Table of Contents

**Preface**

Stig Kjaer Andersen, Gunnar O. Klein, Stefan Schulz, Jos Aarts, M. Cristina Mazzoleni

**1. Bioinformatics**

An Ontology Based Method to Solve Query Identifier Heterogeneity in Post-Genomic Clinical Trials

Alberto Anguita, Luis Martin, Jose Crespo, Manolis Tsiknakis

Gene Regulation Ontology (GRO): Design Principles and Use Cases

Elena Beisswanger, Vivian Lee, Jung-Jae Kim, Dietrich Rebholz-Schuhmann, Andrea Splendiani, Olivier Dameron, Stefan Schulz, Udo Hahn

Differences in Doctors’ and Nurses’ Assessments of Hospital Culture and Their Views About Computerised Order Entry Systems

Joanne Callen, Jeffrey Braithwaite, Johanna Westbrook

Novelty Detection M1 Using One-Class Parzen Density Estimator. An Application to Surveillance of Nosocomial Infections

Gilles Cohen, Hugo Sax, Antoine Geissbuhler

Interface Terminologies: Bridging the Gap Between Theory and Reality for Africa

Andrew S. Kanter, Amy Y. Wang, Fred E. Masarie, Frank Naeymi-Rad, Charles Safran

Cataloguing and Displaying Web Feeds from French Language Health Sites: A Web 2.0 Add-on to a Health Gateway

G. Kerdelhue, B. Thiron, B. Dahamna, S. J. Darmoni

Videophones for the Delivery of Home Healthcare in Oncology

Mona Laila, Vincent Rialle, Lydie Nicolais, Catherine Duguay, Alain Franco

Addressing the Biomedical Informatics Needs of a Microarray Laboratory in a Clinical Microbiology Context

Guillermo Lopez-Campos, Victoria Lopez Alonso, Fernando Martin-Sanchez

CEMARA: A Web Dynamic Application Within a N-Tier Architecture for Rare Diseases

Claude Messiaen, Loïc Le Mignot, Ana Rath, Jean-Baptiste Richard, Eric Dufour, Mohamed Ben Said, Jean-Philippe Jais, Alain Verloes, Martine Le Merrer, Christine Bodemer, Genevieve Baujat, Marion Gerard-Blanluet, Eva Bourdon-Lanoy, Remi Salomon, Segolene Ayme

Developing a Shared Electronic Health Record for Patients and Clinicians

Cornelia M. Ruland, Haakon Brynhi, Roar Andersen, Tore Brynhi

**2. Consumer and Home Based eHealth**

Treasure Hunt - A Serious Game to Support Psychotherapeutic Treatment of Children

Veronika Brezinka

Virtual Rehabilitation After Stroke

An Easy to Use and Affordable Home-Based Personal eHealth System for Chronic Disease Management Based on Free Open Source Software

Katja F. Borch, Trine Krogsæth, Anja H. Scholl, Astrid Bratvold, Marijke Jongsmann

Alignment of Lay and Specialized Passages in Comparable Medical Corpora

Louise Deleger, Pierre Zweigenbaum

Knowledge Engineering as a Support for Building an Actor Profile Ontology for Integrating Home-Care Systems

Karina Gilbert, Aida Vals, David Riano

Evaluation of the Use of Digital Pens for Pain Assessment in Palliative Home Healthcare

Leili Lind

Reusing Models of Actors and Services in Smart Homecare to Improve Sustainability

Stale Waldenhaug, Erlend Stav, Marius Mikalsen

A System for Monitoring Physical Activity Data Among People with Type 2 Diabetes

Eirik Arsand, Odd-Arne Olsen, Ragnhild Varmdal, Willy Mortensen, Gunnar Hartvigsen

**3. Decision Support and Knowledge Management**

Medical Knowledge Packages and Their Integration into Health-Care Information Systems and the World Wide Web

Klaus-Peter Adlassnig, Andrea Rappelsberger

Diversity in Preoperative-Assessment Data Collection, a Literature Review

Leila Ahmadian, Ronald Comet, Wilton A. van Klei, Nicolette F. de Keizer

Representing Health, Disorder and Their Transitions by Digraphs
Characterizing the Dimensions of Clinical Practice Guideline Evolution
Jacques Bouaud, Brigitte Seroussi

Specification of Business Rules for the Development of Hospital Alarm System: Application to the Pharmaceutical Validation
Abdelali Boussadi, Cedric Bousquet, Brigitte Sabatier, Isabelle Colombet, Patrice Degoulet

Formalization of Clinical Practice Guidelines
David Buchtel, Jan Peleska, Amost Vesely, Jana Zvarova, Miroslav Zvolsky

