Table of Contents

1. Getting Started: Possibilities and Decisions
   Getting Started in Research
   The Situation
   Interaction I - The Couple: Romance, "Just Friends" or Doing Business?
   Interaction II - The Group: Collaboration or Conflict: Business or Pleasure?
   Interaction III - The Topic Turns to the Media
   Basic Assumptions Behind Communication Research
   Some Research Possibilities: What Can We Do with an Ad?
   Does the Advertisement Work?
   What Can Readers and Viewers Tell Us?
   What Can the Content Tell Us?
   What Can the Creators of the Ad Tell Us?
   A Series of Unavoidable Decisions
   The Field of Study - Wide or Narrow?
   The Researcher - Dispassionate or Involved?
   The Approach - Objective or Subjective?
   The Sample - Large or Small?
   The Data - Quantitative or Qualitative?
   The Report - Subjective or Objective?
   Problem Posing, Problem Solving, Peer Persuasion
   Problem Posing
   Problem Solving
   Peer Persuasion
   Ethics Panel: A Health Communication Dilemma
   Research Example: Three Views of Pharmaceutical Advertising
   Content Analysis: A Descriptive Perspective
   Content Analysis: A Critical Perspective
   Content Analysis: A Policy Perspective

   Starting with the "What" Question: Ideas and Observations
   Induction
   Deduction
   Abduction
   Starting with the "Why" Question: Goals and Values
   Exploration
   Explanation
   Prediction
   Control
   Interpretation
   Criticism
   Starting with the "How" Question: Methods and Epistemologies
   Starting with a World View: Basic Beliefs
   Starting from the Work of Others
   Firming Up Questions
   Hypotheses: Making Predictions
   Research Questions: Less Certainty; More Room to Move
   Questioning the Questions
   Starting with No Questions
   Ethics Panel: Do Some Research Methods Have More Ethical Implications than Others?

3. Ethics: What Are My Responsibilities as a Researcher?
   Introduction: Some Ethical Decisions
   Sex, Violence and Deception
   Money and Relationships
   Issues in Communication Research
   Honesty
   Confidentiality and Anonymity
   Making Generalizations
   Debriefing
   The Literature Review
   Acknowledging Others
   Appropriate Language
   Plagiarism
   Some Classic Ethical Positions
   Contemporary Codes of Ethics
   The Nuremberg Code
   The Declaration of Helsinki
   The Belmont Report
   Regulations
   Peer Review and Institutional Review Boards
   What Should I Call You? The Ethics of Involvement
   Oh Brave New World! That Has Such Creatures in It: The Internet and Research Ethics
What IS the Internet?
Anonymity and Identification on the Internet
Informed Consent on the Internet
Basic Guidelines for Internet Research
Ethics Panel: Tainted Data, Deception and Virtual Research
4. Reading Research: To Boldly Go Where Others Have Gone Before
Library Research: Why Bother?
Methods
Ethics
Language and Style
Inspiration
Finding Relevance: Finding Quality
How Do I Find Relevant Information?
How Do I Find Quality Information?
Databases Versus Search Engines
Scholarly, Popular and Trade Publications: What Is the Difference?
How Will I Know a Scholarly Article When I See One?
Primary Versus Secondary Sources
The Champagne Model of Bibliographic Research
Search Terms and Search Fields
How Can the Library of Congress Help My Literature Search?
Other Resources
How to Be Skeptical About Information, Especially Web Information
Stage One: Think Book or Journal
Stage Two: Additional Questions for Websites
Mr Boole and the Three Bears
Saving Your Search Results
Information You Must Record
Information You Should Record
Writing Your Search Results: The Literature Review
Questions of Style
Ethics Panel: Politics and Publication
5. Measurement: Research Using Numbers
What Do Your Head Size, Attitudes and Readability Have in Common?
An Introduction to Scales
Research NOIR
Nominal Measurement
Ordinal Measurement
Interval Measurement
Ratio Measurement
NOIR in Action
To NOIR Is Not Enough: Reliability and Validity
Test-retest
Inter-coder or Observer Reliability
Inter-item or Internal Reliability
Validity
Content Validity: Looks OK
Construct Validity: Theoretically OK
Criterion Validity: Tests OK
Who Wins in the Reliability-Validity Shootout?
Two Common Measurement Scales
The Likert Scale
The Semantic Differential Scale
Ethics Panel: The Ethics of Measurement Scales
6. Summarizing Research Results: Data Reduction and Descriptive Statistics
Introduction
Data Reduction
Data Reduction and Univariate Data
Data Reduction and Bivariate Data
Data Reduction and Multivariate Data
Measures of Central Tendency: Mean, Mode, Median
Measures of Dispersion: Minimum, Maximum, Range, Interquartile Range, Variance and Standard Deviation
Minimum, Maximum, Range, Interquartile Range
Variance and Standard Deviation
Variance: Formula
Standard Deviation: Formula
Variance and Standard Deviation: Example
Z-Score
Z-Score: Formula
Z-Score: Example
The Chi-Square Test
Chi-Square: Formula
Chi-Square: Example
The Language of Curves
Ethics Panel
7. Generalizing from Research Results: Inferential Statistics
Introduction
Generalizing from Data: Inferential Statistics
The Return of Standard Deviation
Confidence Level, Sampling and the Normal Curve
Confidence Level and Sample Size
Testing for Differences Between and Among Groups
The t Test
t Test: Formula
t Test: Example
Another Type of t
Analysis of Variance (ANOVA)
ANOVA: Formula
ANOVA: Example
Testing for Relationships Among Variables
Correlation
Regression
Paths, Partials and Parts
The Final Decision
Ethics Panel: A Communicative Tension

