Table of Contents

Contents
I. Foundations
1. Motor Disorders and Neuropsychological Development: A Historical Appreciation, David E. Tupper and Sandra K. Sondell
2. Neuroimaging of Developmental Motor Disorders, Deborah Dewey and Shauna Bottos
3. Approaches to Understanding the Neurobehavioral Mechanisms Associated with Motor Impairments in Children, Eric A. Roy, Shauna Bottos, Kelly Pryde, and Deborah Dewey
4. Motor Proficiency Assessment Batteries, Anna Barnett and Judith M. Peters

II. Clinical Disorders
5. Neurodevelopmental Motor Disorders: Cerebral Palsy and Neuromuscular Diseases, Thomas A. Blondis
6. Motor Disorders in Children with Intellectual Disabilities, Digby Elliott and Lindsay Bunn
7. Motor Problems in Children with Autistic Spectrum Disorders, Isabel M. Smith
8. Acquired Childhood Conditions with Associated Motor Impairments, Deborah Dewey, Shauna Bottos, and David E. Tupper
10. Balance and Postural Control across the Lifespan, Harriet G. Williams and Laura Ho

III. Neuropsychological Manifestations
11. Developmental Phonological Disorder, Megan M. Hodge and Leslie Wellman
13. Visuospatial, Kinesthetic, Visuomotor Integration, and Visuoconstructural Disorders: Implications for Motor Development, Peter H. Wilson
14. Processing Deficits in Children with Movement and Attention Problems, Jan Piek and Thelma Pitcher
15. Understanding the "Graphia" in Developmental Dysgraphia: A Developmental Neuropsychological Perspective for Disorders in Producing Written Language, Virginia Berninger

IV. Issues and Applications
17. Constraints in Neuromotor Development, Reint H. Geuze
18. Co-occurrence of Motor Disorders with Other Childhood Disorders, Deborah Dewey, Susan G. Crawford, Brenda N. Wilson, and Bonnie J. Kaplan
19. Psychosocial Functions of Children and Adolescents with Movement Disorders, Motohide Miyahara and Bryant J. Cratty
20. Implications of Movement Difficulties for Social Interaction, Physical Activity, Play, and Sports, Dawne Larkin and Janet Summers