A Simple Method for Heuristic Modeling of Expert Knowledge in Chronic Disease: Identification of Prognostic Subgroups in Rheumatology
Orjan Dahlstrom, Toomas Timpka, Ursula Hass, Thomas Skogh, Ingrid Thyberg

A Method for Indexing Biomedical Resources over the Internet
Guillermo de la Calle, Miguel Garcia-Remesal, Victor Maiojo

Improving Pain & Symptom Management for Advanced Cancer Patients with a Clinical Decision Support System
Krista Elvidge

Collaboration Patterns in an Online Community of Practice in Oral Medicine
Goran Falkman, Marie Gustafsson, Olof Torgersson, Mats Jontell

An Automated Personalised Intervention Algorithm for Remote Patient Monitoring
Joanna Furse, Malcolm Clarke, Russell Jones, Sneh Khemka, Genevieve Findlay

Syntactical Negation Detection in Clinical Practice Guidelines
Stefan Gindl, Katharina Kaiser, Silvia Miksch

Subjective Usability of the CARDSS Guideline-Based Decision Support System
Rick Goud, Monique W. M. Jaspers, Arie Hasman, Niels Peek

Assessment of Biomedical Knowledge According to Confidence Criteria
Ines Jilani, Natalia Grabar, Pierre Meneton, Marie-Christine Jaulent

Using Knowledge for Indexing Health Web Resources in a Quality-Controlled Gateway
Michel Joubert, Stefan J. Darmoni, Paul Avillach, Badisse Dahamna, Marius Fieschi

On Machine Learning Classification of Otoneurological Data
Martti Juhola

Semantic Relation Mining of Solid Compounds in Medical Corpora
Dimitrios Kokkinakis

Use of the C4.5 Machine Learning Algorithm to Test a Clinical Guideline-Based Decision Support System
Jean-Baptiste Lamy, Anis Ellini, Bahid Ebrahimimina, Jean-Daniel Zucker, Hector Falcoff, Alain Venot

Process Mining for Clinical Workflows: Challenges and Current Limitations
Martin Lang, Thomas Burke, Susanne Laumann, Hans-Ulrich Prokosch

Searching Related Resources in a Quality Controlled Health Gateway: A Feasibility Study
Tayeb Merabti, Suzanne Pereira, Catherine Letord, Thierry Lecroq, Michel Joubert, Badisse Dahamna, Stefan J. Darmoni

Association Studies on Cervical Cancer Facilitated by Inference and Semantic Technologies: The ASSIST Approach
Pericles Mitkas, Vassilis Koutkiás, Andreas Symeonidis, Manolis Falelakis, Christos Diou, Irini Lekka, Anastasios Delopoulos, Theodoros Agorastos, Nicos Maglaveraς

Discrete Event Simulation as a Tool in Optimization of a Professional Complex Adaptive System
Anders Lassen Nielsen, Helmer Hilwig, Niranjan Kissoon, Surujpal Teelucksingh

An Artificial Neural Network Derived Trauma Outcome Prediction Score as an Aid to Triage for Non-Clinicians
Adrian Pearll, Raphael Bar-Or, David Bar-Or

Case-Based Reasoning to Explain Medical Model Exceptions
Rainer Schmidt, Olga Vorobiyeva

Diagnostic Games: From Adequate Formalization of Clinical Experience to Structure Discovery
Michael A. Shifrin, Eva I. Kasparova

Disease Outbreak Detection Through Clique Covering on a Weighted ICPC-Coded Graph
Klaske van Vuurden, Gunnar Hartvigsen, Johan Gustav Belllika

4. Evaluation
A Randomized Controlled Trial to Evaluate an Electronic Scoring Tool in the ICU
Thomas Burke, Alexander Beisig, Marion Ganslmayer, Hans-Ulrich Prokosch

Evaluating the Impact of a Service-Oriented Framework for Healthcare Interoperability
Stylianos Daskalakis, John Manias

The Use of Performance Metrics to Monitor the Impact of CPOE on Pathology Laboratory Services
Andrew Georgiou, Wendy Morse, Wyndham Timmins, Sangeeta Ray, Johanna I. Westbrook

Development of a Patient-Oriented Tool for Evaluating the Quality of Breast Cancer Information on the Internet
Wen-Chin Hsu, Peter A. Bath

Pre-Post Evaluation of Physicians’ Satisfaction with a Redesigned Electronic Medical Record System
Monique W. M. Jaspers, Linda W. P. Peute, Arnaud Lauteslager, Piet J. M. Bakker

CPOE System Design Aspects and Their Qualitative Effect on Usability
Reza Khajouei, Monique W. M. Jaspers

Decision Support System Supporting Clinical Reasoning Process - An Evaluation Study in Dementia Care
Helena Lindgren

