

# Genes, Memes, Culture, and Mental Illness

Leigh, Hoyle

ISBN-13: 9781441956705

## Table of Contents

### Part I. What Is Mental Illness? An Epigenetic Model

#### 1. Genes and Mental Illness

##### 1.1. The Evolution of the Concept of Mental Illness

##### 1.2. Gene-Environment Interaction and Brain Morphology and Function

##### 1.3. Gene-Environment Interaction: Serotonin Transporter Gene as an Exemplar

##### 1.4. Emerging Model of Mental Illness: Gene x Meme Interaction

#### References

#### 2. How Does Stress Work? The Role of Memes in Epigenesis

##### 2.1. Stress, Aging, and Disease

##### 2.2. Stress, Memes, and the Brain

##### 2.3. Role of Stress and Nurturing in Development: Epigenesis

##### 2.4. Environment Changes Epigenome

##### 2.5. Memes and Epigenesis

##### 2.6. Stress Awakens Dormant Memes Resulting in Mental Illness

#### References

#### 3. Culture and Mental Illness

##### 3.1. Culture and Presenting Symptoms

##### 3.2. Culture-Specific Psychiatric Syndromes

##### 3.3. Enculturation and Memes

##### 3.4. Memes for Being Ill

#### References

#### 4. Genetic-Memetic Model of Mental Illness - Migration and Natural Disasters as Illustrations

##### 4.1. Migration

##### 4.2. Natural Disasters

#### References

### Part II. Evolution and Mental Health: Genes, Memes, Culture, and the Individual

#### 5. What Do We Inherit from Our Parents and Ancestors?

##### 5.1. Like Parent, Like Child

##### 5.2. How Does Culture Affect Behavior?

##### 5.3. Memes and Cultural Change

##### 5.4. Memeplexes

#### References

#### 6. Genes

##### 6.1. Human Genes

##### 6.2. Mendelian Genetics

##### 6.3. Genes and Mutation

##### 6.4. Sex-Linked Genes

##### 6.5. Polygenic Inheritance

##### 6.6. How Do Genes Work?

#### References

#### 7. Evolution

##### 7.1. In the Beginning

##### 7.2. In a Changing, Hostile World

##### 7.3. The Selfish Gene

##### 7.4. Wonderful Random Errors

##### 7.5. Wonderful Invention of Sex

##### 7.6. Darwin and Natural Selection

##### 7.7. Somatic Evolution

##### 7.8. Universal Darwinism

#### References

#### 8. Learning, Imitation, and Memes

##### 8.1. Evolution of Complex Organisms

##### 8.2. Trial and Error

##### 8.3. Learn or Perish

##### 8.4. Imitation, Shortcut to Learning

##### 8.5. Coevolution of the Brain and Memes

##### 8.6. Empathy and Mirror Neuron System

## **8.7. Meme Generation and Meme Infection**

## **8.8. What Is a Meme?**

### **References**

## **9. Storage and Evolution of Memes in the Brain**

### **9.1. Implicit Memory**

#### **9.1.1. Implicit Memory**

#### **9.1.2. Explicit Memory**

#### **9.1.3. Learned Fear**

#### **9.1.4. Learning Safety**

#### **9.1.5. Working Memory**

### **9.2. Evolution of Memes in the Brain and the Brain Code**

### **References**

## **10. External Storage of Memes: Culture, Media, Cyberspace**

### **10.1. Niche Culture**

### **10.2. How Memes Jump Brains**

### **10.3. Communication and Memes**

### **10.4. Memes as a Paradigm Shift in Evolution and Extraterrestrial Diffusion of Memes**

### **10.5. Cyberspace and Extracerebral Memes**

### **10.6. Implication of Liberation of Memes from Brains**

### **References**

## **11. Culture and the Individual**

### **11.1. Culture as Memetic Niches**

### **11.2. Individual Brain in a Petri Dish of Culture**

### **11.3. Memes, Culture, and Anthropology**

### **11.4. Dominant and Nondominant Memes in Cultures, Zeitgeist, Devious Memes**

### **11.5. Pathologic Memes**

#### **11.5.1. Memes That Inhibit or Attenuate the Brain's Executive (Ego) Function: Tradition and Prejudice**

#### **11.5.2. Memes That Are Devious, Entering Under False Pretenses, Then Causing Disease or Destruction**

#### **11.5.3. Memes that Replicate Virulently, Often Bypassing the Executive Function**

#### **11.5.4. Memes that Are Virulent Because They Arouse Passion, Bypassing Executive Function**

#### **11.5.5. Memes that Cause an Indolent Infection, to Become Virulent Later**

### **11.6. Protective Memes and the Placebo Effect**

### **11.7. How Memes Come in Under the Radar**

### **11.8. Spread of Memes**

### **11.9. Internal Processing of Memes and Consciousness: Thinking as Meme Manipulation**

### **11.10. Free Will**

### **11.11. The Unconscious, Collective Unconscious, Freudian Unconscious**

### **11.12. Selfplex and the Shadow: We Are All Multiple Personalities**

### **11.13. Transcendence**

### **11.14. The Individual as a Pawn in the War of Memes**

### **References**

## **12. What Is Mental Health?