# Acute and Critical Care Medicine at a Glance

Leach, Richard M. MD, FRCP

## Table of Contents

Preface.

Acknowledgements.

Units, symbols and abbreviations.

**Part 1 General.**

1 Recognizing the unwell patient.

2 Admission and ongoing management of the acutely unwell patient.

3 Monitoring in acute and critical care medicine.

4 Oxygen transport.

5 Cardiopulmonary resuscitation.

6 Shock.

7 Circulatory assessment.

8 Fluid management.

9 Fluid choice: specific situations.

10 Inotropes and vasopressors.

11 Failure of oxygenation and respiratory failure.

12 Oxygenation and oxygen therapy.

13 Airways obstruction and management.

14 Non-invasive ventilation.

15 Endotracheal intubation.

16 Mechanical ventilation.

17 Respiratory management, weaning and tracheostomy.

18 Arterial blood gases and acid–base balance.

19 Analgesia, sedation and paralysis.

20 Enteral and parenteral nutrition.

21 Hypothermia and hyperthermia.

22 SIRS, sepsis, severe sepsis and septic shock.

23 Hospital-acquired (nosocomial) infections.

24 End of life issues.

**Part 2 Medical.**

**Cardiac.**

25 Acute coronary syndromes I: clinical pathophysiology.

26 Acute coronary syndromes II: investigations and management.

27 Arrhythmias.
28 Heart failure and pulmonary oedema.
29 Cardiac emergencies.
30 Deep venous thrombosis and pulmonary embolism.

*Respiratory.*
31 Community-acquired pneumonia.
32 Hospital-acquired (nosocomial) pneumonia.
33 Asthma.
34 Chronic obstructive pulmonary disease.
35 Acute respiratory distress syndrome.
36 Pneumothorax and air leaks.
37 Respiratory emergencies.

*Renal and metabolic.*
38 Acute kidney injury: pathophysiology and clinical aspects.
39 Acute kidney injury: management and renal replacement therapy.
40 Diabetic emergencies.
41 Endocrine emergencies.

*Gastrointestinal.*
42 Gastrointestinal haemorrhage.
43 Acute liver failure.
44 Acute pancreatitis.

*Neurological.*
45 Acute confusional state, coma and status epilepticus.
46 Neurological emergencies: cerebrovascular accidents.
47 Neurological emergencies: infective.
48 Neuromuscular conditions.

*Other systems.*
49 Coagulation disorders and transfusion.
50 Drug overdose and poisoning.
51 The immune compromised patient.

*Part 3 Surgical.*
52 Trauma.
53 Head injury.
54 Chest trauma.
55 Acute abdominal emergencies.
56 Obstetric emergencies.
57 Burns, toxic inhalation and electrical injuries.

*Part 4 Self-assessment.*
Case studies and questions.
Case studies answers.

Appendices.
Appendix I: Classification of antiarrhythmic drugs.
Appendix II: Acute injury network staging system 2008 for acute kidney injury.
Appendix III: Rockall risk-scoring system for GI bleeds.
Appendix IV: Child–Pugh grading.
Appendix V: Typical criteria for liver transplantation.
Index.
