## Table of Contents

1. An introduction to advanced aseptic processing technology  
   James P. Agalloco and James E. Akers
2. Getting started, establishing an aseptic processing systems technology group  
   Amnon Eylath
3. Aseptic processing facility design  
   Sterling Kline
4. Innovations in aseptic processing technology  
   James P. Agalloco and James E. Akers
5. Ergonomics in enclosure design  
   Brian Smith and David Pallister
6. Design and engineeringâ€”containment applications  
   Brian Smith and David Pallister
7. Design and engineering of isolators  
   Didier Meyer
8. Definition of restricted access barrier systems  
   Joerg Zimmermann
9. Rapid transfer port system: the key element for contained enclosures in advanced aseptic processing  
   Brigitte Lechiffre and David Barbaut
10. Aseptic processing transfer systems  
    Gary Partington
11. Disposable equipment in advanced aseptic technology  
    Maik W. Jornitz and Jean-Marc Cappia
12. A comparison of capital and operating costs for aseptic manufacturing facilities  
    Jorge Ferreira, Beth Holden, Jeff Kraft, and Kevin Schreier
13. Risk assessment and mitigation in aseptic processing  
    James Agalloco and James Akers
14. Sterile product manufacture using form fill seal technologies  
    Harold Baseman
15. Genesis of the closed vial technology  
    Daniel Py and Angela Turner
16. Aseptic containment  
    Julian Wilkins
17. Points to consider filling isolator
Valerie Welter

18. Sterility test isolators—a user’s perspective
Robert J. Keller

19. Advanced aseptic processing fill finish trends: options to consider, restricted access
barrier systems, and/or isolators
Jack Lysfjord

20. Process simulation for advanced aseptic processing
James Agalloco and James Akers

21. Qualification/validation of aseptic processing environments, systems, and equipment
James P. Agalloco

22. Isolator integrity leak inspection
Scott Pool

23. Environmental monitoring of advanced aseptic processing technology
James Akers and James Agalloco

24. Decontamination of advanced aseptic processing environments
James Agalloco and James Akers

25. Hydrogen peroxide gas decontamination
James R. Rickloff

26. Isolation technology: hydrogen peroxide decontamination
David Watling

27. Single-injection vapor-phase hydrogen peroxide decontamination of isolators
and clean rooms
K. Imai, S. Watanabe, Y. Oshima, M. Kokubo, and J. Akers

28. Chlorine dioxide decontamination/sterilization
Mark A. Czaneski

29. Current expectations for aseptic processing: a regulatory perspective
Rick Friedman

30. The evolution of advanced aseptic processing for pharmaceutical manufacturing:
perspectives of a regulatory scientist
David Hussong

31. A perspective on European regulations for advanced aseptic processing
James P. Agalloco and James E. Akers

32. Advanced aseptic processing technologies in Japan
Tsuguo Sasaki and Morihiko Takeda

33. Pilot plants and isolation technology
James P. Agalloco

34. Highly automated isolator-based vaccine filling—a case study
35. Technological advancements in aseptic processing and the elimination of contamination risk
James E. Akers and Yoshi Izumi

36. Radiopharmaceutical filling line
Frank Mastromonica and Simon Steingart

37. Powder handling installation for high potent bulk pharmaceutical ingredients
Bert Brabants

38. Isolator technology for aseptic filling of anti-cancer drugs
Paul Martin

39. RABS case study
Joerg Zimmermann

40. Innovation in aseptic processing: case study through the development of a new technology
Benoit Verjans

41. Isolated robotics
Chris Procyshyn

42. The future of aseptic processing
James P. Agalloco and James E. Akers