**

### **12.1. Normality and Health**

### **12.2. Gene X Meme Interaction and Mental Health**

### **12.3. Neurobiology of Pleasure, Punishment, and Inhibition**

### **12.4. Mental Health: A Democracy of Memes**

### **References**

## **13. What Is Mental Illness?**

### **13.1. Unhappiness**

### **13.2. Memes and Mental Illness**

### **13.3. Culture and Mental Illness**

### **13.4. Mental Illness and Psychiatric Syndromes**

### **References**

## **Part III. Principles of Diagnosis and Treatment of Mental Illness**

## **14. Psychiatric Diagnosis: Toward a Memetic-Epigenetic Multiaxial Model**

### **14.1. Psychiatric Diagnosis and Problems with DSM**

### **14.2. What Is Diagnosis?**

### **14.3. Psychiatric Diagnosis: Dysregulation and Final Common Pathway Syndromes, Resurrection of Neurosis**

### **14.4. Proposal for a New DSM Scheme**

#### **14.4.1. Axis I: Memetic/Phenomenological (Neurophysiomemetic) Diagnosis: Psychiatric Syndromes, Symptoms, and Traits, Based on Deviations of Normal Brain Function**

#### **14.4.2. Axis II: Geno-Neuroscience Diagnosis: Genes (Including Family History of Psychiatric Illness), Brain Morphology, Biochemistry and Pathology, Functional Changes and Conditions Potentially Influencing Axis I**

#### **14.4.3. Axis III: Medical Diseases and Conditions**

#### **14.4.4. Axis IV: Stresses: Childhood, Recent, and Current**

#### **14.4.5. Axis V: Psychosocial Assets and Recent/Current Functioning**

#### **14.4.6. Axis VI: Biopsychosocial and Epigenetic Formulation**

### **14.5. An Illustrative Case**

## References

### 15. Memetic Diagnosis, Memetic Assessment and Biopsychosocial Epigenetic Formulation

- 15.1. Memetic Diagnosis
- 15.2. Memetic Assessment
- 15.3. Conscious Memes
- 15.4. Unconscious Memes
- 15.5. Priming Factors and Role Models
- 15.6. The Need for New Memetic Diagnostic Tools

## References

### 16. Principles of Memetic Therapy

- 16.1. Blocking the Entrance and Induction of Pathogenic Memes
- 16.2. Treating Memes in the Brain
  - 16.2.1. Identifying Pathogenic Memes and Memeplex Components
  - 16.2.2. Identifying Capsules and Vehicles
  - 16.2.3. Neutralizing Capsules and Vehicles
  - 16.2.4. Deconstructing and Suppressing Memes
  - 16.2.5. Augmenting Protective Memes
- 16.3. Conventional Meme-Directed Therapies
- 16.4. Need for Novel Therapies

## References

### 17. Broad-Spectrum Memetic Therapies

- 17.1. What is Broad-Spectrum Meme-Oriented Therapy?
- 17.2. Sleep, Sedation, and Electroconvulsive Therapy
- 17.3. Relaxation and Meditation
- 17.4. Hypnosis
- 17.5. Music and Dance Therapy
- 17.6. Massage Therapy
- 17.7. Exercise
- 17.8. Bibliotherapy

## References

### 18. Specific Memetic Therapies

- 18.1. Psychotherapies as Memetic Therapies
- 18.2. Behavior Therapy, Dialectical Behavior Therapy (DBT), Cognitive-Behavioral Therapy (CBT), Rational Emotive Behavioral Therapy (REBT), Interpersonal Therapy (IPT)
- 18.3. Psychodynamic Psychotherapy
- 18.4. Toward a United, Integrated Memetic Concept of Psychotherapy
- 18.5. Need for New Meme-Literate Psychotherapies

## References

### 19. Genetic-Memetic Prevention

- 19.1. Epigenesis in Prevention
- 19.2. Early Diagnosis and Treatment of Vulnerable Children
- 19.3. Early Protection from Pathogenic Memes
- 19.4. Vaccination
- 19.5. Education
- 19.6. Gene-Meme Cooperation vs. Gene-Meme Conflict: "Mind" and "Body"

