Table of Contents

SECTION 1 - HISTORY
1 - History
2 - History of Spine Instrumentation - The Modern Era
3 - History of Spine Biomechanics

SECTION 2 - THE FUNDAMENTALS
4 - Differential Diagnosis of Surgical Disorders of the Spine
5 - Functional Anatomy of the Spine
6 - Muscular Support of the Spine
7 - Anatomy and Physiology of Congenital Spinal Lesions
8 - Anatomy and Pathophysiology of Acquired Spinal Disorders
9 - Neural Injury at the Molecular Level
10 - Pathophysiology of Cervical Myelopathy: Biomechanics and Deformative Stress
11 - Anatomy of Nerve Root Compression, Nerve Root Tethering, and Spinal Instability
12 - Physical and Neurological Examination
13 - Intervertebral Disc Process of Degeneration: Physiology & Pathophysiology
14 - Definition and Assessment of Dysfunctional Segmented Motion
15 - Bone Modeling and Remodeling
16 - The Biology of Spine Fusion
17 - Spine Fusion: Anatomy and Biomechanics of the Bone-Bone Interface
18 - Bone Void Fillers: Bone and Bone Substitutes
19 - Osteointegration
20 - Materials and Material Properties
21 - Biomechanical Testing
22 - Computational Modeling of the Spine
23 - Intervertebral Disc: Anatomy, Physiology, and Aging
24 - Intradiscal Pressure
25 - Fundamentals of Spine Surgery
26 - Preoperative and Surgical Planning for Avoiding Complications
27 - Patient Selection for Spine Surgery
28 - Masqueraders of Spinal Pathology
29 - Data Management
30 - Practical Anatomy and Fundamental Biomechanics
31 - Applied Anatomy of the Cervical Spine
32 - Applied Anatomy of the Thoracic and Lumbar Spine

SECTION 3 - EXTRASPINAL Anatomy and Surgical Approaches and Exposures of the Vertebral Column

33 - Occipital-Cervical Region
34 - The Cervical Spine and Cervicothoracic Junction
35 - Extraspinal Anatomy and Surgical Approaches to Thoracic Spine
36 - The Lumbar and Sacral Spine

SECTION 4 - Surgical Procedures

4.1 DECOMPRESSION AND ARTHRODESIS OF THE CERVICAL SPINE
37 - Upper Cervical and Craniocevical Decompression
38 - Upper Cervical and Occipitocervical Arthrodesis
39 - Ventral and Ventrolateral Subaxial Decompression
40 - Single and Multiple-Single Interbody Fusion Techniques
41 - Threaded Cylindrical Interbody Cage Fixation for Cervical Spondylosis and OPLL
42 - Cervical Interbody Strut Techniques
43 - Interbody Cages
44 - Cervical Laminectomy and Laminoforaminotomy
45 - Cervical Skip Corpectomy
46 - Cervical Laminoplasty
47 - Interspinous, Laminar, and Facet Fusion
48 - Combined Ventral-Dorsal Surgery
49 - Percutaneous and Minimally Invasive Approaches to Decompression & Arthrodesis of the Cervical Spine

4.2 DECOMPRESSION AND ARTHRODESIS OF THE THORACIC AND LUMBAR SPINE
50 - Ventral and Ventrolateral Spine Decompression and Fusion
51 - The Lateral Extracavitary Approach to the Thoracolumbar Spine
52 - Retropleural Approach to the Ventral Thoracic and Thoracolumbar Spine
53 - Laminotomy, Laminectomy, Laminoplasty, and Foraminotomy
54 - Posterior and Transforaminal Lumbar Interbody Fusion
55 - Anterior Lumbar Interbody Fusion
56 - Lumbar Interbody Cages
57 - Dorsal and Lateral Thoracic and Lumbar Fusion
58 - Indication for Spine Fusion for Axial Pain
59 - The Black Disc: Diagnosis and Treatment of Discogenic Back Pain
60 - Percutaneous and Minimally Invasive Approaches to Decompression and Arthrodesis of the Thoraco- Lumbar Spine
61 - Thoracoscopic Corpectomy and Reconstruction

4.3 TRAUMA
62 - Classification of Thoracolumbar Spine Fractures
63 - Trauma Surgery: Occipito-Cervical Junction
64 - Subaxial Cervical Spine Injuries
4.7 TUMORS, VASCULAR MALFORMATIONS, AND RELATED LESIONS

101 - Intramedullary Spinal Cord Lesions
102 - Intradural Extramedullary Spinal Lesions
103 - Spinal Intradural Vascular Malformations
104 - Spinal Dural Vascular Malformations
105 - Cauda Equina Syndrome
106 - Primary Bony Spinal Lesions
107 - Spondylectomy for Spinal Tumors
108 - Prognostic Factors, Surgical Outcomes, and Guidelines for Managing Metastatic Spinal Cancer
109 - Staging, Classification, and Oncologic Approaches for Metastatic Tumors Involving the Spine
110 - Metabolic Bone Disease
111 - Tumors at the Foramen Magnum: Regional Challenges
112 - Cervio-Thoracic Junction Tumors: Regional Challenges
113 - Thoracic and Thoracolumbar Spinal Tumors: Regional Challenges
114 - Sacral Tumors: Regional Challenges
115 - Tarlov Cysts

4.8 PEDIATRIC SPINAL SURGERY AND RELATED CONDITIONS

116 - Occult Spinal Dysraphism and the Tethered Spinal Cord
117 - Myelomeningocele and Associated Anomalies
118 - Anterior Sacral Menigocele
119 - Chiari Malformation and Syringomyelia
120 - Chiari Malformation, Chronic Fatigue Syndrome, and Fibromyalgia: A Paradigm for Care

