Koss's Cytology of the Urinary Tract with Histopathologic Correlations

Koss, Leopold G.

Table of Contents

Chapter 1- Introduction
Chapter 2- Indication, Collection and Laboratory Processing of Cytologic Samples
Chapter 3- The Cellular and Acellular Components of the Urinary Sediment
Chapter 4- The Cytologic Makeup of the Urinary Sediment
Chapter 5- Cytologic Manifestations of Benign Disorders Affecting Cells of the Lower Urinary Tract
Chapter 6- Tumors of the Bladder Non-Neoplastic Changes
Chapter 7- Immunohistochemistry, Immunocytochemistry and Other Methods of Detection of Bladder Neoplasms

Introduction

US FDA-approved Markers Potential Markers in Earlier Phases of Clinical Development
Markers Detected by Immunocytochemistry

Comparison between Urine Cytology and FDA-approved Markers

References Chapter 4-

The Cytologic Makeup of the Urinary Sediment According to the Collection Technique

Voided urine Cytologic Makeup of Bladder Washings

Cytologic Makeup of Normal Specimens Obtained by Retrograde Catheterization

Cytologic Makeup of Smears Obtained by Brushing

Cytologic Makeup of Ileal Bladder Urine

Cytologic Makeup of Bladder Washings

Cytologic Makeup of Normal Specimens Obtained by Retrograde Catheterization

Components of the Urinary Sediment

Suggested Reading

Chapter 6-

Tumors of the Bladder

Non-Neoplastic Changes

Hyperplasia

Inverted papilloma

Urothelial (Transitional) Cell Tumors

Epidemiology Classification and natural history

Types of Urothelial Tumors

A. Papillary Urothelial Neoplasms

I. Tumors with No/Minimal Nuclear Atypia Papilloma, PUNLMP, low grade Papillary Urothelial Carcinoma

II. High-Grade Papillary Urothelial Carcinoma

B. Nonpapillary Urothelial Tumors

I. Invasive Urothelial Carcinomas

II. Flat Carcinoma

In Situ (IUN III): Clinical Presentation, Histology

Histologic Variants of Urothelial Carcinoma Metastatic Tumors

Cytologic Monitoring of Patients Treated for Tumors of Lower Urinary Tract

Reporting of cytologic findings

Suggested Reading

Chapter 7-

Immunohistochemistry

Immunocytochemistry

Other Methods of Detection of Bladder Neoplasms

Introduction

US FDA-approved Markers

Potential Markers in Earlier Phases of Clinical Development

Markers Detected by Immunocytochemistry

Comparison between Urine Cytology and FDA-approved Markers
