Table of Contents

1. Developmental Evaluation Defined and Positioned
   *The Distinction Emerges
   *Facing Complexity and Facing Reality: Or, Facing the Realities of Complexity
   *Developmental Evaluation and Complexity Theory
   *Developmental Evaluation and Single-Loop versus Double-Loop Learning
   *The Importance of Interpretive Frameworks
   *Developmental Evaluation as Utilization-Focused
   *Charting the Developmental Journey: Overview of the Book
   *Five Developmental Evaluation Purposes and Uses
2. Developmental Evaluation as a Distinct Purpose and Niche
   *Beyond Planning: Jumping into the Fire
   *Evaluation Questions under These Different Engagement Scenarios
   *Vision Encounters Reality: The Territory of Developmental Evaluation
   *Systems Issues: Boundary Management as a Developmental Evaluation Focus
   *Developing Innovations versus Improving and Testing Models: Developmental Evaluation Distinguished from Formative and Summative Evaluation
   *Ongoing Development Informed by Developmental Evaluation
   *Strategic Thinking and Developmental Evaluation
   *The Niche of Developmental Evaluation: Chapter Overview and Summary
3. Thinking Outside Evaluation’s Boxes
   *Creative Evaluation
   *Of Plums and Prunes
   *History and Biography as Context: The Personal Factor
   *More History and Biography as Context
   *Fundamental Principles
   *Developmental Evaluation in Context
   *External Evaluators and Developmental Evaluation
   *Ten Key Points about Developmental Evaluation Illustrated by the Caribbean Example
4. Situation Recognition and Responsiveness: Distinguishing Simple, Complicated, and Complex
   *Detecting Patterns
   *Detecting Complexity as a Distinct Pattern and Territory for Inquiry
   *The Challenges of Situation Recognition
   *A Situation Recognition Heuristic: Distinguishing Simple, Complicated, and Complex
   *Situational Evaluation: Implications for Practice
   *Variations on a Theme: The Cynefin Framework
   *From Train Brakeman to Locomotive Engineer to Evaluation Champion
   *Project SleepBetter
   *Systems Thinking
   *Complexities of Complexity
   *Useful Complexity Constructs for Developmental Evaluation
   *Complexity-Sensitizing Concepts
   *Competing Perspectives on How the World Is Changed
   *The Top-Down Approach
   *Adaptation versus Replication: Principles for Developmental Evaluation
   *Best Practices versus Effective Principles
   *From the Grass Roots to the Adaptive Middle
   *Alternative Approaches to Change
   *Developmental Evaluation: The Action in the Muddled Middle
   *Looking Back and Looking Forward
   *Appendix 6.1. Positioning and Contrasting Developmental Evaluation with Other Evaluation Approaches
7. The Adaptive Cycle and Developmental Evaluation
   *The Complexity Doorframe Redux
   *Five Developmental Evaluation Purposes and Uses
   *Resilience and Developmental Evaluation
   *A Strategic Approach to Resilience: Engineering Resilience versus Ecosystem Resilience
