Table of Contents

"Postmodern" Medicine: Teaching Patients to Be Responsible for Their Health
Adherence to Exercise
The Exercise Prescription and Adherence

Curing, Healing, and Maintaining Health
High Blood Pressure: The Silent Killer
Background
Classification of Hypertension according to Cause
Evaluation of Individuals with High Blood Pressure
Complications of Hypertension
Classification of Hypertension
Management
Follow-up of Persons with Hypertension
Non-pharmacological Treatment of Hypertension
Exercise Issues
Exercise Prescription for Patients with High Blood Pressure
Weight Training Guidelines for High Blood Pressure
Recommended Reading
Exercise Prescription for High Blood Pressure
Common Questions on High Blood Pressure (a Patientâ€™s Perspective)

Diabetes
Background
Classification of Diabetes
Management
A Brief History of Treatment Strategies for Patients with Type 2 Diabetes
Initiation of Treatment
Exercise Issues
Summary
Weight Training Guidelines for Diabetics
Recommended Reading
Exercise Prescription for Diabetes
Common Questions on Diabetes (a Patientâ€™s Perspective)

Kidney Disease
Background
Management
Exercise Issues
Benefits of Exercise
Weight Training Guidelines in Kidney Disease
Recommended Reading
Exercise Prescription for Kidney Disease
Common Questions on Kidney Disease (a Patientâ€™s Perspective)

Heart Diseases
Coronary Artery Disease: The Number One Killer
Weight Training Guidelines for Heart Disease
Recommended Reading
Exercise Prescription for Heart Disease
Common Questions on Heart Disease (a Patientâ€™s Perspective)
Congestive Heart Failure
Recommended Reading
Exercise Prescription for Congestive Heart Failure
Valvular Disease
Recommended Reading
Exercise Prescription for Valvular Disease.
Hypertrophic Cardiomyopathy
Recommended Reading
Exercise Prescription for Hypertrophic Cardiomyopathy
Cardiac Arrhythmias and Pacemakers
Recommended Reading
Exercise Prescription for Arrhythmias.
Exercise Prescription for Patients with Pacemakers.

Lung Diseases
Chronic Lung Disease
Restrictive Disease
COPD
Cystic Fibrosis
Cor-pulmonale
Asthma
Weight Training Guidelines for Lung Disease
Recommended Reading
Exercise Prescription for Chronic Lung Disease and Asthma
Common Questions on Lung Disease (a Patient’s Perspective)

Obesity
Introduction
Defining the Metabolic Syndrome
Weight Training Guidelines for Obesity
Recommended Reading
Exercise Prescription for Obesity.
Common Questions on Obesity (a Patient’s Perspective)

Vascular Disease
Background
Pathogenesis
Pharmacological Treatment
Diet and Exercise Management
Peripheral Vascular Disease
Exercise Issues.
Weight Training Guidelines for Peripheral Vascular Disease
Recommended Reading
Exercise Prescription for Peripheral Vascular Disease
Common Questions on Peripheral Vascular Disease (a Patient’s Perspective)

Osteoporosis and Arthritis
Osteoporosis
Arthritis
Weight Training Guidelines for Osteoporosis and Arthritis
Recommended Reading
Exercise Prescription for Osteoporosis and Arthritis
Common Questions on Osteoporosis (a Patient’s Perspective)

Cancer, the Immune System, and AIDS
Cancer
AIDS
Anxiety and Depression in Patients with Cancer and HIV Infections
Exercise and Cancer
Exercise and the Immune System
Cachexia.
Weight Training Guidelines in Chronic Infections
References
Recommended Reading
Exercise Prescription for Chronic Infections: Cachexia, AIDS, and Cancer
Common Questions on Diseases of the Immune System (Chronic Infections, Cachexia, and AIDS) (a Patient’s Perspective)

The “Golden Years”
Exercise in the Healthy Elderly
Weight Training Guidelines during the Golden Years
Recommended Reading
Exercise Prescription during the Golden Years

The Physically Inactive
Exercise Recommendations for Healthy but Physically Inactive Individuals
Weight Training Guidelines for Physically Inactive Individuals without Disease
Recommended Reading
Exercise Prescription for Physically Inactive Individuals without Disease
Pregnancy
Background
Management
Managing the Pregnant Athlete
Exercise Issues
Weight Training Guidelines during Pregnancy
Recommended Reading
Exercise Prescription during Pregnancy

Wheelchair-Dependent Patients
Background
Exercise Issues
Weight Training Guidelines for Wheelchair-Dependent Patients
Recommended Reading
Exercise Prescription for Wheelchair Dependency
(Quadriplegia) Functional Electrical Stimulation
Exercise Prescription for Wheelchair Dependency (Paraplegics)

Prepubescent Children
Healthy Children
Weight Training Guidelines for Children
Reference
Recommended Reading
Exercise Prescription for Prepubescent Children

Appendices
Appendix A: Exercise Prescriptions and "the Charts"
Method 1: The Age-Predicted Method
Method 2: Heart Rate Reserve, or Karvonen Method
Method 3: The Rate Pressure Product Method
Method 4: Systolic Blood Pressure Method
Method 5: The Charts
Method 6: Maximal Oxygen Consumption (the VO₂ max or Maximal Functional Capacity)
Method 7: The Anaerobic Threshold
Method 8: Ventilation
Method 9: The VO₂ Reserve
Method : Weight-Lifting Formula

Appendix B: Exercise Testing
Medical Screening Prior to Exercise
Cardiac Stress Testing
Cardiopulmonary Stress Testing
Exercise Testing for People with Common Cardiopulmonary Problems
References
Exercise Prescription

Appendix C: Training Injuries
Cardiocirculatory System.
Endocrine System
Eyes
Gastrointestinal System
Hematologic System
Muscular Pain or Injury
Musculoskeletal System
Overuse Injuries
Tendinitis
Nerve Entrapment
Pulmonary
Skin
Urinary System
Thermal Injuries
Recommended Reading
