# Table of Contents

1. Haemopoiesis.
2. Erythropoiesis and general aspects of anaemia.
3. Hypochromic anaemias.
4. Iron overload.
5. Megaloblastic anaemias and other macrocytic anaemias.
6. Haemolytic anaemias.
7. Genetic disorders of haemoglobin.
8. The white cells 1: granulocytes, monocytes and their benign disorders.
9. The white cells 2: lymphocytes and their benign disorders.
10. The spleen.
11. The aetiology and genetics of haematological malignancies.
12. Management of haematological malignancy.
15. The non-leukaemia myeloproliferative neoplasms.
17. Acute lymphoblastic leukaemia.
18. The chronic lymphoid leukaemias.
21. Multiple myeloma and related disorders.
22. Aplastic anaemia and bone marrow failure.
23. Stem cell transplantation.
24. Platelets, blood coagulation and haemostasis.
25. Bleeding disorders caused by vascular and platelet abnormalities.
27. Thrombosis and antithrombotic therapy.
30. Pregnancy and neonatal haematology.
Appendices.

1 Principal features of known cluster differentiation (CD) molecules.

2 Normal values.

3 World Health Organization (WHO 2008) classification of Tumours of the haematopoietic and lymphoid tissues.

Index.
