Chapter 20: Spatially Resolved Refractometry: Principles and Application of the Emory Vision InterWave Aberrometer
Jonathan D. Carr, MD, MA, FRCOphth; Herina Lichter, MD; Jose Garcia, BS; R. Doyle Stulting, MD, PhD; Keith P. Thompson, MD; and P. Randall Staver, MS

Chapter 21: Comparing Wavefront Devices
Daniel S. Durrie, MD and Erin D. Stahl

Section III Wavefront Customized Corneal Ablation
Basic Science Section
Chapter 22: Physics of Customized Corneal Ablation
David Huang, MD, PhD
Chapter 23: Technology Requirements for Customized Corneal Ablation
Ronald R. Krueger, MD, MSE
Chapter 24: Eye Tracking and Alignment in Refractive Surgery: Requirements for Customized Ablation
Natalie Taylor, PhD and Winfried Teiwes, Dr Ing
Chapter 25: Wound Healing in Customized Corneal Ablation: Effect on Predictability, Fidelity, and Stability of Refractive Outcomes
Joel A.D. Javier, MD; Puwat Charukamnoetkanok, MD; and Dimitri T. Azar, MD

Clinical Science Section
Chapter 26: Customized Ablation Using the Alcon CustomCornea Platform
George H. Pettit, MD, PhD; John A. Campin, BSc; Marguerite B. MacDonald, MD; and Ronald R. Krueger, MD, MSE
Chapter 27: Customized Ablation Using the VISX WaveScan System and the VISX S4 ActiveTrak Excimer Laser
Junzhong Liang, PhD and Douglas D. Koch, MD
Chapter 28: Customized Ablation Using the Bausch & Lomb Zyoptix System
Scott M. MacRae, MD; Steven Slade, MD; Daniel S. Durrie, MD; and Ian Cox, PhD
Chapter 29: Customized Corneal Ablation Using the Carl Zeiss Meditec Platform: CRS-Master, WASCA, TOSCA, MEL70, and MEL80 Excimer Lasers
Dan Z. Reinstein, MD, MA (Cantab), FRCS; Daniel R. Neal, PhD; Hartmut Vogelsang, PhD; Eckhard Schroeder, PhD; Zoltan Z. Nagy, MD, PhD; Michael Bergt, PhD; James Copland, MS; and Daniel Tapa
Chapter 30: The Allegretto Wave: A Different Approach to Wavefront-Guided Ablation
Matthias Maus, MD; Arthur Cummings, MBChB, MMEd, FCS(SA) FRCS; and Stefan Tuess, Dip Eng
Chapter 31: Clinical Results With the Nidek NAVEX Platform
Arturo Chayet, MD and Harkaran S. Bains

Section IV Wavefront Customized Lenses
Chapter 32: Biomaterials for Wavefront Customization
Liliana Werner, MD, PhD; Nick Mamalis, MD; and David J. Apple, MD
Chapter 33: Feasibility of Wavefront Customized Contact Lenses
Ian Cox, PhD and Michele Lagana, OD
Chapter 34: Aberration-Correcting Intraocular Lenses
Patricia Piers; N.E. Sverker Norrby, PhD; and Ulrich Mester, MD
Chapter 35: The Calhoun Light Adjustable Lens: A Postinsertion Method for the Correction of Refractive Errors
Christian A. Sandstedt, PhD; Shiao Chang, PhD; and Daniel M. Schwartz, MD

Section V Nonwavefront Customized Corrections
Basic Science Section
Chapter 36: Corneal Topography and Customized Ablation
Charles E. Campbell, BS
Chapter 37: Combining Corneal and Ocular Wave Aberrations
Pablo Antal, PhD
Chapter 38: Combining Vector Planning With Wavefront Analysis to Optimize Laser In-Situ Keratomileusis Outcomes
Noel Alpins, FRACO, FRCOphth, FACS and Leisa Schmid, PhD
Clinical Science Section
Chapter 39: Custom-Contoured Ablation Pattern Method for the Treatment of Irregular Astigmatism
Gustavo E. Tamayo, MD and Mario G. Serrano, MD
Chapter 40: Surgeon-Guided Retreatment of Irregular Astigmatism and Aberrations
Gilles Lafond, MD, FRCS(C)
Chapter 41: Customized Visual Correction of Presbyopia
Fabrice Manns, PhD; Arthur Ho, MOptom, PhD; and Ronald R. Krueger, MD, MSE

Section VI The Future of Customization
Chapter 42: The Future of Customization
Ronald R. Krueger, MD, MSE; Scott M. MacRae, MD; and Raymond A. Applegate, OD, PhD

Appendix 1: Optical Society of America Wavefront Standards
