# Table of Contents

**1 Anatomy and Function (Jay H. Lefkowitch).**
- Development of the liver and bile ducts.
- Anatomy of the liver.
- Functional liver anatomy: sectors and segments.
- Anatomical abnormalities of the liver.
- Anatomy of the biliary tract.
- Surface marking.
- Methods of examination.
- Microanatomy of the liver.
- Hepatic ultrastructure (electron microscopy) and organelle functions.
- Functional heterogeneity of the liver.
- Dynamics of the hepatic microenvironment in physiology and disease.
- Hepatocyte death and regeneration.

**2 Assessment of Liver Function (Sandeep Mukherjee & John L. Gollan).**
- Selection of biochemical tests.
- Bile pigments.
- Serum enzyme tests.
- Quantitative assessment of hepatic function.
- Lipid and lipoprotein metabolism.
- Bile acids.
- Amino acid metabolism.
- Plasma proteins.
- Carbohydrate metabolism.
- Effects of ageing on the liver.

**3 Biopsy of the Liver (David Patch & Amar Paul Dhillon).**
- Selection and preparation of the patient.
Techniques.
Risks and complications.
Sampling variability.
Naked-eye appearances.
Preparation of the specimen.
Interpretation.
Indications.
Special methods.

4 Haematological Disorders of the Liver (Pramod K. Mistry & Dhanpat Jain).
The liver and blood coagulation.
Haemolytic jaundice.
The liver in haemolytic anaemias.
The liver in myelo- and lymphoproliferative disease.
Leukaemia.
Bone marrow transplantation.
Lymphoma.
Lipid storage diseases.

5 Acute Liver Failure (Shannan R. Tujios & William M. Lee).
Definition.
Epidemiology and aetiologies.
Clinical features.
Initial investigations.
Complications and management of acute liver failure.
Specific therapies.
Prognosis.
Liver transplantation.
Liver support systems.
Conclusion.

6 Hepatic Fibrogenesis (Meena B. Bansal & Scott L. Friedman).
Introduction.
Natural history of hepatic fibrosis.
Cellular and molecular features of hepatic fibrosis.
Clinical aspects of hepatic fibrosis.
Emerging antifibrotic targets and strategies.

7 Hepatic Cirrhosis (P. Aiden McCormick).
Definition.
Causes of cirrhosis.
Anatomical diagnosis.
Reversible cirrhosis.
Clinical cirrhosis: compensated versus decompensated.
Vasodilatation and hyperdynamic circulation.
Prognosis (Child-Pugh score, MELD, UKELD).
Clinical and pathological associations.
Management

8 Hepatic Encephalopathy in Patients with Cirrhosis (Marsha Y. Morgan).
Classification.
Diagnosis.
Differential diagnosis.
Hepatic encephalopathy and liver transplantation.
Prognosis.
Pathogenesis.
Management of hepatic encephalopathy.
Prevention.

The hepatic artery.
The portal venous system.
Haemodynamics of portal hypertension.
Clinical features of portal hypertension.
Diagnosis of varices.
Imaging the portal venous system.
Classification of portal hypertension.
Extrahepatic portal venous obstruction.
Presinusoidal intrahepatic and sinusoidal portal hypertension.
Bleeding oesophageal varices.
Management of acute variceal bleeding.
The hepatic veins.
Budd-Chiari (hepatic venous obstruction) syndrome.
Circulatory failure.

10 Ascites (Guadalupe Garcia-Tsao).
Mechanisms of ascites formation.
Clinical features.
Differential diagnosis.
Spontaneous bacterial peritonitis.
Treatment of cirrhotic ascites.
Hyponatraemia.
Refractory ascites.
Hepatorenal syndrome.
Prognosis.

11 Jaundice and Cholestasis (Elwyn Elias).
Introduction.
Classification of jaundice.
Physiology and pathophysiology.
Syndrome of cholestasis.
Investigation of the jaundiced patient.
Differential diagnosis.
Treatment.
Familial non-haemolytic hyperbilirubinaemias.

12 Gallstones and Benign Biliary Diseases (James S. Dooley).
Imaging.
Composition of gallstones.
Formation of cholesterol stones.
Factors in cholesterol stone formation.
Pigment gallstones.
Natural history of gallbladder stones.
Acute calculous cholecystitis.
Empyema of the gallbladder.
Emphysematous cholecystitis.
Chronic calculous cholecystitis.
Acalculous cholecystitis.
Cholecystectomy.
Postcholecystectomy bile duct damage.
Postcholecystectomy syndromes.
Non-surgical treatment of gallstones in the gallbladder.
Other gallbladder pathology.
Biliary fi stulae.
Gallstone ileus.
Bile peritonitis.

