930?1965

Breaking the Contract: The Great Medical Student Expansion of 1970 to 1980

Building Pressure: Fixed Domestic Graduation Rates 1980 to 2010

7.3 Adjusting Physician Supply

The Flow of New Entrants and the Stock of Physicians

Immigration of International Medical Graduates

Growth in Non-MD Physicians

Balancing Supply and Incomes: Tracing the Past and Projecting the Future

7.4 Group Practice: How Organization and Technology Affect Transactions

7.5 Kickbacks, Self-Dealing, and Side Payments

7.6 Price Discrimination

7.7 Practice Variations

7.8 Insurance, Price Competition, and the Structure of Medical Markets
CHAPTER 8 HOSPITALS

Questions
8.1 From Charitable Institutions to Corporate Chains: Development of the Modern Hospital
8.2 Hospital Financing: Revenues
Sources of Revenues
8.3 Hospital Financing: Expenses
8.4 Financial Management and Cost Shifting
8.5 How Do Hospitals Compete?
Competing for Patients
Competing for Physicians
Competing for Contracts
Measuring Competitive Success
Measuring the Competitiveness of Markets
8.6 Organization: Who Controls the Hospital and for What Ends?
Suggestions for Further Reading
Summary
Problems
Endnotes

CHAPTER 9 MANAGEMENT AND REGULATION OF HOSPITAL COSTS

Questions
9.1 Why Do Some Hospitals Cost More than Others?
9.2 How Management Controls Costs
Short-Run versus Long-Run Cost Functions
Uncertainty and Budgeting
9.3 Conflict Between Economic Theory and Accounting Measures of Per Unit Cost
Timing
Whose Costs?
9.4 Economies of Scale
The Hospital is a Multiproduct Firm
Contracting Out
9.5 Quality and Cost
Technology: Cutting Costs or Enhancing Quality?
Improved Efficiency Can Raise Total Spending
9.6 Hospital Charges, Costs, and Prices: Confusion and Chaos
Chargemaster and Negotiated Fees
Cost Finding: Gross Revenues and the RCCAC
Medicare as a Standard for Pricing
9.7 Controlling Hospital Costs through Regulation
Suggestions for Further Reading
Summary
Problems
Endnotes

CHAPTER 10 LONG-TERM CARE

Questions
10.1 Development of the Long-Term Care Market
10.2 Age and Health Care Spending
10.3 Defining LTC: Types of Care
10.4 Medicaid: Nursing Homes as a Two-Part Market
10.5 Certificate of Need: Whose Needs?
Money and Quality
Competing for Certificates of Need, Not for Patients
Evidence on the Effects of Certificates of Need
10.6 Cost Control by Substitution
10.7 Case-Mix Reimbursement
10.8 Long-term Care Insurance
Is Long-Term Care Medical?
10.9 Retirement, Assisted Living, and the Wealthy Elderly
10.10 Financial Reimbursement Cycles
Suggestions for Further Reading
Summary
Problems
Endnotes

CHAPTER 11 PHARMACEUTICALS

Questions
11.1 Pharmaceutical Revenues: Sources of Financing
Inpatient Pharmaceuticals
11.2 Uses of Funds
Retail Pharmacies
Wholesalers
Insurance Companies and PBM
Pharmaceutical Firms
Cost Structure
CHAPTER 12 FINANCING AND OWNERSHIP OF HEALTH CARE PROVIDERS

Questions

12.1 What is Financing?

12.2 Value and Rate of Return

The Time Value of Money.

Interest Rates and Present Value

The Internal Rate of Return

Human Capital: Medical Education as an Investment

Risk

Valuing Assets

12.3 Uncorrelated (Independent) and Correlated (System) Risks

Which is Riskier: Nursing Homes or Drug Companies?

Assessing Business Risk

12.4 Ownership and Agency

Equity and Debt

Who Owns the Business? Who Owns the Patient? Agency Issues

The Role of Financial Intermediaries

Health Insurers as Financial Intermediaries

12.5 Capital Financing: Hospitals

12.6 HMO Ownership and Capital Markets: Success and Failure

Business Risks for an HMO

Kaiser Health Plan: The Evolution of an HMO

Group Health Association: A Consumer Co-op Gets Bought Out by a Franchise Chain

12.7 Entrepreneurship and Profits

U.S. Healthcare: A Profitable Growth Company

12.8 Health Care for Profit, or Not

Differences between For-Profit and Nonprofit Behavior

Charity Care: For Real or for Show?
For-Profit or Not-for-Profit: Which Is Better?

