Table of Contents

Introduction to Hematology

1. An Overview of Clinical Laboratory Hematology NEW!
2. Safety in the Hematology Laboratory
3. Specimen Collection
4. Care and Use of the Microscope
5. Quality Assurance

Part II: Hematopoiesis

6. Morphology and Function of Cellular Components
7. Hematopoietic Theory
8. Erythrocyte Production and Destruction
9. Metabolism of the Erythrocyte
10. Hemoglobin Metabolism
11. Iron Metabolism
12. Leukopoiesis
13. Platelet Production, Structure, and Function

Part III: Routine Laboratory Evaluation of Blood Cells

14. Routine Testing in Hematology
15. Examination of the Peripheral Blood Smear and Correlation with the Complete Blood Count
16. Bone Marrow Overview

Part IV: Body Fluid Examination

17. Body Fluids in the Hematology Laboratory

Part V: Erythrocyte Disorders

18. Anemias: RBC Morphology and Approach to Diagnosis
19. Disorders of Iron and Heme Metabolism
20. Anemias Caused by Defects of DNA Metabolism
21. Bone Marrow Failure
22. Introduction to Increased Destruction of Erythrocytes
23. Intracorpuscular Defects Leading to Increased Erythrocyte Destruction
24. Extracorpuscular Defects leading to Increased Erythrocyte Destruction—Nonimmune Causes
25. Extracorpuscular Defects leading to Increased Erythrocyte Destruction—Immune Causes
26. Hemoglobinopathies (Structural Defects in Hemoglobin)

27. Thalassemias

**Part VI: Leukocyte Disorders**

28. Morphologic and Distributive Leukocyte Disorders

29. Introduction to Leukocyte Neoplasms

30. Cytochemistry

31. Cytogenetics

32. Molecular Diagnostics in the Clinical Laboratory

33. Flow Cytometric Analysis in Hematologic Disorders

34. Myeloproliferative Disorders

35. Myelodysplastic Syndromes

36. Acute Leukemias

37. Mature Lymphoid Neoplasms

**Part VII: Hematology in Selected Populations**

38. Hematology in Selected Populations **NEW!**

**Part VIII: Cell Counting Automation**

39. Cell Counting Automation

**Part IX: Hemostasis and Thrombosis**

40. Normal Hemostasis and Coagulation

41. Hemorrhagic Coagulation Disorders

42. Thrombosis Risk Testing

43. Thrombocytopenia and Thrombocytosis

44. Qualitative Disorders of Platelets

45. Evaluation of Hemostasis

46. Monitoring Anticoagulant Therapy **NEW!**

47. Coagulation Instrumentation

Appendix: Answers to Review Questions