4.9 ADJUNCTIVE SURGICAL CONSIDERATIONS

121 - Omental Transposition and Spine Surgery: Emphasis on Revascularization and Scar Prevention
122 - Wound Closure
123 - Bone Graft Harvesting
124 - Vascularized Bone Grafts in Spinal Surgery
125 - Pain and Spasticity
126 - Minimally Invasive Spinal Decompression and Stabilization Techniques I
127 - Minimally Invasive Spinal Decompression & Stabilization Techniques II: Thoracic and Lumbar Endoscopic Approaches
128 - Vertebroplasty and Kyphoplasty
129 - The Obese Patient
130 - Spine Surgery - Smoking and the Spine
131 - The Geriatric Patient
132 - Surgery of the Sympathetic Nervous System
133 - Arachnoiditis and Syringomyelia
134 - Post-traumatic and Idiopathic Syringomyelia
135 - Complications of Peripheral Nerve Surgery

SECTION 5 - Spinal Instrumentation
206 - Economics and Practice Management
207 - The Rationale for Practice Hygiene: Coding, Reimbursement, and Nomenclature
208 - Education of the Spine Surgeons
209 - Education and Knowledge-Base Acquisition and Retention
210 - The Art of the Clinical Trial
211 - The Meaningful Retrospective Analysis
212 - Art and Science of Guideline Formation

SECTION 11 - CONTROVERSIES

213 - Anterior Cervical Corpectomy and Fusion: To Plate or Not To Plate
   To Not Plate
   To Plate

214 - Cervical Spondylosis with Minimal Myelopathy: To Decompress or Not To Decompress
   To Decompress
   Not To Decompress

215 - Bilateral Locked Cervical Facets with Incomplete Myelopathy: Open Versus Closed Reduction
   Open Reduction
   Closed Reduction

216 - Cervical Spine Fusion: Allograft Versus Autograft
   Argument for Allograft
   Argument for Autograft

217 - Thoracic and Thoracolumbar Spine Fractures with Ventral Mass Lesion: Ventral Versus Dorsal Operation
   Ventral Decompression and Stabilization
   Dorsal Decompression and Stabilization

218 - Reoperation for Failed Spinal Fusion: Augmentation of Fusion with Spinal Stimulation
   Argument Against Bone Growth Stimulator
   Argument for Bone Growth Stimulator

219 - Management of a Patient with Thoracolumbar Fracture with Complete Myelopathy and a 40° Kyphotic Deformity: Operative or Recumbent Management
   Operative Management
   Recumbent Management

220 - Management of Symptomatic Osteoporotic Vertebral Compression
   Vertebroplasty
   Kyphoplasty

221 - Management of Ossification of Posterior Longitudinal Ligament
   Cervical Laminoplasty - Open Door
   Laminoplasty - French Door
   Laminectomy
   Ventral Approach: Smith-Robinson Approach
Ventral Approach: Open Window Corpectomy

222 - Spondylotic Myelopathy with Cervical Kyphotic Deformity
Ventral Approach

Dorsal Approach

Combined Ventral and Dorsal Approach

223 - Management of Cervical Disc Herniation
Dorsal Laminoforaminotomy Plus Discectomy
Ventral Cervical Discectomy and Fusion with Allograft or BMP and Plating
Anterior Cervical Discectomy and Fusion with Autograft and Without Plating
Anterior Cervical Discectomy with Artificial Disc

224 - Management of a 45-year old with Mechanical Low Back Pain and with or without L4/5 Spondylolisthesis and No Neurological Findings
Non-Operative Management
Spinal Fusion - Ventral Approach
Spinal Fusion - Dorsal Approach
Spinal Fusion - Dorsal & Ventral Approach
Total Disc Arthroplasty
Nuclear Replacement

225 - Management of Traumatic Unilateral Jumped Cervical Facet Joint Without Myelopathy
Closed Traction Reduction Then Surgery
Open Reduction

226 - Management of Traumatic Bilateral Jumped Cervical Facet Joints in a Patient with Incomplete Myelopathy
Closed Traction Reduction Then Surgery
Open Reduction

227 - Management of Traumatic Bilateral Jumped Cervical Facet Joints in a Patient with Complete Myelopathy
Closed Traction Reduction Then Surgery
Open Reduction

228 - Timing of Decompression Surgery for Traumatic Spinal Cord Injury in a Patient with an Incomplete Myelopathy
Postural Non-Operative Management
Emergent Surgery
Non-Emergent Surgery

229 - Timing of Decompression Surgery for Traumatic Spinal Cord Injury in a Patient with Complete Myelopathy
Postural Non-Operative Management
Emergent Surgery
Non-Emergent Surgery

230 - Medical Management of Acute Spinal Cord Injury
Administration of High-Dose Steroids
No Administration of Steroids

231 - Traumatic Central Cord Syndrome
Early Surgery

Delayed Surgery

232 - Cervical Disc Herniation with Radiculopathy
Anterior Cervical Discectomy with Interbody Fusion
Anterior Cervical Discectomy with Interbody Fusion with Plating
Anterior Cervical Discectomy with Artificial Disc Spacer
Anterior Cervical Discectomy without Fusion
(management of cervical disc herniation & cervical disc herniation with radiculopathy)
Laminoforaminotomy

233 - Traumatic Asymptomatic Vertebral Artery Injury Secondary to Facet Fracture Dislocation
Do Nothing
Endovascular Management
Medical (anticoagulation) Management

234 - Lumbar Fusion versus Total Disc Arthroplasty for Mechanical Low Back Pain
Fusion
Total Disc Arthroplasty
