Table of Contents

Guidelines to Process Validation
Gail Sofer
Hal Baseman
Applications of Failure Modes and Effects Analysis to Biotechnology Manufacturing Processes
Robert J. Seely and John Haury
Process Characterization
James E. Seely
Scale-Down Models for Purification Processes: Approaches and Applications
Ranga Godavarti, Jon Petrone, Jeff Robinson, Richard Wright, Brian D. Kelley, and Glen R. Bolton
Adventitious Agents: Concerns and Testing for Biopharmaceuticals
Raymond W. Nims, Esther Presente, Gail Sofer, Carolyn Phillips, and Audrey Chang
Lifespan Studies for Chromatography and Filtration Media
Anurag Rathore and Carol Sofer
Validation of a Filtration Step
Jennifer Campbell
Analytical Test Methods for Well-Characterized Biological and Biotechnological Products
Nadine Ritter, Ph.D and John McEntire, Ph.D.
Facility Design Issues: A Regulatory Perspective
Sue Vargo
Validation of Computerized Systems
Monica J. Cahilly
Process Validation with a CMO
Susan Dana Jones, Sheila G. Magil, and Gail Sofer
Risk Management & Validation
James Agalloco
Process Validation in Membrane Chromatography
Suma Ray, Miyako Hirai, and Stefan Fischer-Forheholz
Leveraging Multivariate Analysis Tools to Qualify Scaled-Down Models
John Pieracci and Helena Yusuf-Makagiansar
Process Validation of a Multivalent Bacterial Vaccine: A Novel Matrix Approach
Validation of the Zevalin® Purification Process: A Case Study
Lynn Conley, John McPherson, and Jörg Thömmes
Viral Clearance Validation: A Case Study
Michael Rubino, Mark Bailey, Jeffrey C. Baker, Jeri Ann Roose, Lorraine Metzka, Valerie Moore, Michelle Quertinmont, and William Wiler
