

Chemical Library Design

Zhou, Joe Zhongxiang

ISBN-13: 9781607619307

Table of Contents

Part I: General Topics

1. Historical Overview of Chemical Library Design
Roland E. Dolle
2. Cheminformatics and Library Design
Joe Zhongxiang Zhou
3. Molecular Library Design Using Multi-Objective Optimization Methods
Christos A. Nicolaou and Christos C. Kannas
4. A Scalable Approach to Combinatorial Library Design
Puneet Sharma, Srinivasa Salapaka, and Carolyn Beck
5. Application of Free-Wilson Selectivity Analysis for Combinatorial Library Design
Simone Scialoja, Robert V. Stanton, Theresa L. Johnson, and Hualin Xi
6. Application of QSAR and Shape Pharmacophore Modeling Approaches for Targeted Chemical Library Design
Jerry O. Ebalunode, Weifan Zheng, and Alexander Tropsha
7. Combinatorial Library Design from Reagent Pharmacophore Fingerprints
Hongming Chen, Ola Engkvist, and Niklas Blomberg

Part II: Structure-Based Library Design

8. Docking Methods for Structure-Based Library Design
Claudio N. Cavasotto and SharangDhar S. Phatak
9. Structure-Based Library Design in Efficient Discovery of Novel Inhibitors
Shunqi Yan and Robert Selliah
10. Structure-Based and Property-Compliant Library Design of 11 β -HSD1 Adamantyl Amide Inhibitors
Genevieve D. Paderes, Klaus Dress, Buwen Huang, Jeff Elleraas, Paul A. Rejto, and Tom Pauly

Part III: Fragment-Based Library Design

11. Design of Screening Collections for Successful Fragment-Based Lead Discovery
James Na and Qiyue Hu
12. Fragment-Based Drug Design
Eric Peyfant, Jason Cross, Kevin Paris, and OJÃ©airÃ©e H.H. Taso
13. LEAP into the Pfizer Global Virtual Library (PGVL) Space: Creation of Readily Synthesizable Design Ideas Automatically
Qiyue Hu, Zhengwei Peng, Jaroslav Kostrowicki, and Atsuo Kuki

Part IV: Library Design for Kinase Family

14. The Design, Annotation, and Application of a Kinase-Targeted-Library
Hualin Xi and Elizabeth A. Lunney

Part V: Library Design Tools

15. PGVL Hub: An Integrated Desktop Tool for Medicinal Chemists to Streamline Design and Synthesis of Chemical Libraries and Singleton Compounds
Zhengwei Peng, Bo Yang, Sarathy Mattaparti, Thom Shulok, Thomas Thacher, James Kong, Jaroslav Kostrowicki, Qiyue Hu, James Na, Joe Zhongxiang Zhou, David Klatte, Bo Chao, Shogo Ito, John Clark, Nunzio Sciammetta, Bob Coner, Chris Waller, and Atsuo Kuki
16. Design of Targeted Libraries Against the Human Chk1 Kinase Using PGVL Hub
Zhengwei Peng and Qiyue Hu
17. GLARE: A Tool for Product-Oriented Design of Combinatorial Libraries
Jean-FranÃ©ois Truchon
18. CLEVER: A General Design Tool for Combinatorial Libraries
Tze Hau Lam, Paul H. Bernardo, Christina L. L. Chai, and Joo Chuan Tong
