Preface
Acknowledgments

1. Trends in Health Care Delivery: The Increased Burden on Schools as Health Care Providers - Paul C. McCabe, Steven R. Shaw
   Introduction
   Pediatrics in the Schools
   Role of Federal Legislation
   Keeping Pace with the Trends in Health Care
   Meeting the Additional Burden
   References

2. Collaboration Between Educators and Medical Professionals: Models, Barriers and Implications - Sarah Glaser, Tia Ouimet, Steven R. Shaw
   Introduction
   Background
   Why Collaboration between Educators and Medical Professionals is Necessary
   Models of Collaboration
   Independent functions model
   Multidisciplinary team model
   Interdisciplinary team model
   Transdisciplinary team model
   Obstacles and Barriers to Effective Collaboration
   Dual systems
   Interprofessional tensions
   Financial and administrative issues
   Legal issues
   Credentialing
   Ethical issues
   Implications for Educators
   Strategies for Effective Collaboration between Educators and Medical Professionals
   Respecting professional boundaries
   Encouraging active participation
   Promoting frequent and clear communication
   Fostering community relationships
   Developing prevention and health promotion programs for students
   Conclusions and Future Directions
   Educational Strategies
   Discussion Questions
   Research Summary
   Handout-Strategies for Effective Communication Between Educators and Medical Professionals

II. Current Issues in Pediatric Disorders and Treatments
3. Role of Otitis media in Hearing Loss and Language Deficits - Amy M. Racanello, Paul C. McCabe
   Introduction
   Background
   Disease Overview
   Medical Treatment
   Risk Factors for Developing Otitis Media
   Age
   Chronicity
   Heritability
   Chromosomal Disorders
   Biofilms
   Allergies
   Otitis Media and Speech and Language Development
   Implications for Educators
   Student specific strategies
   General classroom strategies
   Educational Strategies
   Discussion Questions
   Research Summary
   Handout-Otitis Media

   Introduction
   Background
   Disease Overview
   Medical Treatment
   Risk Factors for Developing Otitis Media
   Age
   Chronicity
   Heritability
   Chromosomal Disorders
   Biofilms
   Allergies
   Otitis Media and Speech and Language Development
   Implications for Educators
   Student specific strategies
   General classroom strategies
   Educational Strategies
   Discussion Questions
   Research Summary
   Handout-Childhood Immunizations: Know the Facts

5. Shaken Baby Syndrome: Immediate and Long Term Consequences and Implications for Educators - Tiffany Folmer Lawrence, Paul C. McCabe
   Introduction
   Background
   Development of Vaccinations
   Opposition to Immunize
   Fear of side effects
   Fear of developing another disorder
   Hemophilus influenzae B (Hib) and diabetes
   Pertussis and asthma
   Measles, mumps, rubella (MMR) and autism
   Implications for Educators
   Educational Strategies
   Discussion Questions
   Research Summary
   Handout-Preventing Shaken Baby Syndrome

6. Assessment and Intervention for Sleep Problems - Joseph A. Buckhalt, Mona El-Sheikh
   Introduction
   Background
   Diagnostic Considerations for Sleep Disorders
   Sleep and health Correlates
   Adolescent Sleep Patterns
   Assessing Sleep Problems
   Implications for Educators
   Educational Strategies
7. Cognitive Effects of Childhood Leukemia Treatments - Paul C. McCabe

Introduction
Background
Definition of Leukemia
Etiology and Treatment
Learning Outcomes
Attention and Memory
Cognitive Abilities
Gender Effects
Limitations
Implications for Educators
Educational Strategies
Discussion Questions
Research Summary
Handout: Cognitive Effects of Leukemia Treatments

8. An Overview of Pediatric Human Immunodeficiency Virus (HIV) - Sarah A. B. Wilson, W. Mark Posey, Emily E. Powell

Introduction
Background
Scope of the Problem
Motor Development and Visual-Motor Effects of HIV
Cognitive Effects
Language Development
Executive Functioning
Psychological Adjustment
Disclosure
Implications for Educators
Educational Strategies
Discussion Questions
Research Summary
Handout: Pediatric HIV

9. Bacterial Meningitis - Paul C. McCabe, Fallon Lattari

Introduction
Background
Pathogenesis
Clinical Symptoms
Neurological Effects
Diagnosis
Epidemiology, Immunization, and Treatment
Research Limitations
Prevention
Implications for Educators
Educational Strategies
Discussion Questions
Research Summary
Handout: Information about Bacterial Meningitis

Introduction
Background
Infection Incidence and Risk
Diagnosis
Neurological and Cognitive Deficits
Developmental Delay, Attention and Autistic Spectrum Disorders
Depressive, Panic and Aggressive Disorders
Long-term Outcome
Implications for Educators
Educational Strategies
Discussion Questions
Research Summary
Handout: Pediatric Lyme Disease and Associated Tick-Bourne Infections

Introduction
Background
Child & Family Context
Biological Factors
Behavioral Factors
Socioeconomic and Cultural Factors at the Family Level
The Community
The School
Intra-School Processes
School Environment
Family, Community, & School: Healthy Weight Facilitated
Educational Strategies
Discussion Questions
Research Summary
Handout: Strategies to Help Children Achieve a Healthy Weight

12. Low Level Aggression in the School: Issues and Interventions - Rebecca Lakin Gullan, Julie Paquette MacEvoy

Introduction
Background
What is a Normal Level of Aggression?
Conflict versus Aggression
Classroom Differences
Defining Non-Physical Aggression
Bullies, Victims, and Aggressive-Victims
Bully-Victims
Aggression and Social Status: The Role of Perceived Popularity
Implications for Educators
Evaluation at the Child Level
Evaluating Context
Matching Intervention to Child Contextual Characteristics
Prevention
Intervening with Victims
Intervening with Aggressors
Intervening with Bully-Victims
Changing Social Norms
Educational Strategies
Discussion Questions
Research Summary
Handout: Helping Children with Aggression

13. Accident Prevention - Marybeth Bailie-Heath, Sarah Valley-Gray

Introduction
Background
Motor Vehicle Safety
Pedestrian Safety
Bicycle Safety
Sports, Recreation, and Swim Safety