Introduction
Non-Probability Sampling
Convenience Sampling
Purposive / Judgmental Sampling
Quota Sampling
Network / Snowball Sampling
Volunteer Sampling
Probability Sampling
Systematic Sampling
Multistage Cluster Sampling
So How Big Does My Sample Have to Be?
Sample Size: Purpose
Sample Size: Formula
Sample Size: Examples
Some Issues with Sampling Frames
Postal Address Sampling Frames
Phone Directory Sampling Frames
Internet Sampling Frames
Special Population Sampling
Ethics Panel: Checking the Ethics of Survey Research

9. Surveys: Putting Numbers on Opinions
Introduction: Advantages and Disadvantages of Surveys
Types of Surveys
Cross-Sectional
Trend
Panel
Cohort
Cross-Lagged
Writing and Formatting Questions
Open-Ended Questions
Dichotomous Questions
Multiple Choice Questions
Likert Scale
Semantic Differential Scale
Survey Wording
Common Problems with Wording
Leading Questions
Double-Barreled Questions
Negative Wording
The Double Negative
Language
Guiding Respondents through Surveys
Filter Questions and Instructions
Surveys and the Web
Improving Survey Response Rates
Capturing and Processing Survey Data
Using Other People’s Surveys
Research in Practice
Ethics Panel: Clients and Methods as Ethical Decisions

10. Experiments: Researching Cause and Effect
Introduction: Advantages and Disadvantages of Experiments
Field Experiments and Ex Post Facto Designs
Basic Experimental Design
One Group Pre-test Post-test Design
Designing for Control
Two Groups Pre-test Post-test Design
Designing for Random Assignment
Two Groups Random Assignment Pre-test Post-test Design
The Solomon Four Group Design
Time Series Analysis
Factorial Designs
Between-Subjects and Within-Subjects Design
Validity and Experimental Design
Manipulation Checks
Ethics Panel: Two Famous and Controversial Experiments
Stanley Milgram's Experiments on Authority
Philip Zimbardo's Stanford Prison Experiment (S.P.E.)

11. Watching and Listening: Qualitative Research for In-Depth Understanding
Introduction: Advantages and Disadvantages of Watching and Listening Methods
Qualitative and Quantitative: Similarities and Differences
Watching and Listening Methods
Interviews
Interview Structure
Interview Setting
Interview Sensitivities
Interview Sequence
Interview Question Types
Interview Question Prompts
Focus Groups
Ethnographic Methods
Basic Researcher-Participant Relationships
Ethnographic Starting Points
Observational Studies
Unobtrusive Measures
Conversation Analyses and Case Studies
Making Sense of Qualitative Data
Fixed Coding
Flexible Coding
Drowning in Data? Software to the Rescue
Ethics Panel: In Which a Professor Becomes a Student

12. Content Analysis: Understanding Text and Image in Numbers
   Introduction: Advantages and Disadvantages of Content Analysis
   A Basic Content Analysis
   Research Questions
   Content to Be Analyzed
   Sampling
   Select Units for Coding
   Develop a Coding Scheme
   Assign Each Occurrence of a Unit to a Code in the Coding Scheme
   Count Occurrences of the Coded Units and Report Their Frequencies
   Content Analysis of Human Interaction
   Content Analysis Software
   Ethics Panel: Could Analyzing Media Content Result in Harm?

13. Rhetorical and Critical Analyses: Understanding Text and Image in Words
   Introduction: Advantages and Disadvantages of Qualitative Analyses of Content
   Rhetorical Analyses
   Aristotelian Analysis
   Dramatic Analysis
   Fantasy Theme Analysis
   Narrative Analysis
   Metaphor Analysis
   Discourse Analysis
   Conversation Analysis
   Utterances
   Adjacency Pairs
   Question - Answer
   Offer - Rejection
   Compliment - Acceptance
   Greeting - Greeting
   Preference Organization
   Turn Taking
   Repair Mechanisms
   Semiotics
   Semiotic Thinking: The Tobacco King, Rest Rooms and Sleeping Policemen
   Roman Jakobson Visits Sam's Car Lot
   Critical Analyses
   Ethics Panel: Research as Manipulative Practice

14. Writing and Presenting Research
   Introduction
   The Writing Process
   Writing for Scholarly Publics
   Format
   Style
   Voice
   Writing for Other Publics: Interest Groups and News Media
   Interest Groups
   News Media
   The Editorial Process
   The Ethics of Style and Accuracy
   Presenting for Scholarly Publics: Conferences and Panels
   An FYI on PPT
   Some Communication Guidelines
   Ethics Panel: Balancing Between Scholarly and Popular Writing