Association between cholecystectomy and colorectal cancer.

Common duct stones.

Management of duct stones.

Haemobilia.

Bile duct-bowel anastomotic stricture.

Chronic pancreatitis.

Primary sclerosing cholangitis and autoimmune pancreatitis.

Bile duct pathology following liver transplantation.

13 Malignant Biliary Diseases (Rahul S. Koti & Brian R. Davidson).

Carcinoma of the gallbladder.

Carcinoma of the bile duct (cholangiocarcinoma).

Intrahepatic cholangiocarcinoma.

Other biliary malignancies.

Metastases at the hilum.

Periampullary carcinoma.

Conclusions.

14 Cysts and Congenital Biliary Abnormalities (Giorgina Mieli-Vergani & Nedim Hadlic).

Fibropolycystic diseases.

Adult polycystic disease.

Congenital hepatic fibrosis.

Caroli’s disease.

Microhamartoma (von Meyenberg complexes).

Choledochal cysts.

Congenital anomalies of the biliary tract.

15 Primary Biliary Cirrhosis (Margaret F. Bassendine).

Clinical features.

Diagnosis.

Aetiology.

Epidemiology and genetics.

Treatment.

Prognosis.

16 Sclerosing Cholangitis (Simon Rushbrook & Roger W. Chapman).

Introduction.

Primary sclerosing cholangitis.

Secondary sclerosing cholangitis.
17 Enterically Transmitted Viral Hepatitis: Hepatitis A and Hepatitis E (Peter Karayiannis & Howard C. Thomas).

General features of enterically transmitted viral hepatitis.

Hepatitis A virus.

Hepatitis E virus.

18 Hepatitis B (Anna S. F. Lok).

Introduction.

Hepatitis B virus.

Immune response and mechanisms of hepatic injury.

Epidemiology.

Prevention.

Diagnosis.

Clinical manifestations.

Natural history.

Treatment.

19 Hepatitis D (Patrizia Farci).

History.

Hepatitis D virus.

Epidemiology.

Pathogenesis.

Modes of infection and clinical course.

Diagnosis.

Treatment.

Prevention.

20 Hepatitis C (Geoffrey Dusheiko).

Introduction.

Epidemiology.

Virology.

Pathology and pathogenesis.

Diagnostic tests for hepatitis C.

Acute hepatitis C.

Chronic hepatitis C.

General features of non-A?E hepatitis.

Hepatotropic viruses.

Systemic viral infections that often cause transient liver involvement.
22 HIV and the Liver (Marion G. Peters & Vincent Soriano).
Viral hepatitis and human immunodeficiency virus (HIV) infection.
Cirrhosis and liver transplantation.
HIV-associated opportunistic infections and the liver.
HIV-associated neoplasms of the liver.
Antiretroviral-related liver injury in HIV.

23 Autoimmune Hepatitis and Overlap Syndromes (Gideon M. Hirschfield & E. Jenny Heathcote).
Introduction.
Disease overview.
Biological determinants of disease.
Disease presentation.
Laboratory features.
Imaging.
Liver biopsy and histological features.
Differential diagnosis.
Diagnostic dilemmas.
Making a diagnosis in practice.
Management strategies.
Pregnancy and autoimmune hepatitis.
Contraception choices for patients with autoimmune hepatitis.
The elderly and autoimmune hepatitis.
Childhood-onset autoimmune hepatitis.
Autoimmune hepatitis and liver transplantation.
Overlap syndromes.
Conclusion.

24 Drug-Induced Liver Injury (Leonard B. Seeff & Robert J. Fontana).
Introduction.
Worldwide epidemiology.
Expressions of hepatotoxicity.
Classification of hepatotoxicity.
Predictors of susceptibility and outcome in drug-induced liver injury.
Mechanisms of injury, drug metabolism and pharmacokinetics.
Diagnostic approaches and causality assessment of drug-induced liver injury.
Clinical and biochemical presentations of drug-induced liver disease.
Assessment of suspected drug-induced liver disease.
Assessing causality for drug-induced liver disease.
Medical management.
Liver injury from specific drugs.

