

# Statistics and Data Analysis for Financial Engineering

Ruppert, David

ISBN-13: 9781441977861

## Table of Contents

Introduction.  
Returns.  
Fixed income securities.  
Exploratory data analysis.  
Modeling univariate distributions.  
Resampling.  
Multivariate statistical models.  
Copulas.  
Time series models: basics.  
Time series models: further topics.  
Portfolio theory.  
Regression: basics.  
Regression: troubleshooting.  
Regression: advanced topics.  
Cointegration.  
The capital asset pricing model.  
Factor models and principal components.  
GARCH models.  
Risk management.  
Bayesian data analysis and MCMC.  
Nonparametric regression and splines.