Medical Care is Difficult: Risk, Information Asymmetry, Social Justice

Suggestions for Further Reading

Summary

Problems

Endnotes

CHAPTER 13 MACROECONOMICS OF MEDICAL CARE

Questions

13.1 What is Macro?

Micro and Macro Perspectives on Spending

13.2 The Consumption Function

The Permanent Income Hypothesis

Shared Income

Public and Private Decisions

Budget Constraints: Borders that Matter

13.3 Adjusting to Change: Dynamics

Permanent Income and Adjustment of Health Spending to GDP

Adjustment to Inflation

Adjustment to GDP: Rates of Change and Time Series Analysis

13.4 Forecasting Future Health Expenditures

13.5 Cost Controls: Spending Gaps and the Push to Regulate

Capacity Constraints and Budget Constraints

13.6 Workforce Dynamics: "Spending" is Mostly Labor

Employment

Wages

Suggestions for Further Reading

Summary

Problems

Endnotes

CHAPTER 14 THE ROLE OF GOVERNMENT AND PUBLIC GOODS

Questions

14.1 The Roles of Government

Markets Are Perfectly Efficient, but Only with Perfect Competition

Government in a Mixed Economy

How Government Works

The Voluntary Sector

Government is Necessary, and Costly

Markets are Costly, Limited, and Always Regulated

14.2 Government Health Financing
14.3 Law and Order
14.4 Public Goods and Externalities
   Privatizing Public Goods
   Insurance Makes Any Good More Public
   Externalities
   The Coase Theorem: Transaction Costs and Property Rights
14.5 Monopoly and Market Failure
14.6 Information
   Rational Consumer Ignorance
   Social Costs Depend on the Number of People
   Milk or Bread: Which is More Public?
   Infectious Disease Externalities
   Epidemics
   The Sanitary Revolution: A Moral Campaign for Public Health
   Formation of the U.S. Public Health Service
14.7 Drugs, Sex, and War: Public Health in Action
   Addiction
   Sexual Behavior
   Who Counts as a Citizen? Abortion and Other Dilemmas
   War and Public Health
14.8 Politics, Regulation, and Competition
   Politicians: Entrepreneurs Who Try to Get Votes
   Government as the Citizen?s Agent
   Public Goods Make almost Everybody Better Off but Nobody Happy
   Winners and Losers
14.9 Trust, Care, and Distribution
   Suggestions for Further Reading
   Summary
   Problems
   Endnotes

CHAPTER 15 HISTORY, DEMOGRAPHY, AND THE GROWTH OF MODERN MEDICINE

Questions
15.1 Economic Growth has Determined the Shape of Health Care
15.2 Birth Rates, Death Rates, and Population Growth
15.3 The Stone Age
15.4 The Agricultural Age
   Investment and Trade
   Civilization, War, and Government
   The Decline of Civilizations Leads to Population Declines
CHAPTER 16 INTERNATIONAL COMPARISONS OF HEALTH AND HEALTH EXPENDITURES

Questions
16.1 Wide Differences Among Nations
Size of the Market
16.2 Micro Versus Macro Allocation: Health as a National Luxury Good
16.3 Causality: Does More Spending Improve Health?
16.4 Low-Income Countries
Health Care in Ghana
Sudan
16.5 Middle-Income Countries
China
The Health Care System of Mexico
Poland
16.6 High-Income Countries
Health Care in Japan
The Health System in Germany
The Expensive Exception: The United States
16.7 International Trade in Health Care
CHAPTER 17 ECONOMIC EVALUATION OF HEALTH POLICY: THE PATIENT PROTECTION AND AFFORDABLE CARE ACT OF 2010

Questions
17.1 ACA 2010: Description of Main Elements
Coverage Rules
State Health Insurance Exchanges
Individuals
Employers: Positive and Negative Incentives to Provide Benefits
Medicare: ACOs, IPAB, Bundled Payments, and the Donut Hole
Medicaid: Major Expansions with Federal Funding
Prevention and Other Provisions of PPACA
Still Uninsured: The Undocumented and Some Other Outsiders
17.2 Statement of the Problem: Affordability
Rising Costs Slowly Create a Crisis
The Middle Class Gets Stretched: A Leveraged Gap in Coverage
Macro Affordability: The Growth Gap
17.3 Using Existing Plans as Models
States
The Federal Employees Health Benefits Plan
17.4 Unresolved Issues
Equity
Defining Essential Benefits
The OPM Legacy: Third-Party Payment and Cost Shifting
Price Transparency: A Conspiracy of Silence
The Uninsured: Still There, Still Have to be Paid For
Unfunded Health and Retirement Benefits
Defined Benefits, Defined Services, or Defined Contribution
Who Bears the Risk?
Suggestions for Further Reading
Summary
Problems
CHAPTER 18 VALUE FOR MONEY IN THE FUTURE OF HEALTH CARE

Questions
18.1 Forcing the Question: Who Gets Healthy and Who Gets Paid?
18.2 Spending Money or Producing Health?
18.3 Dynamic Efficiency
18.4 Distribution, Distribution, Distribution
18.5 Path-Dependence and the Possibilities for Reform

How Did We Get Here?
What Did Medicine Miss?
What Went Wrong? Notable Failures and Unresolved Dilemmas
18.6 The Path Forward: Step by Step
18.7 The Shape of Health Care Spending to Come
18.8 The Long Run: 2050 and Beyond

Suggestions for Further Reading
Summary
Problems