## References

## Part IV. Specific Psychiatric Syndromes

### 20. Overview of Specific Syndromes

- 20.1. Introduction
- 20.2. Gene-Meme Symbiosis and Mental Illness
- 20.3. Toward a Dimensional Approach in Identifying and Treating Mental Illness

### 21. Attention-Cognition Spectrum Syndromes: Delirium, Dementia, Impulse Control Syndromes, ADHD, Antisocial Personality, Obsessive-Compulsive Personality Traits, Obsessive-Compulsive Syndrome

- 21.1. Gene x Meme Interaction, Evolutionary Adaptation, and Syndromes
  - 21.1.1. Global Dysregulation of Meme Processing: Delirium and Dementia
  - 21.1.2. Dysregulation of Infrastructure for Meme Processing: Attention-Deficit Disorder (ADHD), Impulse and Aggression Dyscontrol, Antisocial Personality
  - 21.1.3. Dysregulation of Meme-Processing Loop: Preoccupations, Obsessions, Compulsions
- 21.2. Treatment

## References

### 22. Anxiety-Mood Spectrum Syndromes: Anxiety, Panic, Phobias, ASD, PTSD, Borderline Syndrome, Dependent and Avoidant Personalities, Social Phobia, Bipolarity and Mania, Depression - Neurotic and Syndromic, Adjustment Disorders

- 22.1. Gene x Meme Interaction, Evolutionary Adaptation, and Syndromes
  - 22.1.1. Anxiety
  - 22.1.2. Panic Syndrome and Agoraphobia
  - 22.1.3. Specific Phobias
  - 22.1.4. Acute Stress and Posttraumatic Stress Syndromes

- 22.1.5. Borderline Syndrome and Traits
- 22.1.6. Dependent Personality Traits and Syndrome
- 22.1.7. Avoidant Personality Traits and Syndrome, Social Phobia
- 22.1.8. Bipolarity and Mania
- 22.1.9. Depression - Neurotic and Major Depressive Syndrome
- 22.1.10. Adjustment Disorders
- 22.2. Treatment
  - 22.2.1. Prevention
  - 22.2.2. Mild Symptoms (Problems of Living and Adjustment Reactions)
  - 22.2.3. Neurosis
  - 22.2.4. Major Syndromes

References

**23. Reality Perception Spectrum Syndromes (Imagination, Dissociation, Conversion, Somatoform, Misattribution Somatization, Psychosis)**

- 23.1. Gene x Meme Interaction and Evolutionary Adaptation
  - 23.1.1. Imagination and Dreaming
  - 23.1.2. Dissociation
  - 23.1.3. Dissociative Identity Disorder (DID, Multiple Personality)
  - 23.1.4. Misattribution Syndromes: Conversion, Somatization, Hypochondriasis, Chronic Pain (Somatoform Disorders)
  - 23.1.5. Psychosis
  - 23.1.6. Schizophrenia
- 23.2. Treatment
  - 23.2.1. Mild Dissociative Symptoms, Dissociation in Borderline Syndrome, PTSD
  - 23.2.2. Dissociative Identity Disorder (DID, Multiple Personality Syndrome)
  - 23.2.3. Misattribution Syndromes: Conversion, Somatization, Hypochondriasis, Chronic Pain, Fibromyalgia, etc
  - 23.2.4. Psychosis and Schizophrenia

References

**24. Pleasure Spectrum Syndromes (Substance Use/Abuse, Addictions to Substances and Beliefs, Fanaticism)**

- 24.1. Gene x Meme Interaction, Evolutionary Adaptation, and Syndromes
  - 24.1.1. Substance Use/Abuse
  - 24.1.2. Addictions to Substances and Beliefs, Fanaticism
- 24.2. Treatment

References

**25. Primary Memetic Syndromes: Eating Disorders, Factitious Disorders, Malingering, Meme-Directed Destructive Behaviors**

- 25.1. Gene x Meme Interaction, Evolutionary Adaptation, and Syndromes
  - 25.1.1. Eating Disorders
  - 25.1.2. Destructive Meme Infections and Epidemics: Mass Hysteria, Factitious Illness, Suicide, Suicide Bombing, Aggression
  - 25.1.3. Irrational Beliefs and Delusions
- 25.2. Treatment

References

**26. Challenges for the Future**

- 26.1. Genes and Memes - How to Achieve a Peaceful Coexistence
- 26.2. Need for New Diagnostic and Therapeutic Approaches and Tools
- 26.3. Testable Hypotheses of Gene x Meme x Environment Interaction
- 26.4. Memes, Social Sciences, and Neuroscience
- 26.5. Ethical Considerations
- 26.6. Post-human Evolution of Memes