25 Alcohol and the Liver (Stephen Stewart & Chris Day).

Introduction.
Alcohol metabolism.
Pathogenesis.
Susceptibility.
Histological features.
Clinical features.
Clinical syndromes.
Prognosis.
Treatment.

26 Iron Overload States (Paul Adams).
Normal iron metabolism.
Iron overload and liver damage.
Genetic haemochromatosis.
Other iron storage diseases.

27 Wilson’s Disease (Eve A. Roberts).
Molecular genetics: pathogenesis.
Pathology.
Clinical picture.
Genetic strategies.
Diagnostic difficulties.
Treatment.
Prognosis.
Indian childhood cirrhosis.

28 Non-alcoholic Fatty Liver Disease and Nutrition (Stephen H. Caldwell & Curtis K. Argo).
Introduction.
Clinical features.
Laboratory testing.
Mitochondriopathies and lipodystrophy.
Epidemiology of non-alcoholic fatty liver disease.
Pathogenesis of non-alcoholic fatty liver disease and non-alcoholic steatohepatitis.
The natural history of non-alcoholic fatty liver disease (non-alcoholic steatohepatitis and non-NASH fatty liver).
Therapy of non-alcoholic fatty liver disease.
Other forms of non-alcoholic fatty liver.

29 The Liver in the Neonate, in Infancy and Childhood (Deirdre A. Kelly).

Investigation of liver disease in children.

Neonatal jaundice.

Neonatal liver disease (conjugated hyperbilirubinaemia).

Neonatal hepatitis syndrome.

Inherited disease in the neonate.

Genetic cholestatic syndromes.

Structural abnormalities: biliary atresia and choledochal cyst.

Acute liver failure in infancy.

Liver disease in older children.

Metabolic disease in older children.

Cirrhosis and portal hypertension.

Liver transplantation.

Tumours of the liver.

30 The Liver in Pregnancy (Andrew K. Burroughs & E. Jenny Heathcote).

Normal pregnancy.

Liver disease in pregnancy.

Diseases specific to pregnancy.

Diseases of late pregnancy.

Pregnancy in those with acute or chronic liver disease.

Hepatotoxic drugs and the pregnant woman.

Pre-existing liver disease.

Pregnancy in liver transplant recipients.

31 The Liver in Systemic Disease (Humphrey J. F. Hodgson).

Collagen-vascular and autoimmune disorders.

Hepatic granulomas.

The liver in diabetes mellitus.

Liver and thyroid.

Liver and adrenal.

Liver and growth hormone.

Amyloidosis.

Porphyrias.

Non-metastatic complications of malignancy.

Bone-marrow/stem cell transplantation; graft-versus-host disease.

32 The Liver in Infections (Christopher C. Kibbler).
Introduction.
Jaundice of infections.
Pyogenic liver abscess.
Hepatic amoebiasis.
Tuberculosis of the liver.
Hepatic actinomycosis.
Syphilis of the liver.
Perihepatitis.
Leptospirosis.
Relapsing fever.
Lyme disease.
Rickettsial infections.
Fungal infections.
Schistosomiasis (bilharzia).
Malaria.
Kala-azar (visceral leishmaniasis).
Hydatid disease.
Ascariasis.
Strongyloides stercoralis.
Trichinosis.
Toxocara canis (visceral larva migrans).
Liver flukes.

Ultrasound.
Computed tomography.
Magnetic resonance imaging.
Radioisotope scanning.
Positron emission tomography.
MR spectroscopy.
Conclusions and choice of imaging technique.

34 Benign Liver Tumours (Ian R. Wanless).
Diagnosis of focal liver lesions.
Hepatocellular tumours.
Biliary and cystic lesions.
Mesenchymal tumours.
35 Primary Malignant Neoplasms of the Liver (Morris Sherman).

Hepatocellular carcinoma.

Cholangiocarcinoma.

Other malignant neoplasms of the liver.

36 Hepatic Transplantation (Andrew K. Burroughs & James O’Beirne).

Selection of patients.

Candidates: outcome.

Absolute and relative contraindications.

General preparation of the patient.

Donor selection and operation.

The recipient operation.

Immunosuppression.

Postoperative course.

Post-transplantation complications.

Conclusion.

37 Liver Transplantation in Patients with Hepatitis B, C or HIV Infection (Norah Terrault).

Introduction.

Hepatitis B and liver transplantation.

Hepatitis C and liver transplantation.

HIV and liver transplantation.

References.

Index.
