Table of Contents

Section I - OVERVIEW OF PSYCHOLOGICAL TESTING
1. What Are Psychological Tests?
   Why Should You Care About Psychological Testing?
   What Are Psychological Tests?
   The History of Psychological Testing
   Testing Today
   The Defining Characteristics of Psychological Tests
   Assumptions of Psychological Tests
   Test Classification Methods
   Psychological Assessment, Psychological Tests, Measurements, and Surveys
   Locating Information About Tests
2. Why Is Psychological Testing Important?
   The Importance of Psychological Testing
   Who Uses Psychological Tests and for What Reasons?
   The Social and Legal Implications of Psychological Testing
3. Is There a Right or Wrong Way to Use Psychological Tests?
   Ethical Standards for Psychological Testing
   Appropriate Use of Psychological Tests
   Testing Special Populations
4. How Does Computerized Testing Work?
   Computerized Testing
   Computerized Adaptive Testing
   Web-Based Assessment
   Implications for the Future

Section II - PSYCHOMETRIC PRINCIPLES
5. How Do Test Users Interpret Test Scores?
   Levels of Measurement
   Procedures for Interpreting Test Scores
   Standard Scores
   The Role of Norms
6. What Is Test Reliability?
   What Is Reliability?
   Three Types of Reliability
   Classical Test Theory
   The Reliability Coefficient
   Using Computer Software to Calculate Reliability
   Interpreting Reliability Coefficients
   Factors That Influence Reliability
   Generalizability Theory
7. How Do We Gather Evidence of Validity Based the Content of a Test?
   Different Sources of Evidence for Validity
   The Appropriate Use of Various Validation Strategies
   Evidence Based on Test Content / Content Validity
   Face Validity
8. How Do We Gather Evidence of Validity Based a Test’s Relationships with External Criteria?
   What Is Evidence for Validity Based on Test-Criteria Relationships?
   Methods for Providing Evidence of Validity Based on Test-Criteria Relationships
   Selecting a Criterion
   Does the Criterion Measure What It Is Supposed to Measure?
   Calculating and Evaluating Validity Coefficients
   Using Validity Information to Make Predictions
   Ethical Issues Associated With Test Validation
9. How do we Gather Evidence of Validity Based on a Test’s Relationship with Constructs?
   Construct Validity
   Gathering Evidence of Construct Validity
   Factor Analysis

SECTION III - DEVELOPING AND PILOTING SURVEYS AND PSYCHOLOGICAL TESTS
10. How Do We Construct, Administer, and Use Survey Data?
    What Are Surveys?
    Knowledge Acquisition and the Scientific Method
    The Survey Research Method
    Survey Reliability and Validity
11. How Do You Develop a Test?
    Why Develop a New Test?
    Defining the Testing Universe, Audience, and Purpose
    Developing a Test Plan
    Composing the Test Items
    Writing Effective Items
    Writing the Instructions for the New Test
12. How Do We Assess the Psychometric Quality of a Test?
    The Pilot Test
Quantitative Item Analysis
Qualitative Item Analysis
Revising the Test
Conducting the Validation Study
Developing Norms and Identifying Cut Scores
Developing the Test Manual

SECTION IV - USING TESTS IN DIFFERENT SETTINGS
13. How Are Tests Used in Educational Settings?
   Decision Making in the Educational Setting
   Educators as Test Users
   Psychological Test Use in Educational Settings
   Norm-Referenced, Criterion-Referenced, and Authentic Assessment of Achievement

14. How Are Tests Used in Clinical and Counseling Settings?
   Models of Psychological Assessment
   Tests Used for Diagnosis and Intervention
   Neuropsychological Tests
   Specialized Tests for Clinical Disorders

15. How Do Organizations Use Psychological Tests?
   A Short History of Employment Testing
   Preemployment Testing
   Performance Appraisal
