Assessment of Feigned Cognitive Impairment: A Neuropsychological Perspective

Boone, Kyle Brauer PhD

Table of Contents

I. Symptom Fabrication: Social and Biological Perspectives
2. Functional Neuroimaging of Deception and Malingering, Lisle R. Kingery and David J. Schretlen

II. Cognitive Effort Assessment Techniques and Strategies
6. Intelligence Tests as Measures of Effort, Talin Babikian and Kyle Brauer Boone
7. Use of Standard Memory Tests to Detect Suspect Effort, Po H. Lu, Steven A. Rogers, and Kyle Brauer Boone
8. Validity Indicators within Executive Function Measures: Use and Limits in Detection of Malingering, Jerry J. Sweet and Nathaniel W. Nelson
10. The MMPI-2 Fake Bad Scale in Detection of Noncredible Brain Injury Claims, Manfred F. Greiffenstein, David Fox, and Paul R. Lees-Haley

III. Cognitive Effort Testing in Various Clinical Populations
11. Malingering Mild Traumatic Brain Injury: Behavioral Approaches Used by Both Malingering Actors and Probable Malingerers, John E. Meyers
12. Including Measures of Effort in Neuropsychological Assessment of Pain- and Fatigue-Related Medical Disorders: Clinical and Research Implications, Julie Suhr and Brad Spickard
15. Symptom Validity Tests in the Epilepsy Clinic, David J. Williamson, Daniel L. Drane, and Elizabeth S. Stroup
16. The Use of Effort Tests in the Context of Actual versus Feigned Attention-Deficit/Hyperactivity Disorder and Learning Disability, Kimberly Alfano and Kyle Brauer Boone
17. Cognitive Complaints in Multiple Chemical Sensitivity and Toxic Mold Syndrome, Robert J. McCaffrey and Christine L. Yantz
19. Assessment of Malingering in Criminal Forensic Neuropsychological Settings, Robert L. Denney
20. Future Directions in Effort Assessment, Martin L. Rohling and Kyle Brauer Boone