Evaluating Inter-Professional Work Support by a Computerized Physician Order Entry (CPOE) System
5. Health Information Systems Including EHR

Managing Care Pathways Combining SNOMED CT, Archetypes and an Electronic Guideline System
Knut Bernstein, Ulrich Andersen

Analysis and Evaluation of EHR Approaches
Bernd G. M. E. Blobel, Peter Pharow

Electronic Disease Surveillance for Sensitive Population Groups - The Diabetics Case Study
Taxiarchis Botsis, Ole Hejlesk, Johan Gustav Bellika, Gunnar Hartvigsen

Clinical Processes in an Innovative Vascular Surgeon Community. Implications for Workflow Modeling
Bert Brathem, Andreas R. Seim, Anid Faxvaag

Medical Knowledge Representation System
David Buchtel, Jan Peleska, Miroslav Zvolacky, Jana Zvarova

An Electronic Registry for Physiotherapists in Belgium
Ronald Buyt, Marc Nyssen

Computer Support for Shared Care of Diabetes: Findings from a Danish Case
Keld Bodker, Maren Fich Granlien

From Documents on Paper to Electronic Medical Records
Lino Carraro, Angel Pena, Ruben Melcon, Foo. Javier Gonzalez, Eduardo Couto

An Archetype-Based Testing Framework
Rong Chen, Sebastian Garde, Thomas Beale, Mikael Nystrom, Daniel Karlsson, Gunnar O. Klein, Hans Ahlfeldt

Supervised Approach to Recognize Question Type in a QA System for Health
Sarah Cruchet, Arnaud Gaudinat, Celia Boyer

Group Decision Support System Applied to the Medical Pluri-Disciplinary Decision Group: Usability and Efficacy
Nathalie Degardin-Capon, Nathalie Bricon-Souf, Marie-Catherine Beuscart-Zephir, Regis Beuscart

The Gap Between Actual and Mandated Use of an Electronic Medication Record Three Years After Deployment
Maren Fich Granlien, Morten Hertzum, Jette Gudmundsen

Analysis of EHRs for Research, Quality Management and Health Politics
Walter Gall, Wilfried Grossmann, Georg Duftschmid, Thomas Wrba, Wolfgang Dorda

Consent-Based Access to Core EHR Information: The SUMO-Project
Vigdis Heimly

Facilitating the openEHR Approach - Organizational Structures for Defining High-Quality Archetypes
Christian Dominik Kohl, Sebastian Garde, Petra Knaup

Implementation of an Electronic Medication System and Disregarded Power of the Record
Henriette Mabeck

cyberMarathon - Increasing Physical Activity Using Health-Enabling Technologies
Maik Plishcke, Michael Marschollek, Klaus-Hendrik Wolf, Reinhold Haux, Uwe Tegtbuer

Integrating Clinical, Gene Expression, Protein Expression and Preanalytical Data for in-silico Cancer Research
Delphine Rossille, Anita Burgun, Celine Pangault-Lorho, Thierry Fest

Developing a Taxonomy of Communication Errors in Heterogeneous Information Systems
Samrend Saboor, Eliske Ammenwerth

Mining Knowledge from Corpora: An Application to Retrieval and Indexing
Lina F. Soualmaia, Badisse Dahamna, Stefan Darmoni

Enhanced Information Retrieval from Narrative German-Language Clinical Text Documents Using Automated Document Classification
Stephan Spat, Bruno Cadonna, Ivo Rakocay, Christian Gutl, Hubert Leitner, Gunther Stark, Peter Beck

Frequency of Hospital-Acquired Pneumonia in Electronic and Paper-Based Patient Record
Jurgen Stausberg, Abdelouahid Azaouagh

Reliable Personal Health Records
Ton van Deursen, Paul Koster, Milan Petkovic

Involving Clinicians in the Development of an Electronic Clinical Handover System - Thinking Systems Not just Technology
Ming Chao Wong, Paul Turner, Kwang Chien Yee

Perfect Match? Generation Y as Change Agents for Information Communication Technology Implementation in Healthcare
Kwang Chien Yee, Erin Mills, Caroline Airey

6. Human-Computer Interaction & Imaging

Does a Hybrid Electronic-Paper Environment Impact on Health Professional Information Seeking?
E. M. Borycki, L. Lemieux-Charles

Application of Business Process Management to Drive the Deployment of a Speech Recognition System in a Healthcare Organization
Affective Computing and Medical Informatics: State of the Art in Emotion-Aware Medical Applications
Andrej Luneski, Panagiotis D. Bamidis, Madga Hitoglou-Antoniadou

Using Medline Queries to Generate Image Retrieval Tasks for Benchmarking
Henning Muller, Jayashree Kalpathy-Cramer, William Hersh, Antoine Geissbuhler

