

Textbook of Interventional Cardiology. Text with DVD

Topol, E

ISBN-13: 9781437723588

Table of Contents

Topol and Teirstein's Textbook of Interventional Cardiology, 6E

Table of Contents:

Section I: Patient Selection

1. Individualized Assessment for Percutaneous or Surgical Revascularization

2. Evidence-Based Practice

3. Diabetes

4. Prior Evaluation: Functional Testing, Multidetector CT

5. Renal Dysfunction

6. Preoperative Coronary Intervention

7. Gender and Ethnicity Issues

Section II: Pharmacologic Intervention

8. Platelet-Inhibitor Agents

9. Anticoagulants

10. Lipid Lowering Agents

11. Thrombolytic Intervention

12. Other Adjunctive Drugs for Coronary Intervention: Beta-Blockade, ACE Inhibitors & Calcium Channel Blockers

Section III: Coronary Intervention

13. Stents

14. Drug Eluting Balloon

15. Balloon Angioplasty: History and Current Utilization

16. Elective Intervention for Stable Angina or Silent Ischemia

17. Intervention for Non-ST Segment Elevation Acute Coronary Syndromes

18. Acute MI Intervention

19. Intervention for Cardiogenic Shock

20. Bifurcations and Branch Vessel Stenting

21. Small Vessel and Diffuse Disease

22. Left Mainstem Intervention

23. Complex and Multivessel Intervention

24. Chronic Total Occlusion

25. Bypass Graft Intervention

26. The Thrombus Containing Lesion

27. Complications of Coronary Intervention

28. Peri-Procedural MI and Emboli Protection

29. Access Site Management/Closure Devices
30. Transradial Intervention
31. The Role of the Cardiac Surgeon
32. Restenosis
33. Biodegradable Stents
34. Role of Adjunct Devices: Cutting Balloon, Laser, Ultrasound, and Atherectomy
35. Support Devices for High Risk PCI: IABP, CPS, LVAD
36. Regional Centers of Excellence for Coronary Intervention

Section IV: Peripheral Vascular Interventions

37. Lower Extremities
38. Upper Extremities (and Aortic Arch)
39. Carotid and Cerebrovascular
40. Mesenteric/Visceral Intervention
41. Renal
42. Aortic (Thoracic and Abdominal)
43. Venous Interventions
44. Stroke Centers

Section V: Intracardiac Intervention

45. Imaging for Structural Heart Disease
46. Patent Foramen Ovale and Atrial Septal Defect
47. Left Atrial Appendage Closure
48. Mitral Valve Valvuloplasty
49. Mitral Valve Repair
50. Aortic Valvular Approaches
51. Tricuspid and Pulmonary Valve Interventions
52. Hypertrophic Cardiomyopathy
53. Pericardial Interventions
54. Congenital Heart Disease
55. Future of Stem Cell Interventions

Section VI: Evaluation of Interventional Techniques

56. Qualitative and Quantitative Angiography
57. Intracoronary Doppler and Pressure Monitoring
58. Intravascular Ultrasound
59. Vulnerable Plaque and Virtual Histology
60. Optical Coherence Tomography

Section VII: Outcome Effectiveness of Interventional Cardiology

61. Medical Economics and Health Policy Issues for Interventional Cardiology
62. Quality of Care in Interventional Cardiology
63. Volume Operator and Hospital Relationships
