About the Editor
Contributing Authors
Preface
Foreword

Section I: Phaco Chop Technique
Chapter 1: Why Learn Chopping?
David F. Chang, MD
Chapter 2: Horizontal Chopping: Principles and Pearls
Randall J. Olson, MD
Chapter 3: Vertical Chopping: Principles and Pearls
Louis D. "Skip" Nichamin, MD
Chapter 4: Comparing and Integrating Horizontal and Vertical Chopping
David F. Chang, MD
Chapter 5: Transitioning to Phaco Chop: Pearls and Pitfalls
David F. Chang, MD

Section II: Phacodynamics of Chopping
Chapter 6: Understanding the Phacodynamics of Chopping
Barry S. Seibel, MD
Chapter 7: Optimizing Machine Settings for Chopping Techniques
David F. Chang, MD
Chapter 8: Optimizing the AMO Sovereign for Chopping
David F. Chang, MD
Chapter 9: Optimizing the Alcon Legacy for Chopping
Barry S. Seibel, MD
Chapter 10: Optimizing the Alcon Infiniti for Chopping
David F. Chang, MD
Chapter 11: Optimizing the Bausch & Lomb Millennium for Chopping
Barry S. Seibel, MD

Section III: Complicated Cases and Complications: Strategies and Management
Chapter 12: Strategies for the Difficult Capsulorrhexis
David F. Chang, MD
Chapter 13: Pearls for Hydrodissection and Hydrodelineation
David F. Chang, MD
Chapter 14: Phaco Strategies for Complicated Cataracts
David F. Chang, MD
Chapter 15: Posterior Capsule Rupture and Vitreous Loss: Advanced Approaches
Louis D. "Skip" Nichamin, MD
Chapter 16: Strategies for Managing Posterior Capsular Rupture
David F. Chang, MD

Section IV: Bimanual Phaco Chop
Chapter 17: MicroPhaco Chop: Rationale and Technique
Randall J. Olson, MD
Chapter 18: Bimanual Phaco Chop: Fluidic Strategies
David F. Chang, MD
Chapter 19: Bimanual Phaco Chop for Capsular or Zonular Defects
David F. Chang, MD