Voice-Controlled Data Entry in Dental Electronic Health Record
Miroslav Nagy, Petr Hanzlicek, Jana Zvarova, Tatjana Dostalova, Michaela Seydlova, Radim Hippman, Lubos Smid, Jan Trmal, Josef Psutka

A Large, High Resolution Tiled Display for Medical Use: Experiences from Prototyping of a Radiology Scenario
Bernt Ivar Olsen, Sanjay Baby Dhakal, Odd Petter Eldevik, Per Hasvold, Gunnar Hartvigsen

The Contextual Nature of Usability and Its Relevance to Medical Informatics
Dag Svances, Anita Das, Ole Andreas Also

OPTISAS a New Method to Analyse Patients with Sleep Apnea Syndrome
Adrien Ugon, Carole Philippe, Slawomir Pietrasz, Jean-Gabriel Ganascia, Pierre P. Levy

7. Learning, Modelling and Simulation

Predictors of Preterm Birth in Birth Certificate Data
Karen L. Courtney, Sara Stewart, Mihail Popescu, Linda K. Goodwin

The p33 Network Modeling - Current State and Future Prospects
Raul Florin Horhat, Gheorghe I. Mihalas, Mihaela Neamtu

Using a Low-Cost Simulation Approach for Assessing the Impact of a Medication Administration System on Workflow
A. W. Kushniruk, E. M. Borycki, S. Kuxata, H. Watanabe

Process Mining Techniques: An Application to Stroke Care
Ronny Mans, Helen Schonenberg, Giorgio Leonardi, Silvia Panzarasa, Anna Cavallini, Silvana Quaglini, Wil van der Aalst

Development of an E-Learning System for Occupational Medicine: Usability Issues
M. Cristina Mazzoleni, Carla Rognoni, Enrico Finozzi, Ines Giorgi, Franco Pugliese, Marco Pagani, Marcello Imbriani

Economic Advantage of Pharmacogenomics - Clinical Trials with Genetic Information
Wataru Ohashi, Hiroshi Mizushima, Hiroshi Tanaka

Recognising e-Health as Part of a Cohesive Professional Community
Jean M. Roberts

Application of the Multi-Disciplinary Thematic Seminar Method in Two Homecare Cases - A Comparative Study
Isabella Scandurra, Maria Hagglund, Sabine Koch

8. National eHealth Roadmaps, Cross-Border Applications and Organisational Strategies

Modelling Access to Renal Transplantation Waiting List in a French Healthcare Network Using a Bayesian Method
Sahar Bayat, Marc Cuggia, Michel Kessler, Serge Briancon, Pierre Le Beux, Luc Frimat

Evaluation of Robustness of a User Requirements Specification Approach in a Purchase Context, a LIS Case Study
Jytte Brender, Peter McNair

A Vision for the Use of ICT by Norwegian Healthcare in 2012
Edgar Gluck, Roald Bergstrom, Ole-Fredrik Melleby, Jessica Gabin

IT-Based Information Management in Health Care Networks: The MedoCom Approach
Nils Hellriung, Nathalie Gusew Martin Willkom, Reinhold Haux

The Role of Patients and Their Health Cards in Integrated eHealth Environments
Claudia Hildebrand, Peter Pharow, Bernd Blobel

A Deployment and Research Roadmap for Semantic Interoperability: The EU SemanticHEALTH Project
Pierre Lecelle, Jean M. Rodrigues, Pieter Zanstra, Bedirhan Ustun, Dipak Kalra, Gyargy Surjan, Alan Rector, Veli Stroetmann, Martti Virtanen

DebugIT for Patient Safety - Improving the Treatment with Antibiotics Through Multimedia Data Mining of Heterogeneous Clinical Data
Christian Lovis, Dirk Colaert, Veli N. Stroetmann

Study on Urban Healthcare Consumption in Northern France
Julia Salleron, Alain Duhamel, Charles Sulman, Valerie Deken, Regis Beuscart

Cross-Border Collaboration Between Greece and FYROM: Mobile Healthcare Provision
Stergiani Spyrou, Dimitrios Vartziopoulos, Panagiotis Bamidis, Nicos Maglaveras

9. Privacy and Security

Secure Dissemination of Electronic Healthcare Records in Distributed Wireless Environments
Petros Belsis, Dimitris Vassil, Christos Skoulas, Grammati Pantziou

Watermarking Medical Images with Anonymous Patient Identification to Verify Authenticity
Gouenou Coatrieux, Catherine Quantin, Julien Montagner, Maniane Fassa, Francois-Andre Allaert, Christian Roux

Empowerment of Health Professionals: How High Level Security Education Can Raise Awareness and Confidence
Matthias Herbst, Christoph Busch, Peter Pharow, Bernd Blobel
